Among its advanced features, the Sharp XE-A201 offers the advantage of thermal printing at around 10 lines per second. Not only is this much faster than drum printing, it's also much quieter.

Wide paper means the receipt carries more information including your company logo, which the terminal can be programmed to print.

As the XE-A201 has electronic journal, which stores up to 2,000 lines of data for your records, there is no need for two-ply paper or a dual station printer, while customers retain the paper receipt.

There are up to 99 departments and a maximum of 1,200 PLUs for greater ease and efficiency. From your customer's point of view, the pop-up display has large 14mm LED segments that clearly show all transaction data.

From your point of view, the XE-A201 handles everything quickly and quietly.
