

SHARP®

POS TERMINAL

MODEL

ER-A750

INSTRUCTION MANUAL

INTRODUCTION

Thank you very much for your purchase of the SHARP POS Terminal Model ER-A750. Please read this Manual carefully before operating your machine in order to gain full understanding of functions and features. Please keep this manual for future reference. It will help you if you encounter any operational problems.

IMPORTANT

- **Install your POS terminal in a location that is not subject to direct radiation, unusual temperature changes, high humidity or exposure to water sources.**
Installation in such locations could cause damage to the cabinet and the electrical components.
- **The POS terminal should not be operated by an individual with wet hands.**
The water could seep into the interior of the POS terminal and cause component failure.
- **Do not apply excessive pressure to the display.**
Do not use a sharp-pointed object on the display.
The LCD display will be damaged easily.
- **When cleaning your POS terminal, use a dry, soft cloth. Never use solvents, such as benzine and/or thinner.**
The use of such chemicals will lead to discoloration or deterioration of the cabinet.
- **The POS terminal plugs into any standard wall outlet (official (nominal) voltage).**
Other electrical devices on the same electrical circuit could cause the POS terminal to malfunction.
- **If the POS terminal malfunctions, call your authorized SHARP dealer for service - do not try to repair the POS terminal yourself.**

PRECAUTION

This POS terminal has a built-in memory protection circuit which is operated by a rechargeable battery pack. It should be known that all batteries will, in time, dissipate their charge even if not used. Therefore to insure an adequate initial charge in the protection circuit and to prevent any possible loss of memory upon installation, it is recommended that each unit be allowed to be recharged for a period of 24 to 48 hours prior to use by the customer.

In order to charge the battery pack, the machine must be plugged in and its power switch must be set to the "ON" position. This recharging precaution can prevent unnecessary initial service calls.

Part Names and Functions

This chapter describes the part names and functions of this POS terminal.

External View

■ Front view

■ Rear view

■ Tilt control screws

1. Loosen the outer screw.

2. Adjust the height of the inner screw.

3. Tighten the outer screw to fix it.

These lines can be used to measure the height of the screw.

Keyboard

■ Inserting the keyboard sheet

Insert the keyboard sheet between the keyboard cover and the cabinet as illustrated below.

NOTE

- Do not spread the keyboard cover too far as it might tear.
- Replace the keyboard sheet with a new one if by chance it gets wet. Use of a wet keyboard sheet may cause problems.
- Be sure to use only SHARP-supplied keyboard sheets. Thick or hard sheets make key operation difficult.
- Smooth the keyboard sheet evenly under the keyboard cover, without any folds or wrinkles, to ensure easier operation.
- If you require a new keyboard sheet, please contact your dealer.
- The keyboard cover will eventually wear out. If your keyboard cover is dirty or broken, replace the cover with a new one. For details, contact your authorized SHARP dealer.

■ Standard keyboard layout

Clerk Keys

This POS terminal allows the operator to use the following four clerk identification systems:

- Real clerk keys (standard 6 clerks/max. 126 clerks)
- Clerk code entry (max. 255 clerks)
- Clerk entry keys (max. 10 clerks)
- WMF clerk keys (max. 127 clerks)

The standard POS terminal has been shipped with the real clerk key system being programmed. If you want to change the clerk identification system, contact your authorized SHARP dealer.

Real clerk keys (1, 2, 3, 4, 5, and 6)

These keys serve to identify clerks. Put one of the 1 through 6 keys in the clerk switch.

Clerk code entry (1 through 9999)

Enter the clerk code by using the following procedure:

Clerk entry keys

These keys identify clerks. Press any one of these keys.

WMF clerk keys

Put one of the WMF clerk keys in the WMF clerk switch.

Display

This POS terminal is provided with an LCD operator display and a 7-segment customer display.

■ Operator display

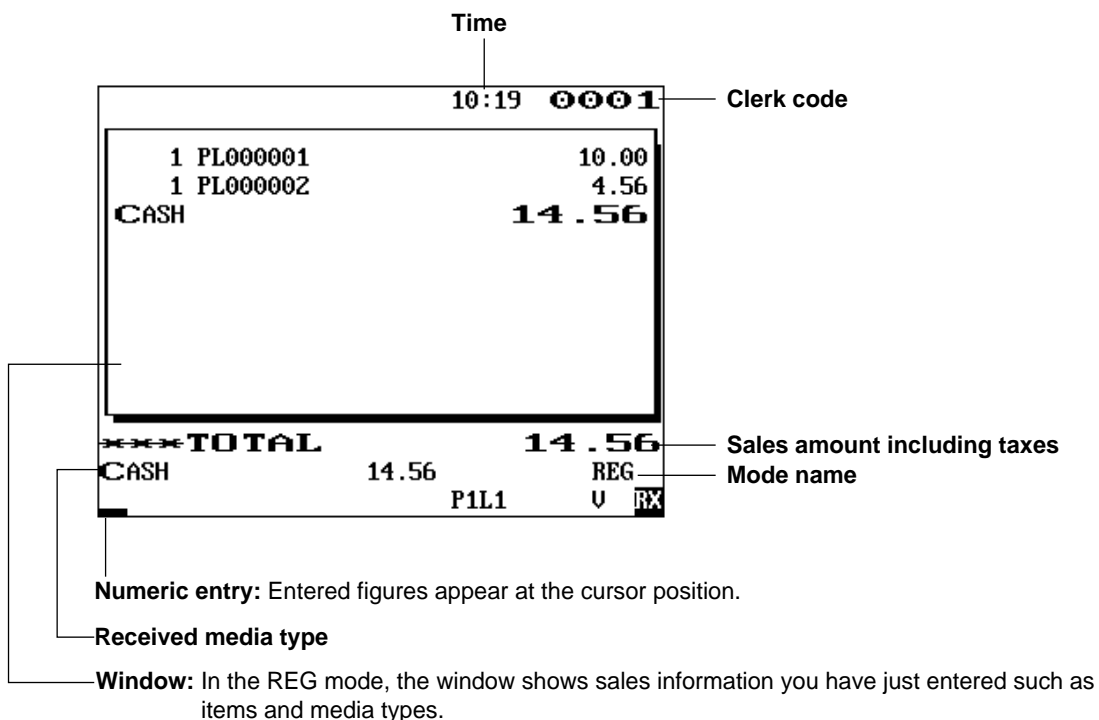

The display can be tilted to the best viewing angle.

NOTE

Do not try to force the display beyond its full opened position.

• Screen example 1 (REG mode)

Price level shift indicator (P1-P3)

: Shows the PLU price level currently selected.

PLU level shift indicator (L1-L3)

: Shows the PLU level currently selected.

Stock alarm indicator (!)

: Appears when the stock of the PLU which you entered is zero or negative.

Department shift status indicator (D1-D4)

: Shows the department shift status currently selected.

VAT shift status indicator (V)

: Appears when the VAT status is shifted.

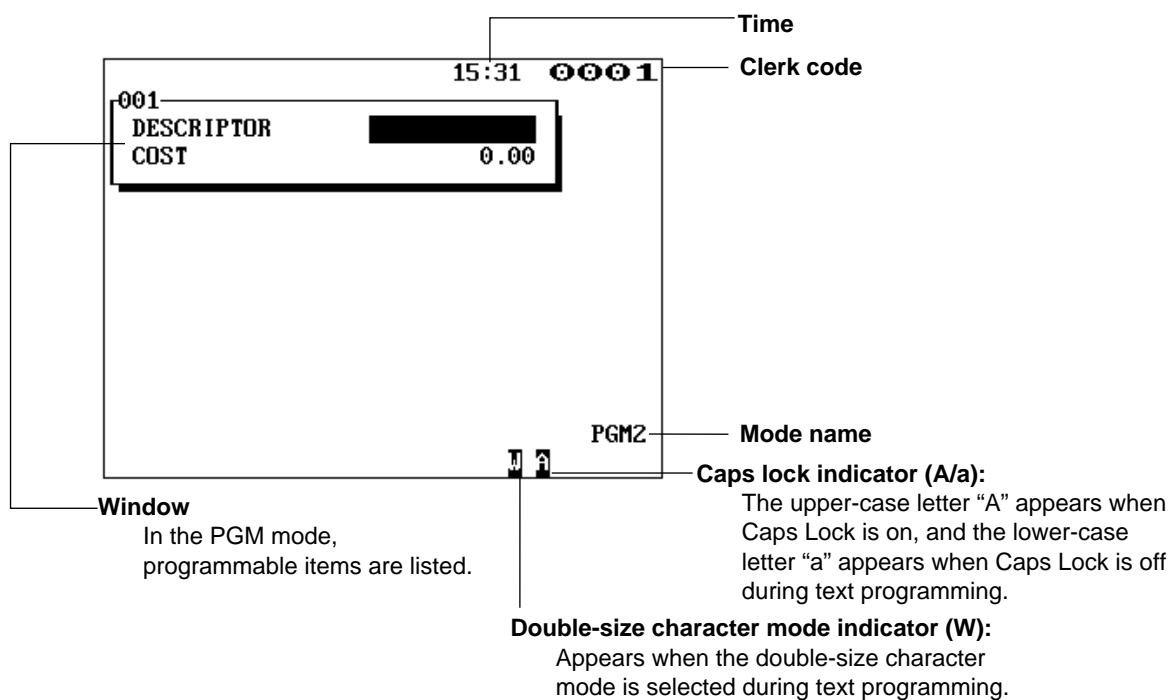

Receipt ON/OFF status indicator (R)

: Appears when the receipt ON-OFF function signs OFF.

Sentinel mark (X)

: Appears in the lower right corner of the screen when the cash in drawer exceeds a programmed sentinel amount. The sentinel check is performed for the total cash in drawer.

• Screen example 2 (PGM mode)

■ Customer display

- ST:** Lights up when a subtotal is displayed.
- :** Lights up when the change due amount appears in the display or when the total sale amount is negative.
- TL:** Lights up when you finalize a transaction without any amount tendered entry.
- VOID:** Lights up when the key is pressed or when an item void entry is made.
- RF:** Lights up when the key is pressed or when a refund item entry is made.

■ Screen save mode

When you want to save the electric power or save the display's life, use the screen save function. This function can turn the LCD backlight off when any server does not operate the POS terminal for an extended period of time. You can program the time for which your POS terminal should keep the normal status (in which the backlight is "ON") before it goes into the screen save mode.

To go back to the normal mode, press any key.

2

Before Operating the POS Terminal

This chapter describes those steps required to take when you use the POS terminal for the first time.

Display Adjustment

You can adjust the brightness and contrast of the display by using the corresponding controls.

- **Brightness control**

Turning the control backwards darkens the display and turning it forwards brightens the display.

- **Contrast control**

Turning the control backwards darkens the display and turning it forwards lightens the display.

Connecting the Printer and Installing the Paper Rolls

Before using the POS terminal, connect a printer and install paper rolls. For those operations, see the printer's manual.

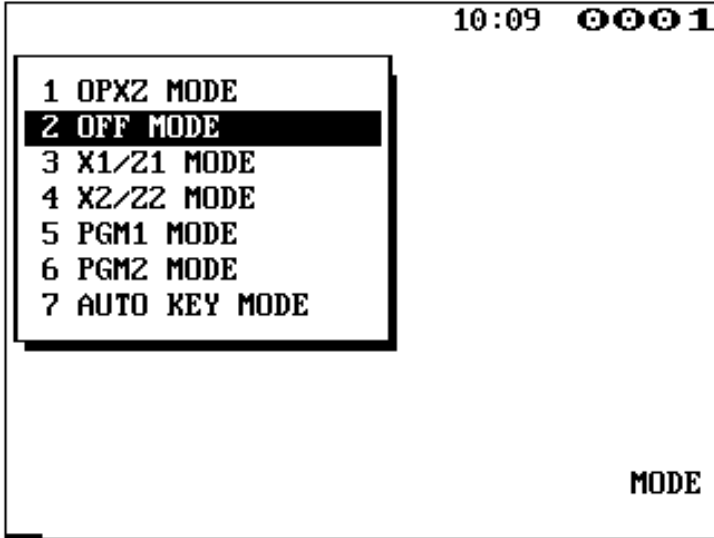

The ER-A750 may be configured with multiple types of printers offered in the market. For specific instructions related to the handling and care of the printer, please refer to the applicable printer instruction manual.

3

Selecting an Operating Mode

When you turn the POS terminal on, the mode selection window will appear on the display, listing available operating modes as shown below.

Mode selection window

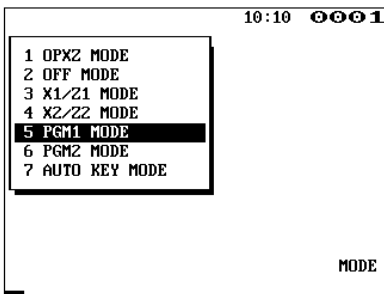

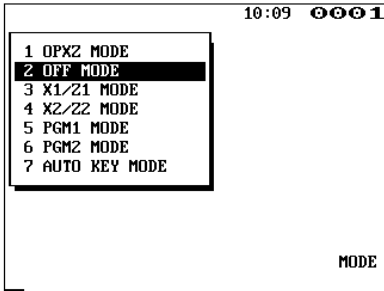

Operating Modes

You can select any mode other than REG from the list in the mode selection window. Your POS terminal supports the following eight operating modes:

REG mode	This mode allows you to enter various sales information. The mode selection window does not list this mode. To select this mode from the mode selection window, press the CANCEL key.
OPXZ mode	This mode allows clerks to take X or Z reports on their sales information. It can also be used to manage the number of hours for which employees work.
OFF mode	This mode locks all the operations of the POS terminal. When you select this mode, the window will disappear. Pressing any key turns the POS terminal "ON."
X1/Z1 mode	This mode is used to take various daily total reports (X1/Z1 reports).
X2/Z2 mode	This mode is used to take various weekly or monthly reports (X2/Z2 reports).
PGM1 mode	This mode allows you to program those items which need to be changed often such as unit prices of departments or PLUs and percentages.
PGM2 mode	This mode allows you to program those items which can be programmed in the PGM1 mode and do not require frequent changes such as date, time, and functions.
AUTO KEY mode	This mode allows you to program automatic sequencing keys.

Mode Selection

Procedure

Procedure

■ Selecting a mode

1. Use one of the following two ways:
 - Move the cursor to a desired option by using the or key.
 - Enter the desired option number by using a numeric key.

NOTE

You can assign usable modes to each clerk.

2. Press the key.

NOTE

When you want to enter the REG mode, simply press the key.

■ Returning to the mode selection window

To return to the mode selection window, use the following procedure:

1. Press the key with the menu screen for the selected mode displayed.
 - You will enter the REG mode.
2. Press the key.
 - You will return to the mode selection window.

4

Receipts

Type of Receipts

You can select one of the following 5 types of receipts. These types of receipts are available in the REG, MGR or VOID mode. By default, the addition receipt type is selected. If you want to change the type of receipts, contact your authorized SHARP dealer.

- Addition receipt type
- Addition without payment receipt type
- Single/double receipt type
- Single/double + addition receipt type
- Addition + single receipt type

■ Addition receipt type

The addition receipt is a standard type. Several items can be printed on one receipt.

Addition receipt

15/11/97	123456
#1009 11:48	JACK0001
PL000001	*5.80
PL000003	*1.40
CASH	*7.20

■ Addition without payment receipt type

Your POS terminal prints in the same manner as for the addition receipt type. However, it does not print the total part which shows payment methods such as "CASH" and "CHECK" with the total amount.

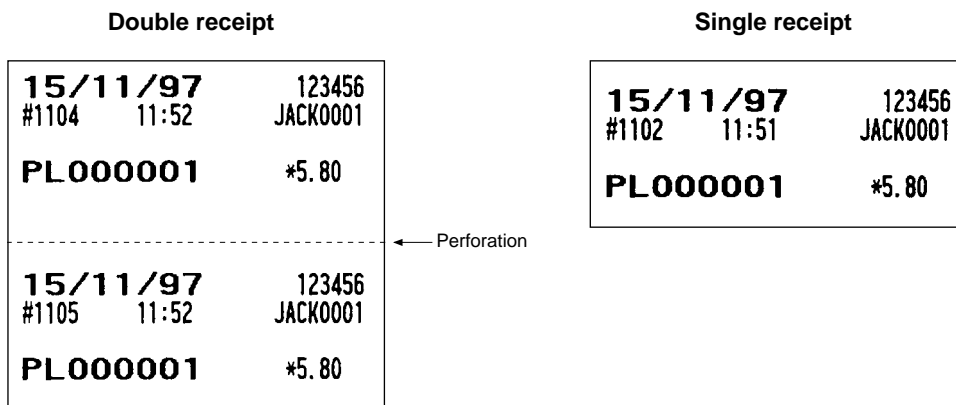

Addition without payment receipt

15/11/97	123456
#1109 11:54	JACK0001
PL000001	*5.80
PL000003	*1.40
SUBTOTAL	*7.20

■ Single/double receipt type

When you select this type:

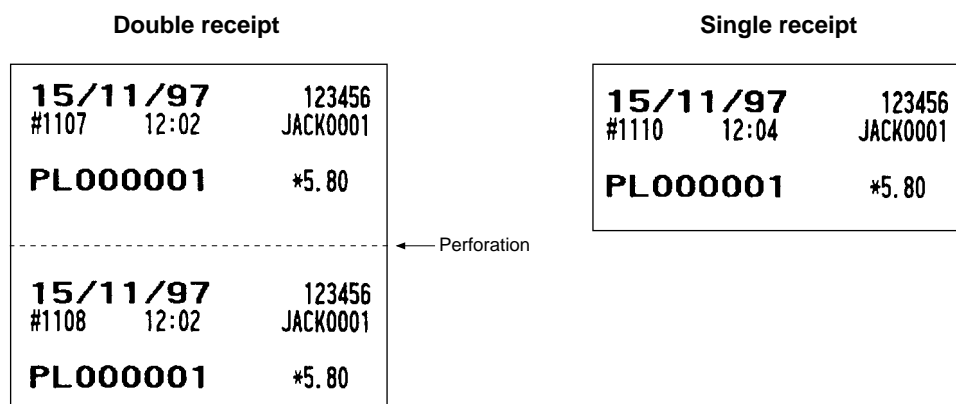

- One receipt is issued and the transaction is finalized each time you enter an item.
- A single receipt or a double receipt is issued depending on the PGM2 programming for the department.
- Each sales transaction is automatically handled as a cash deal.
- Items specified as SICS or SIF are treated as a single type.
- PBLU entry is allowed. (However, the receipt type is regarded as the single/double + addition mode receipt type.)
- Only the top logo is printed on the first part of the double receipt and the single receipt.
No logo is printed on the second part of the double receipt.

■ Single/double + addition receipt type

When you select this type:

- Each item receipt is issued in series after you finalize the transaction.
- A single receipt or a double receipt is issued depending on the PGM2 programming for the department.
- PBAL receipts and a total part of receipt are not issued in a PBLU entry.
- Items specified as SICS or SIF are treated as single type.
- Only the top logo is printed on the first part of the double receipt and the single receipt.
No logo is printed on the second part of the double receipt.

■ Addition + single receipt type

When you select this type:

- An addition receipt and each single receipt are issued in series after you finalize the transaction.
- Footer logo message is printed at the end of the addition receipt part.
- PBAL receipts and a total part of receipt are not issued in a PBLU entry.
- The information on multiplication entry will be printed on a single receipt.
- Only the top logo is printed on each single receipt.

15/11/97	123456
#1119 12:12	JACK0001
PL000001	*5.80
PL000003	*1.40
CASH	*7.20

YOUR RECEIPT THANK YOU	
15/11/97	123456
#1119 12:12	JACK0001
PL000001	*5.80

YOUR RECEIPT THANK YOU	
15/11/97	123456
#1119 12:12	JACK0001
PL000003	*1.40

Labels on the right side of the form:

- Brackets on the right side of the first section (top three rows) are labeled "Addition receipt".
- An arrow labeled "Perforation" points to the dashed line between the first and second sections.
- Brackets on the right side of the second section (middle three rows) are labeled "Single receipt".
- Brackets on the right side of the third section (bottom three rows) are labeled "Single receipt".

Sorted Receipt Function

When the sorted receipt function is programmed for your POS terminal, PLUs are printed in sorted form by PLU group regardless of the order that you entered items.

NOTE

This function is ineffective when the single/double receipt type is selected.

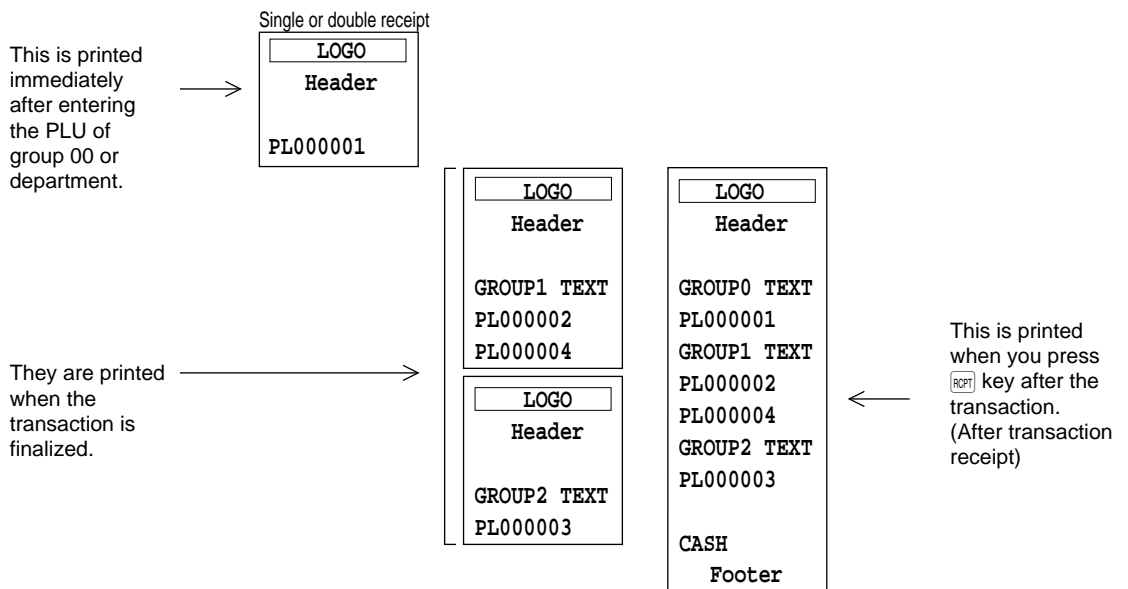

Example

It is assumed that you enter the items in the following order:

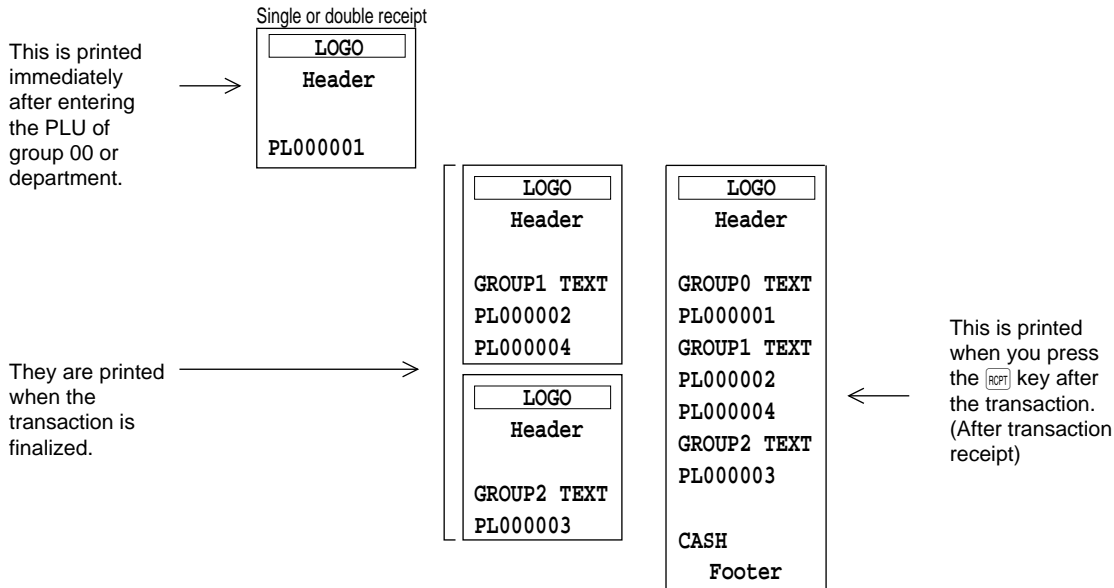

The print format differs depending on the programmed receipt type as follows:

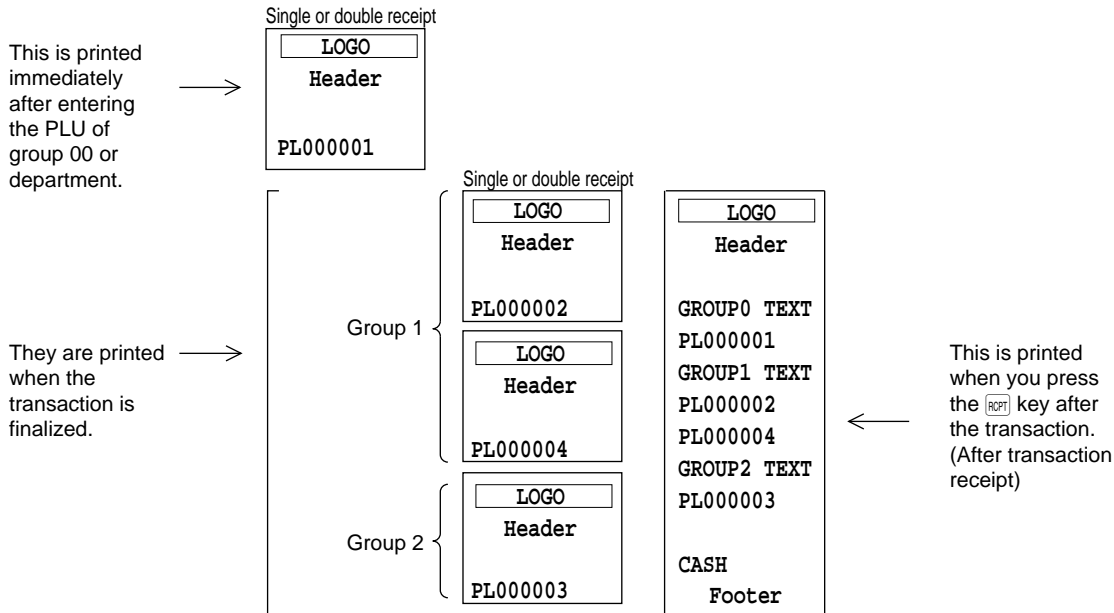

• Addition receipt type

• **Addition without payment receipt type**

• **Single/double + addition receipt type**

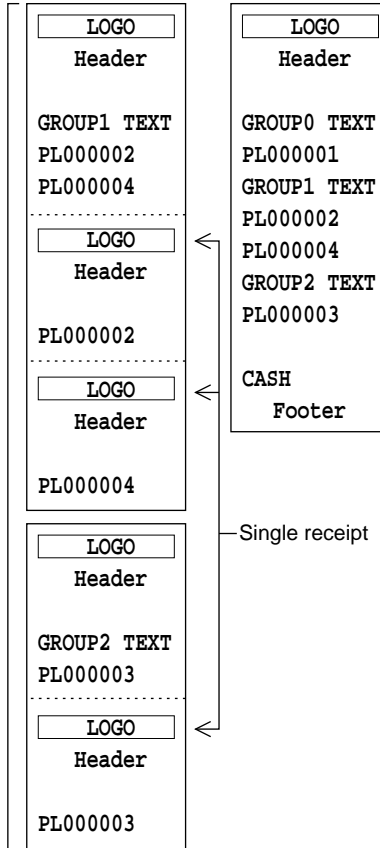

• Addition + single receipt type

This is printed immediately after entering the PLU of group 00 or department.

They are printed when the transaction is finalized.

This is printed when you press the RCPT key after the transaction. (After transaction receipt)

Receipt Shift

You can shift the printing mode of items for the receipt.

Any receipt type selected can be shifted as follows by pressing the  key before item entry.

NOTE

The receipt type cannot be changed to any other type by pressing the  key.

- Addition receipt type
 - Addition without payment receipt type
 - Single/double receipt type
 - Single/double + addition receipt type
- “Addition + single” receipt type cannot be shifted.
- } → Separated receipt mode
(one receipt is issued for each item.)

} → Addition receipt mode
(several items can be printed on one receipt.)

Cancellation of receipt shift

For the single/double receipt type:

The initial receipt type can be resumed by pressing the  key again.

For any receipt types other than the above:

The initial receipt type is automatically resumed after the transaction is finalized.

Example

When your POS terminal is programmed for addition receipt type:

Ordinary receipt mode

15/11/97	123456
#1134 12:46	JACK0001
PL000001	*5.80
PL000003	*1.40
CASH	*7.20

Separated receipt mode

15/11/97	123456
#1135 12:46	JACK0001
PL000001	*5.80

15/11/97	123456
#1136 12:46	JACK0001
PL000003	*1.40

5

Prior to Entries

REG MODE

OPXZ MODE

Preparations for Entries

1. Select the REG mode from the mode selection menu by pressing the **CANCEL** key.
2. Insure that all printers in your system have adequate paper rolls prior to beginning entries. For more information, please refer to the applicable printer's manual.

Error Warning

In the following examples, your POS terminal will go into an error state accompanied by a warning beep and the error message on the display. Clear the error state by pressing the **CL** key and take a proper action.

- When you exceed a 32-digit number (entry limit overflow):
Cancel the entry and reenter a correct number.
- When you make an error in key operation:
Clear the error and try the entry again.
- When you make an entry beyond a programmed amount entry limit:
Check to see if the entered amount is correct. If it is correct, it can be rung up in the MGR mode.
Contact your manager.
- When an including-tax subtotal exceeds eight digits:
Delete the subtotal by pressing the **CL** key and press a media key to finalize the transaction.

Sample Receipt

Clerk Assignment

Clerks can be assigned on four systems: real clerk key, clerk code entry, clerk entry key and WMF clerk key systems. Contact your authorized SHARP dealer for their selection.

Real clerk key system (factory-set)

If you select this system, clerks can be assigned by inserting corresponding real clerk keys. Any registration cannot be performed unless a real clerk key is inserted.

Clerk code entry system

If you select this system, clerks can be assigned by entering his or her clerk code in advance.

Procedure

* The pop-up window for entering a secret code will appear after pressing the key.

The sign-off operation can be performed by using the following procedure in the REG or MGR mode:

To sign off a clerk: →

Clerk entry key system

If you select this system, clerks can be assigned by pressing corresponding clerk keys on the keyboard.

WMF clerk key system

If you select this system, clerks can be assigned by inserting WMF clerk keys.

NOTE

If another clerk is signed on while a clerk is signed on, the latter will automatically be signed off.

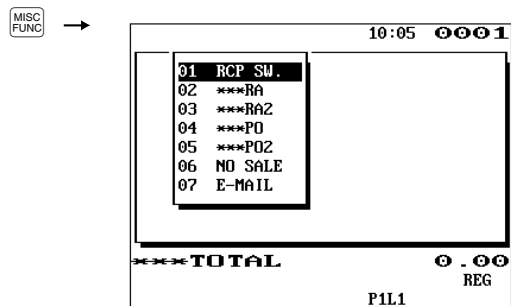

Item Selection from the Menu Window

Your POS terminal allows you to select functions from a menu window. For example, if you want to enter an item for check 1 sale, select the option "CHECK1" from the "CHECK" menu instead of pressing the key. Each menu can be opened as follows:

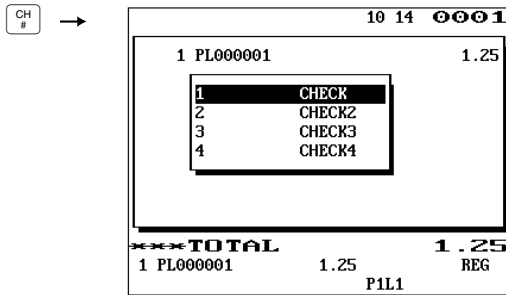

• PLU menu window

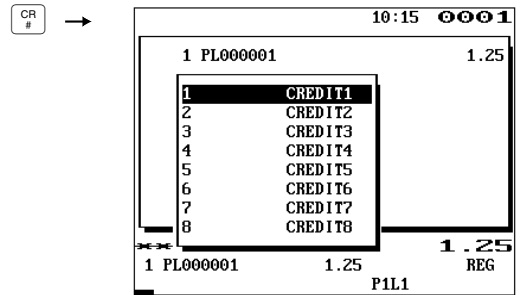

• Miscellaneous menu window

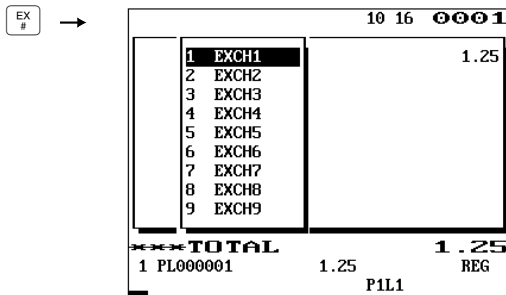

• Check menu window

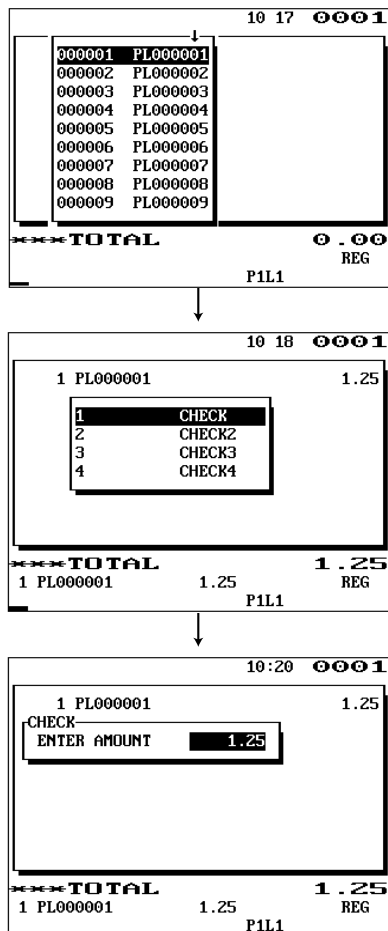

• Credit menu window

• Exchange menu window

Example

Selling a PLU code 1 item and finalize through check 1

1. Press the **PLU/SUB** key.
 - The PLU menu window will appear.

2. Select "PL000001."

3. Press the **CH #** key.
 - The CHECK menu window will appear.

4. Select "CHECK."

5. Enter the amount.

Starting Cash Memory Entry

If you enter the amount of the cash for the change due (starting cash) in the drawer before starting entry operations, you can discriminate that amount from the sales amount when reports are generated. Your POS terminal can be programmed to enforce the entry of starting cash into memory. For details, contact your authorized SHARP dealer.

Procedure

Select the OP X/Z mode and perform the following operation:

Select SCM(+) or SCM(-) → XXXXXXXX →
Amount
(max. 8 digits)

15/11/97	123456
#1106 12:04	JACK0001
***TOTAL	
	*0.00
SCM (+)	*55.50
SCM TTL	*55.50

6

Entries

REG MODE

Item Entries

Single item entries

Department entries

Enter a unit price and press a department key.

If you use a programmed unit price, press a department key only.

Procedure

When using a programmed unit price

*Less than a programmed upper limit amount

Example

Key operation

1200

Display

		10 28	0001
1	DPT.06		12.00
1	DPT.07		2.50
CASH			14.50
***TOTAL			14.50
CASH	14.50		REG
		P1L1	

NOTE

When those departments for which the unit price has been programmed as zero (0) are entered with the preset unit price, only the sales quantity is added.

PLU entries (direct PLU entries)

Follow this procedure:

Procedure

→ Direct PLU

Example

Key operation

NOTE

You can use the **REPEAT** key for repeat entries instead of the department key, **PLU/SUB** key, or direct PLU key.

■ Multiplication entries

Use this feature when you need to enter two or more the same items.

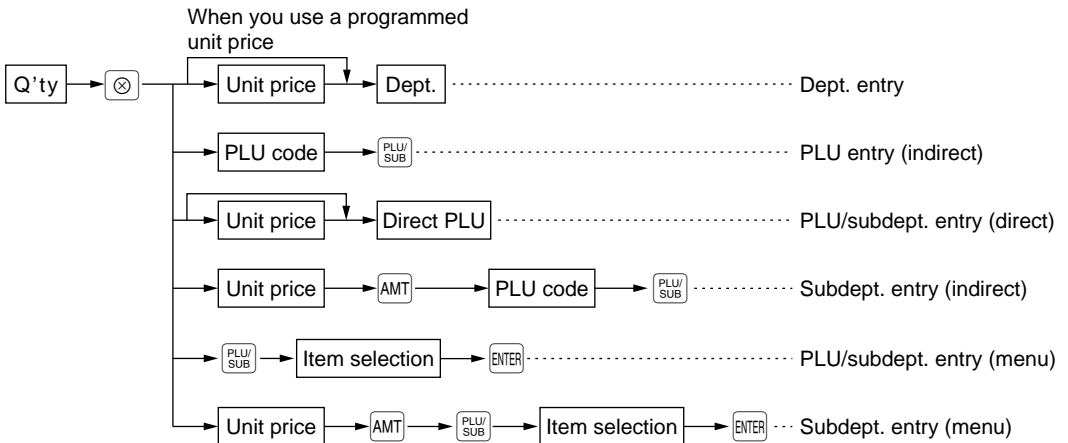

This feature helps you when you sell a large quantity of items or need to enter quantities that contain decimals.

Procedure

FF method (for speedy entries in the fast food restaurants)

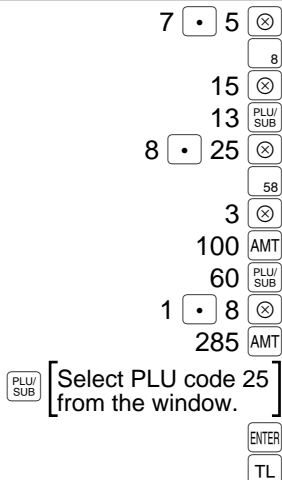

Normal method

- Q'ty: Up to four-digit integer + three-digit decimal
- Unit price: Less than a programmed upper limit
- Q'ty x unit price: Up to seven digits

Example

Key operation

Display

		11 42 0001

```

■ Single item cash sale (SICS)/single item finalize (SIF) entries

The operation is the same as that for normal department/PLU entries. The SICS and SIF functions can be available only when the receipt type is "addition receipt type."

SICS entries

- This function is useful when a sale is for only one item and is for cash; such as a pack of cigarettes. This function is applicable only to those departments that have been set for SICS or to their associated PLUs or subdepartments.
- The transaction is finalized and the drawer opens as soon as you press the department key,  key or the direct PLU key.

Example

Key operation

250
For finishing → 
the transaction

Display

		12 13	0001
1 DPT.09		2.50	
CASH		2.50	
***TOTAL		2.50	2.50
CASH	2.50		REG
		P1L1	

NOTE

If a ring-up to a department or PLU/subdepartment set for SICS follows the ones to departments or PLUs/subdepartments not set for SICS, it does not finalize and results in a normal sale.

SIF entries

- If a ring-up to a department or PLU/subdepartment set for SIF follows the ones to departments or PLUs/subdepartments not set for SIF, the transaction is finalized immediately as a cash sale.
- Like the SICS function, this function is available for single-item cash settlement.

Example

Key operation

1745 
1500
For finishing → 
the transaction

Display

		12 15	0001
1 DPT.08		17.45	
1 DPT.09		15.00	
CASH		32.45	
***TOTAL		32.45	32.45
CASH	32.45		REG
		P1L1	

Scale entries

You have a choice of either the manual or automatic method for scale entry.

If the first method is chosen, the clerk needs to enter the reading of the scale manually. If the second one is chosen, the weight is automatically read from the connected scale (option) and appears in the POS terminal display. If you need auto scale entries, contact your authorized SHARP dealer.

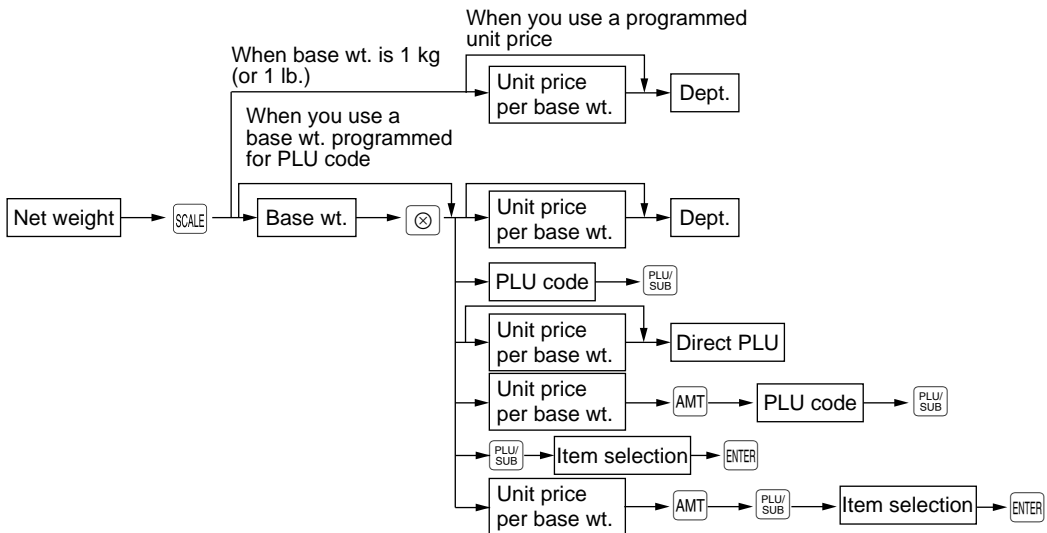

Manual scale entries

Procedure

FF method

Normal method

- Net weight: Up to 5 digits (integer + decimal)
- Base weight: Up to 2 digits (integer)

NOTE

The net weight is automatically calculated using the programmed tare weight.

Example

Key operation

3 SCALE 10
TL

Display

13:27 0001	
3kg x 7.15 /kg	21.45
PL000010	21.45
CASH	21.45
***TOTAL 21.45 21.45	
CASH	21.45 REG
P1L1	

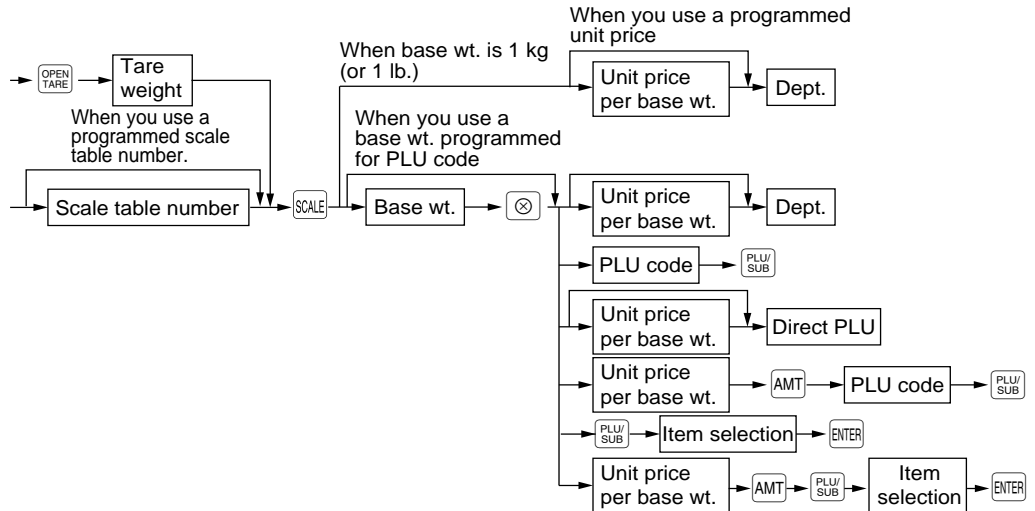

Auto scale entries

Procedure

FF method

Normal method

- Tare weight: Up to 4 digits (integer + decimal)
- Net weight: Up to 5 digits (integer + decimal)
- Base weight: Up to 2 digits (integer)
- Scale table number: 1 to 9

NOTE

- The POS terminal can be programmed with up to nine scale tables and allows different tares to be assigned to them.
- When the **SCALE** key is pressed, the net weight is automatically read from the connected scale (option) and appears in the POS terminal display.
- When the PLU is programmed for "Compulsory scale entry," it is not necessary to press the **SCALE** key.
- To issue a receipt which shows only a tare weight, press **OPEN TARE**, enter a tare weight, then press **SCALE** and **TL**.

Example

Key operation

Display

■ Non-turnover sales

This function is used to perform transaction other than ordinary sales (turnover) as is the case when cigarettes or bouquets are ordered in a restaurant and the like. In this case, a clerk once pays the bill and demands together with other payment.

It is performed by entering a department belonging to the non-turnover group or PLU belonging to the department. If you need this function, contact your authorized SHARP dealer.

Example

Key operation

2700
 Non-turnover sale → 200

Special Entries for PLUs

■ Promotion (normal selling) function

This function is convenient for matching several PLU items and selling them in a lump (e.g. value meal, etc.). Operation is the same as for normal PLUs. The promotion table consists of the discount amount, the trip level for discount (satisfying count of entered item), and the text for a table. One table can be assigned max. 5 kind of items. If the transaction that the promotion item is registered is finalized, the sales amount may be discounted as follows:

Promotion items of table no. 1: Item-A (*2.30), Item-B (*3.10), Item-C (*2.50)

Trip level for discount: 3

Discount amount: *1.00

<Sale 1>	
Item-A	*2.30
Item-B	*3.10
Item-C	*2.50
Subtotal	*7.90
Discount	-1.00
Total	*6.90

<Sale 2>	
Item-C	*2.50
Item-C	*2.50
Item-C	*2.50

Promotion discount

■ Promotion (set selling) function

This function is convenient for matching several PLU items and selling them in a lump (e.g. value meal etc.). Operation is the same as for normal PLUs. The promotion table consists of the text for a table, the discount amount, and the trip level for discount (satisfying count of entered item) for each PLU. One table can be assigned max. 5 kind of items. If the transaction is finalized under the following condition, the sales amount may be discounted as follows:

- The total quantity of the sales meet the trip level which is programmed in the promotion table.
- Items of the sales are programmed in the promotion table.

Promotion items of table no. 2: Item-A (*3.00), Item-B (*2.50), Item-C (*2.10)

Trip level for each item: Item-A (1), Item-B (1), Item-C (2)

Discount amount: *4.00

<Sale 1>	
Item-A	*3.00
Item-B	*2.50
Item-C	*2.10
Item-C	*2.10
Subtotal	*9.70
Discount	-4.00
Total	*5.70

<Sale 2>	
Item-A	*3.00
Item-A	*3.00
Item-B	*2.50
Item-C	*2.10
Subtotal	*10.60
Discount	-0.00
Total	*10.60

----- Discount is not allowed.
(Q'ty of the item-C should be two.)

Example

In the case of <Sale 1> above

Key operation

Treated as *3.00 item →

Treated as *2.50 item →

Treated as *2.10 item →

Treated as *2.10 item →

Display

15:12 0001	
1 PL000040	3.00
1 PL000041	2.50
2 PL000042	4.20
1 VALUE MEAL	-4.00
CASH	5.70
***TOTAL 5.70	
CASH	5.70
	REG
	P111

Promotion discount

■ Link PLU entries

Operation is the same as that for normal PLU entries. When a link PLU is entered, the linked PLU's amount is included and the linked PLU's label is printed automatically. Only the 1st-ranking PLU is affected by the VAT shift key. The percent calculation is in effect for the amount of the 1st-ranking PLU.

Example

Key operation

21
TL

Display

		13 21	0001
1	PL000021		3.50
1	PL000025		3.00
1	PL000026		2.00
1	PL000027		8.00
	CASH		16.50
***TOTAL			16.50
CASH		16.50	REG
		P1L1	

■ Set PLU entries

Operation is the same as that for normal PLU entries.

When a set PLU is entered, an entered or preset amount is printed as the unit price and then the labels of those PLUs linked to the set PLU are printed automatically.

Example

Key operation

20
TL

Display

		13 22	0001
1	PL000020		2.50
	PL000201		
	PL000202		
	CASH		2.50
***TOTAL			2.50
CASH		2.50	REG
		P1L1	

NOTE

The unit price of a set PLU (ex. PLU 20) refers to the entered amount of the set PLU. The reduction in the unit price of the set PLU, which is the total of the unit prices of its linked PLUs, is placed in the set PLU discount memory.

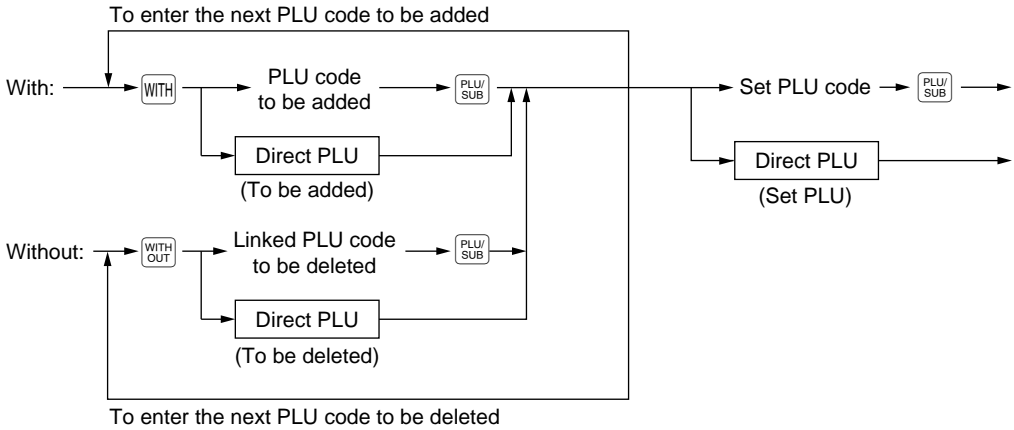

■ With/without entries

A maximum of 25 linked PLUs of the set PLU can be modified (added or deleted) temporarily by using **WITH** and **WITHOUT** keys.

With: To add a PLU to the set PLU.

Without: To delete a linked PLU from the set PLU.

Procedure

NOTE

The "with" and "without" operation is allowed a total of 25 times.

Example

Key operation

WITHOUT	16	PLU/SUB
WITH	17	PLU/SUB
	11	PLU/SUB
		TL

Display

====TOTAL		
CASH	20.00	20.00
		REG
		P11

■ PLU level shift (for direct PLUs)

This shift can double or triple the code of direct PLUs on your POS terminal without adding additional direct PLU keys. You can use direct PLUs in three levels by utilizing the PLU level shift keys **L1**, **L2**, and **L3**. These keys have the following functions:

L1: Shifts the PLU level from level 2 or 3 to level 1 (normal level).

L2: Shifts the PLU level from level 1 or 3 to level 2.

L3: Shifts the PLU level from level 1 or 2 to level 3.

You must program your POS terminal in the PGM mode to select one of the two PLU level shift modes — automatic return mode* and lock shift mode** — and decide whether to allow PLU level shift in both the REG and MGR modes or in the MGR mode alone.

* The automatic return mode automatically shifts the PLU level back to level 1 after pressing a direct PLU key or finalizing each transaction.

** The lock shift mode holds the current PLU level until depression of a PLU level shift key.

Automatic return mode

If you want to shift the PLU level in the automatic return mode, press a desired PLU level shift key before a numeric entry.

Procedure

(Returning every item entry)

(Returning every transaction)

NOTE

When you use the FF method, you need not press the **⊗** key on numeric entry.

Lock shift mode

If you want to shift the PLU level in the lock shift mode, press a desired PLU level shift key before a numeric entry.

Procedure

NOTE

- If you select the automatic return mode, it is not necessary to use the **L1** key on the keyboard, but if you select the lock shift mode, it is necessary to use the key.
- When you use the FF method, you need not press the **⊗** key on numeric entry.

Example

Level 1 : PLU code 1, PLU code 2

Level 2 : PLU code 81, PLU code 87

- When your CODE terminal has been programmed for the automatic return mode:

Key operation	Display

■ PLU price level shift

Three different price levels can be programmed for each PLU.
The price levels can be changed for PLU registrations.
These keys have the following functions:

-  Shifts the PLU price level from level 2 or 3 to level 1 (base level).
-  Shifts the PLU price level from level 1 or 3 to level 2. When you press this key, the price level shift indicator will turn to "P2."
-  Shifts the PLU price level from level 1 or 2 to level 3. When you press this key, the price level shift indicator will turn to "P3."

You must program a PLU price level shift mode (i.e. automatic return mode* or lock shift mode**) and the operating modes to be used for PLU price level shift (i.e. both REG and MGR modes or MGR mode alone).

* The automatic return mode automatically shifts the PLU price level back to level 1 after a PLU entry. You can select whether the PLU price level should return each time you enter one item or each time you finalize one transaction.

** The lock shift mode holds the current PLU price level until depression of a price level shift key.

Automatic return mode

If you want to shift the PLU price level in the automatic return mode, press a desired price level shift key before a numeric entry.

Procedure

(each item)

(each transaction)

NOTE

When you use the FF method, you need not press the  key on numeric entry.

Lock shift mode

If you want to shift the PLU price level in the lock shift mode, press a desired price level shift key before a numeric entry.

Procedure

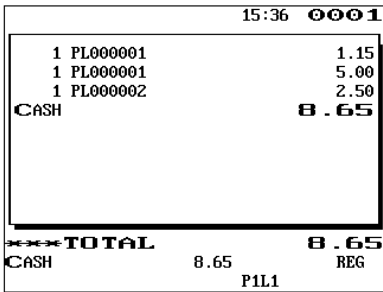

NOTE

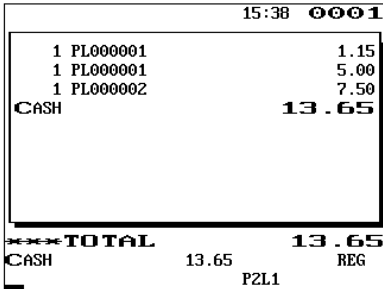

- If you select the automatic return mode, it is not necessary to use the  key on the keyboard, but if you select the lock shift mode, it is necessary to use the key.
- When you use the FF method, you need not press the  key on numeric entry.

Example

- When your POS terminal has been programmed for the automatic return mode:

Key operation	Display
	

- When your POS terminal has been programmed for the lock shift mode:

Key operation	Display
	

Condiment entries

When you enter a menu-item PLU, a prompting message such as “HOWCOOK?” and a list of the “Following PLUs” will appear. You must specify one of the “Following PLUs” such as “without mustard” to meet a special order of the guest. In an example of the condiment table shown below, it is assumed that condiment table no.1 is assigned to PLU code 21 (programmed text “STEAK”) and table no. 4 is assigned to table no. 1 as the next table no. When you enter PLU code 21, the message “HOWCOOK?” will appear to prompt you to specify one of “RARE,” “MED.RARE,” and “WELLDONE.” If the guest chooses “RARE,” select it from the list. Then the next message “POTATO?” will appear to prompt you to specify one of “P.CHIPS,” “MASHED.P,” and “BAKED.P.” If the guest chooses mashed potato, select it. Then press the key to end this entry.

Here is an example of how to perform a condiment entry when your condiment table is as shown below.

Table number	PLU codes for condiment entry (programmed text, price)				Next table no.
1	22 (HOWCOOK? 0.00)	23 (RARE 0.00)	25 (MED.RARE 0.00)	27 (WELLDONE 0.00)	4
4	31 (POTATO? 0.00)	33 (P. CHIPS 0.60)	37 (MASHED.P 0.60)	38 (BAKED.P 0.50)	_____

⏟
⏟

First PLU
Following PLUs

Example

Key operation

Display

HOWCOOK?		12:17	0001
01	RARE	10.00	
02	MED.RARE		
03	WELLDONE		
====TOTAL		10.00	10.00 REG
1	STEAK		P1L1

POTATO?		12:18	0001
01	P.CHIPS	10.00	
02	MASHED.P		
03	BAKED.P		
====TOTAL		0.00	10.00 REG
1	RARE		P1L1

		12:19	0001
1	STEAK	10.00	
1	RARE		
1	MASHED.P	0.60	
CASH		10.60	
====TOTAL		10.60	10.60 REG
CASH		10.60	P1L1

NOTE

- Your POS terminal will continue to operate for the condiment entry until you finish the entire condiment entry programmed for the PLU. During the condiment entry, if you enter a normal PLU, which is not in the condiment table, an error message will appear.
- No multiplication entry is possible for any condiment entries.
- No refund entry is possible for any condiment entries. When you perform a refund entry with a menu-item PLU, the "First PLU" and the "Following PLUs" assigned to the menu-item PLU are automatically registered as a refund entry.
- The indirect void is not possible for the menu-item PLU and condiment type PLU.
- You may omit the compulsory condiment entry by depressing the ST key. (Please contact your authorized SHARP dealer for details.)

■ Happy hour

If a time range is programmed for a price level, the price corresponding to the price level is automatically registered within the time range. When the entry time becomes to be out of the time range, the price level returns to the following levels:

Shift by price level shift key

The price level returns to the initial level.

Shift by clerk

The price level returns to the level which is programmed for an assigned clerk.

The following examples show that 9:00 AM and 11:00 AM are programmed for price level 2.

Example

- Between 9:00 AM and 11:00 AM

Key operation

1
TL

Display

```

10:45 0001
1 PL000001 3.00
CASH 3.00

***TOTAL 3.00
CASH 3.00 REG
P2L1
  
```

- Excepting the time range from 9:00 AM to 11:00 AM

Key operation

1
TL

Display

```

15:20 0001
1 PL000001 5.00
CASH 5.00

***TOTAL 5.00
CASH 5.00 REG
P1L1
  
```

■ Department shift

This shift can change the preset department to which a PLU belongs temporarily. When the **DEPT SHIFT1** through **DEPT SHIFT4** key is entered at the start of a transaction, the department codes to which all PLUs used in the transaction belong are changed to those which have been assigned to the **DEPT SHIFT1** through **DEPT SHIFT4** key used.

The following example shows that the PLU code 1 belongs to the department 1 and the **DEPT SHIFT2** key is programmed for the department 10.

Example

Key operation

DEPT SHIFT2
1

CASH	6.15	REG
PL1		

Display of Subtotals

Your POS terminal provides the following types of subtotals:

■ Subtotal

Press the **ST** key at any point during a transaction. The sales subtotal including tax will appear in the display.

■ Difference subtotal (Differ ST)

Press the **DIFFER ST** key at any point during a transaction. When you press it first, the subtotal of all entries which have been made is displayed and printed. If you press it second, you will get the subtotal of entries which have been made after you got the first subtotal. Taxes are calculated each time you press the **DIFFER ST** key, and taxes and taxable subtotals are displayed and printed on the receipt.

Example

Key operation

Display

The display shows a transaction summary with the following items and amounts:

Item	Amount
1 PL000001	1.00
1 PL000002	2.00
DIFF ST	3.00
1 PL000012	7.00
DIFF ST	7.00
CASH	10.00
***TOTAL	10.00
CASH	10.00
REG	

At the bottom right, the text 'P1L1' is displayed.

Finalization of Transaction

■ Cash or check tendering

Press the **[ST]** key to get an including-tax subtotal, enter the amount tendered by your customer, then press the **[TL]** or **[CA2]** key if it is a cash tender or press the **[CH1]** through **[CH4]** key if it is a check tender. When the amount tendered is greater than the amount of the sale, your POS terminal will show the change due amount and the symbol "CHANGE." Otherwise your POS terminal will show the symbol "DUE" and a deficit. Make a correct tender entry.

Example

Cash tendering

CHECK       10.15      REG
P1L1
    
```

■ Credit sale

Enter items and press the corresponding credit keys (CR1 through CR8).

Example

Key operation

6
7
CR1

Display

```

13 10 0001
1 PL000006      3.00
1 PL000007      6.00
CREDIT1          9.00

***TOTAL          9.00
CREDIT1          9.00    REG
P1L1
  
```

NOTE

- Amount tendering operations (i.e. change calculations) can be achieved by the CR1 through CR8 key when a PGM2-mode programming allows them.
- You can also enter a credit tender from the credit menu window. Press the CR# key and select a pertinent credit number and enter the amount.

■ Mixed-tender sale (cash or check tendering + credit tendering)

Example

Key operation

}
950 ST
TL
CR2

Display

```

15:13 0001
1 PL000001      3.00
1 PL000002      2.50
1 PL000003      6.00
CASH            9.50
CREDITZ        2.00

***TOTAL          11.50
CREDITZ          2.00    REG
P1L1
  
```

NOTE

Press the CH1 through CH4 keys or the CR1 through CR8 keys in place of the TL key when your customer makes payment by checks or by credit account.

Computation of VAT (Value Added Tax)/Tax

■ VAT/tax system

The POS terminal may be programmed for the following six tax systems by your authorized SHARP dealer.

Automatic VAT 1 through 6 system (Automatic operation method using programmed percentages)

This system, at settlement, calculates VAT for taxable 1, taxable 2, taxable 3, taxable 4, taxable 5, and taxable 6 subtotals by using the corresponding programmed percentages.

Automatic tax 1 through 6 system (Automatic operation method using programmed percentages)

This system, at settlement, calculates taxes for taxable 1, taxable 2, taxable 3, taxable 4, taxable 5, and taxable 6 subtotals by using the corresponding programmed percentages, and also adds the calculated taxes to those subtotals, respectively.

Manual VAT 1 through 6 system (Manual entry method using programmed percentages)

Procedure

→ →

This system provides the VAT calculation for taxable 1, taxable 2, taxable 3, taxable 4, taxable 5, and taxable 6 subtotals. This calculation is performed using the corresponding programmed percentages when the key is pressed just after the key.

Manual VAT 1 system (Manual entry method for subtotals that uses VAT 1 preset percentages)

Procedure

To use a programmed rate

→ → →

This system enables the VAT calculation for the then subtotal. This calculation is performed using the VAT 1 preset percentages when the key is pressed just after the key. For this system, the keyed-in tax rate can be used.

Manual tax 1 through 6 system (Manual entry method using programmed percentages)

Procedure

→ →

This system provides the tax calculation for taxable 1, taxable 2, taxable 3, taxable 4, taxable 5, and taxable 6 subtotals. This calculation is performed using the corresponding programmed percentages when the key is pressed just after the key. After this calculation, you must finalize the transaction.

Automatic VAT 1 through 3 and tax 4 through 6 system

This system enables the calculation in the combination with automatic VAT 1 through 3 and tax 4 through 6. This combination can be any of VAT 1 through 3 and tax 4 through 6. The tax amount is calculated automatically with the percentages previously programmed for these taxes.

NOTE

VAT/tax assignment is printed at the fixed right position of the amount on the receipt and bill as follows:

VAT1/tax1 —————> A
 VAT2/tax2 —————> B
 VAT3/tax3 —————> C
 VAT4/tax4 —————> D
 VAT5/tax5 —————> E
 VAT6/tax6 —————> F

When the multiple VAT/tax is assigned to a department or a PLU, a smaller number of the VAT/tax will be printed. For details, contact your authorized SHARP dealer.

Example**Key operation**

(When the manual
 VAT 1 through 6
 system is selected)

**Display****VAT shift entries**

This feature is intended to shift the tax status of a particular department (or PLU) programmed for taxable 1 or taxable 1 and taxable 3.

1. When the VAT shift entry is made for a particular department or PLU programmed for taxable 1, their tax status shifts to taxable 2.
2. When this entry is made for a particular department (or PLU) programmed for taxable 1 and taxable 3, the tax status "taxable 1" remains unchanged, but the other, "taxable 3" is ignored.

Procedure

Press the key to activate the VAT shift prior to entering department(s) or PLU(s) concerned.

Example**Key operation****Display**

Guest Check (GLU/PBLU)

Two different guest check entry systems are available: the guest lookup (GLU) and previous balance lookup (PBLU) systems. It depends on how your POS terminal has been programmed which of these is used. (Contact your authorized SHARP dealer for this selection.)

GLU system: If this system is selected, the balance due and the details of the order are placed in the guest check file. The information can be automatically stored by entering a guest check code (= a GLU code) when additional ordering occurs.

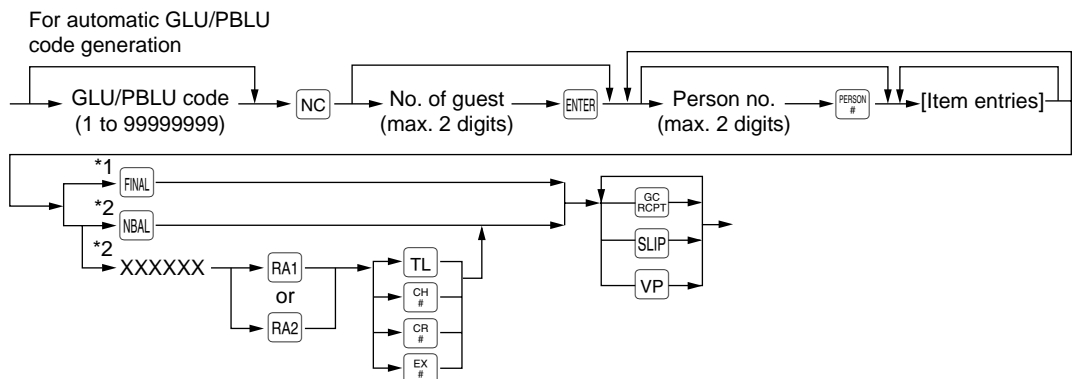

PBLU system: If this system is selected, the previous balance is stored in the previous balance lookup file (PB lookup file). The information can be automatically stored by entering a previous balance lookup code (= a PBLU code) when additional ordering occurs.

■ GLU/PBLU system

New guest

For a new guest, open a new guest check and assign a GLU/PBLU code.

Procedure

NOTE

- The GLU/PBLU code refers to a code that will be used whenever the guest check must be accessed for re-ordering or final payment.
- The person number is assigned to each person. When you make registration by each person, the person number has to be entered.
- Your POS terminal can be programmed GLU/PBLU codes in a sequential fashion. If your POS terminal has not been programmed to do so, each GLU/PBLU code can be entered manually.

*1 This is the optional function (Temporary finalization).

You can temporarily finalize a guest check by pressing the **FINAL** key. This prints out a guest check to show the current balance, including tax. The guest check, however, is still “open.” This means you can still make additional orders to it. The tax is calculated but is not added to the tax totalizer.

*2 The tax is not calculated.

Example

Key operation

1001
 No. of guests → 2

Display

```

```

■ Drive-through function

The GLU/PBLU function can be used as the drive-through function. This system looks up drive-through codes automatically (First In/First OUT).

New guest

For a new guest, open a new drive-through balance (the code is automatically generated).

Procedure

NOTE

The drive-through code refers to a code that will be used whenever the guest check must be accessed for re-ordering or final payment.

*1 The tax is not calculated.

*2 This is the optional function (Temporary finalization).

You can temporarily finalize a guest check by pressing the **FINAL** key. This prints out a guest check to show the current balance, including tax. The guest check, however, is still “open.” This means you can still make additional orders to it. The tax is calculated but is not added to the tax totalizer.

■ Intermediate GLU reading (only for GLU system)

This function is used for temporary inspection of the guest check. The details of the guest check can be printed on the receipt or the slip. For selecting these printers, contact your authorized SHARP dealer.

Procedure

NOTE

This function is available after finishing the guest check entry.

Example

Key operation

GLU
1001

■ Bill totalizing/bill transfer

Bill totalizing

The bill totalizing function is used to totalize multiple bills when, for example, a particular guest pays not only his or her bill, but also the bills of other guests.

Procedure

NOTE

- All #1 bills are added to a #2 bill. A maximum of 5 bills is available for #1.
- The GLU/PBLU code of #1 must be in use. If the guest check(s) of #1 or #2 has already been handled by another clerk, the guest check(s) must have been made "Transferring out."
- After the bill totalizing operation, the individual payment is not allowed.

Example

Key operation

1002

 1003
 1001

====TOTAL          82.00
***NBAL          82.00
REG
P1L1
  
```

Bill transfer

This function is used to change the GLU/PBLU code of a particular bill.

Procedure

NOTE

- This function requires that the current GLU/PBLU code be entered for #1 and a new GLU/PBLU code be entered for #2.
- A #1 bill is transferred to a #2 bill. The #1 bill is then cleared and set free.

Example

Key operation

■ Bill separating

This function is used when each guest of a group pays his or her own order. With this function, you can select some items from a guest check and make an entry for the payment. Also, you can transfer the items you have selected to other guest checks. This function is available only in the GLU system.

Procedure

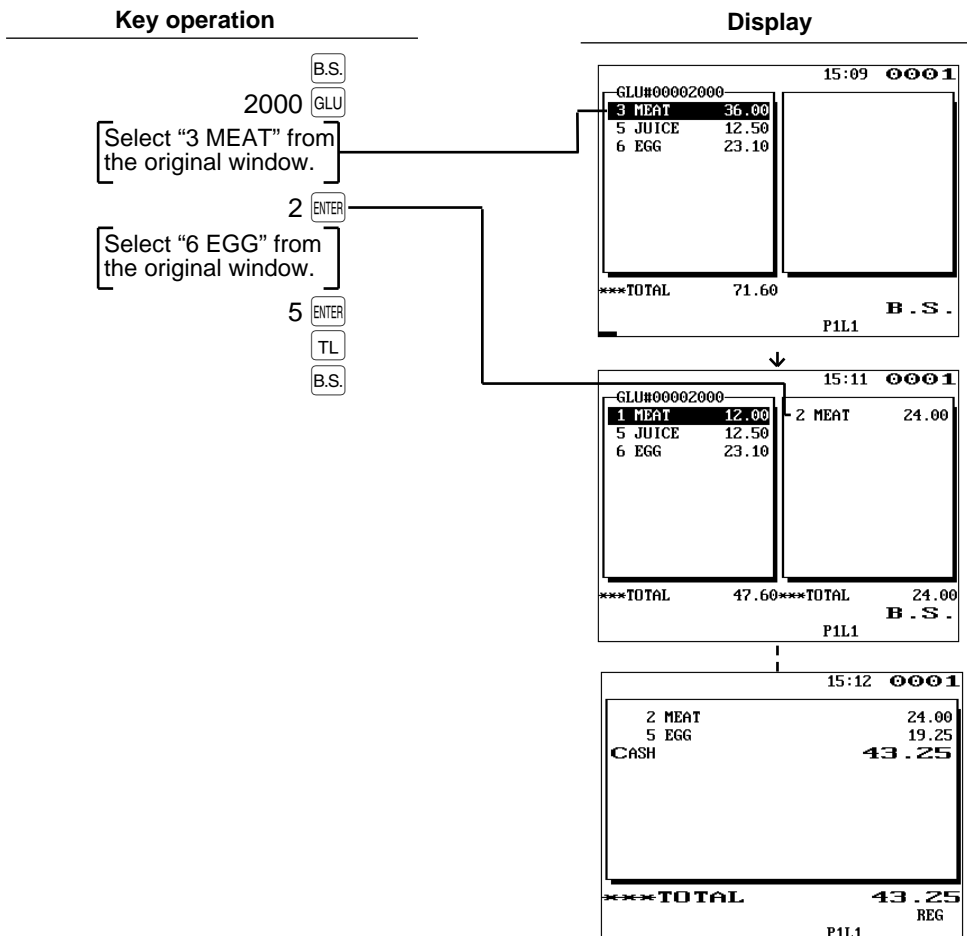

NOTE

- The items can be transferred from the destination (receiving) window to the original windows.
- The items which are refunded or discounted can not be separated.
- If a receiving GLU code is already in use, the error message "NOT FREE" will appear after entering the code.

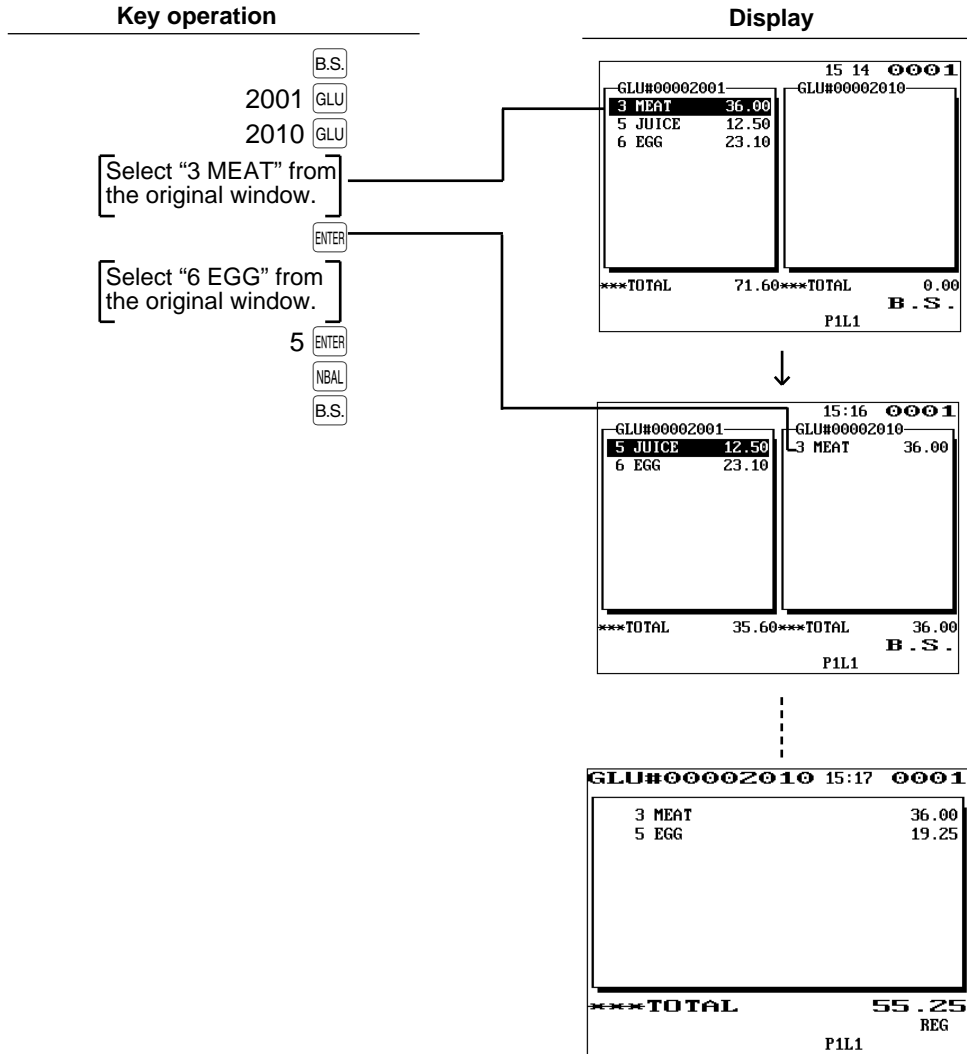

Example

In this example, it is assumed that you receive payment from a group for two "MEAT"s and five "EGG"s stored in a guest check (GLU code 2000).

Example

In this example, it is assumed that you transferred three "MEAT"s and five "EGG"s stored in a guest check (GLU code 2001) to a new guest check (GLU code 2010).

Auxiliary Entries

■ Percent calculations (premium or discount)

- Your POS terminal provides percent calculations for a subtotal or each item entry. You need to specify in advance for which of a subtotal and each item entry your POS terminal should perform a percent calculation.
- For percent calculations (premium, discount, subtotal or individual), you may use the [%1] through [%9] key.
- Percentage: 0.01 to 100.00%

Percent calculation for a subtotal

Example

Key operation

(When a discount of 10% is programmed for the [%1] key.)

Payment Treatment

■ Tip-in entries

Your POS terminal allows the entry of tips that your guests give to clerks in cash or other media (check or credit). The tip in entry assumes that it is carried out in the following system:

- Tip paid by a guest to a clerk is entered in the POS terminal by tip entry, and the restaurant pays the tip amount to the clerk later in cash.
- Tip amount entry to the POS terminal is normally performed by a clerk.

The entry is allowed before payment operation is performed. After the tip entry is performed, item entry is not allowed. The transaction operation must be finalized by payment operation. Two types of tip, cash tip and non-cash tip, are not allowed to be mixed in entry during one transaction operation. Tip entry only in either of them is allowed.

Cash tip entry: In a transaction in which cash tip entry is made, when payment operation is started, the process is as follows:

Cash tender (which may be foreign money) is compulsory until total cash tender exceeds or equals to cash tip amount. Then, check (or credit) tender operation is allowed.

Non-cash tip entry: In a transaction in which non-cash tip entry is made, when payment operation is started, the process is as follows:

Check (or credit) tender is compulsory until total check (or credit) tender exceeds or equals to non-cash tip amount. Then, cash tender operation is allowed.

Procedure

■ Currency exchange

Your POS terminal allows payment entries in foreign currency. Pressing the **EX1** through **EX9** key creates a subtotal in foreign currency. Cash alone can be handled after currency exchange.

Procedure

*Preset rate: 0.0000 to 9999.9999

NOTE

- When the amount tendered is short, its equivalent in deficit is shown in domestic currency.
- You can also enter a foreign currency tender from the exchange menu window. Press the **EX#** key and select a pertinent exchange number and enter the amount.
- Change amount will be displayed in domestic currency.

Example

Preset rate : 0.6068

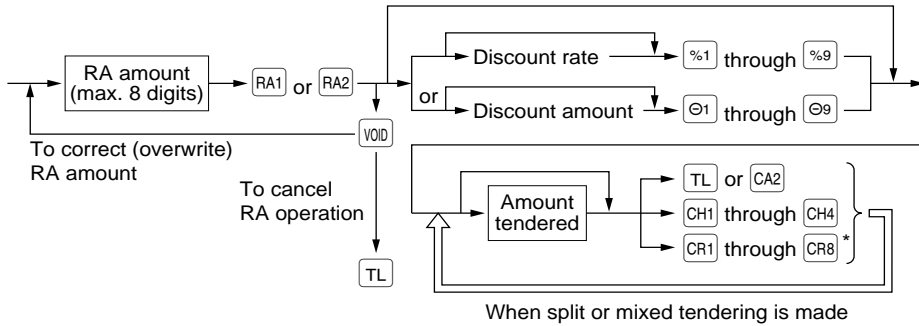

Currency exchange key used : EX1

Employee Function

You can use the following functions by using employee codes:

■ Clerk/manager sign-on

Clerks or managers can be signed on by entering employee codes, or they can be signed on by using employee cards. To use an employee card, you need a magnetic card reader (MCR). Contact your authorized SHARP dealer.

Use the following procedures:

• Clerk sign-on

NOTE

In the case of "real clerk key system," sign-on cannot be done by this procedure. ("Clerk sign-on/off" is only done by the "real clerk key system.")

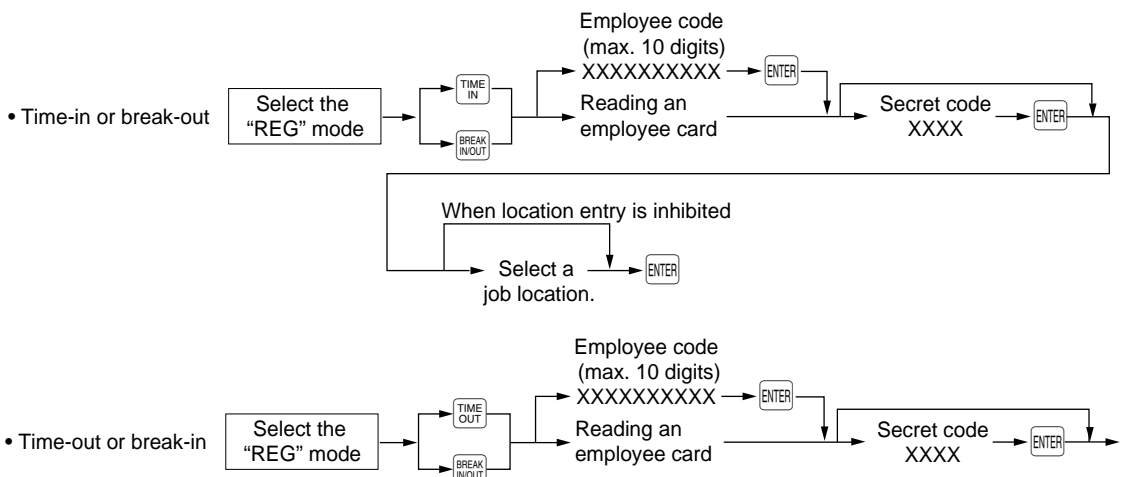

• Manager sign-on

■ Employee's working time recording

You can manage the number of hours for which employees work. The working time can be recorded by the following operations:

Time-in/out and break-in/out operations

• Time-out or break-in

NOTE

- You can select a job location by using the key.
- The POS terminal allows a clerk to sign-on or off without checking the clerk's time-in or out.

Example

Key operation

Time-edit operation

A manager can edit employee's time-in/out data to record his or her time correctly.

TRAINING Mode

The training mode is used when the operator or the manager practices POS terminal operations.

When a clerk set in training is selected, the POS terminal automatically enters the training mode. When a clerk not set in training is selected, the POS terminal automatically enters the ordinary REG mode. A training text and a maximum of two training clerks can be programmed. For programming of training clerk, contact your authorized SHARP dealer.

The training operations are valid in all modes.

A mark which is identifying a training receipt is printed on the receipt which is issued in the training mode.

The journal report completely stops in the training mode. The consecutive number is not updated. The preceding number is repeated in printing.

The memory in clerk is updated in the training mode. Other memories are not updated.

The GLU codes which are opened in the training mode are also printed on the GLU report. In this case, those GLU codes are distinguished from others by the character of "T." The data of training GLU codes are not added to the total.

The reading and resetting of training clerks is printed on the clerk reports. However, the sales total of training clerks is not included in the clerk total on the full clerk report.

Supervisor Clerk

This function is used to substitute a supervisor clerk for an ordinary clerk. The supervisor clerk can make entry as an ordinary clerk by assigning the ordinary clerk code. You can use the supervisor clerk function only for substituting for an ordinary clerk. This function is available only in the real clerk key system.

To use this function, insert a clerk key assigned supervisor, enter the ordinary clerk code and press the  key. When you insert a supervisor clerk key and open an existing guest check, the original clerk who usually controls the guest check will automatically be assigned.

NOTE

This function is unavailable when the "overlapped clerk function" is enabled.

Procedure

Example

- When opening a new guest check (GLU code 1010) with this function:

Key operation	Display
Inserting a supervisor clerk key 11  1010   	<pre> GLU#00001010 13:11 0011 1 PL000001 1.00 ***TOTAL 1.00 1.00 ***NBAL 1.00 REG P1L1 </pre>

- When receiving payment for the order stored in the GLU code 1010:

Key operation	Display
Inserting a supervisor clerk key 1010  100 	<pre> GLU#00001010 13:12 0011 1 PL000001 1.00 CASH 1.00 CHANGE 0.00 ***TOTAL 0.00 1.00 CHANGE REG P1L1 </pre>

Overlapped Clerk Entry

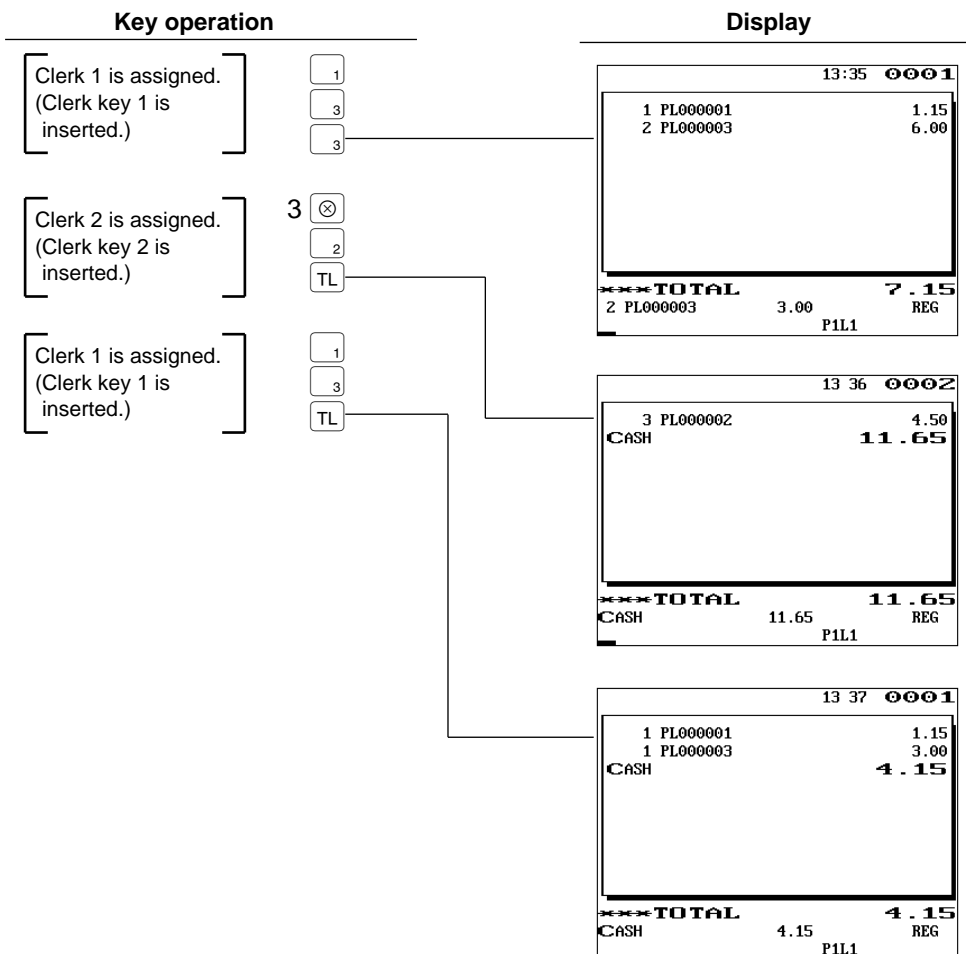

This function allows to switch from one clerk to another clerk and to interrupt the first clerk's entry. So the second clerk can do his or her entry in this mode. Interrupt handling is possible only in the overlapped clerk entry. For actual use of this function, contact your authorized SHARP dealer.

NOTE

- The overlapped clerk entry is not effective while the tendering sale is going on.
- If any clerk is still making an entry (or has not finalized the transaction yet), the POS terminal does not run in any mode other than REG and MGR, and no X/Z reports can be printed. The message "CLERK REMAINED" is displayed at this time.

Example

- Clerk 1: Entry started
 Clerk 2: Clerk change (1 to 2), interrupt initiated
 Clerk 2: Transaction finished
 Clerk 1: Clerk change (2 to 1), entry restarted

7

Correction

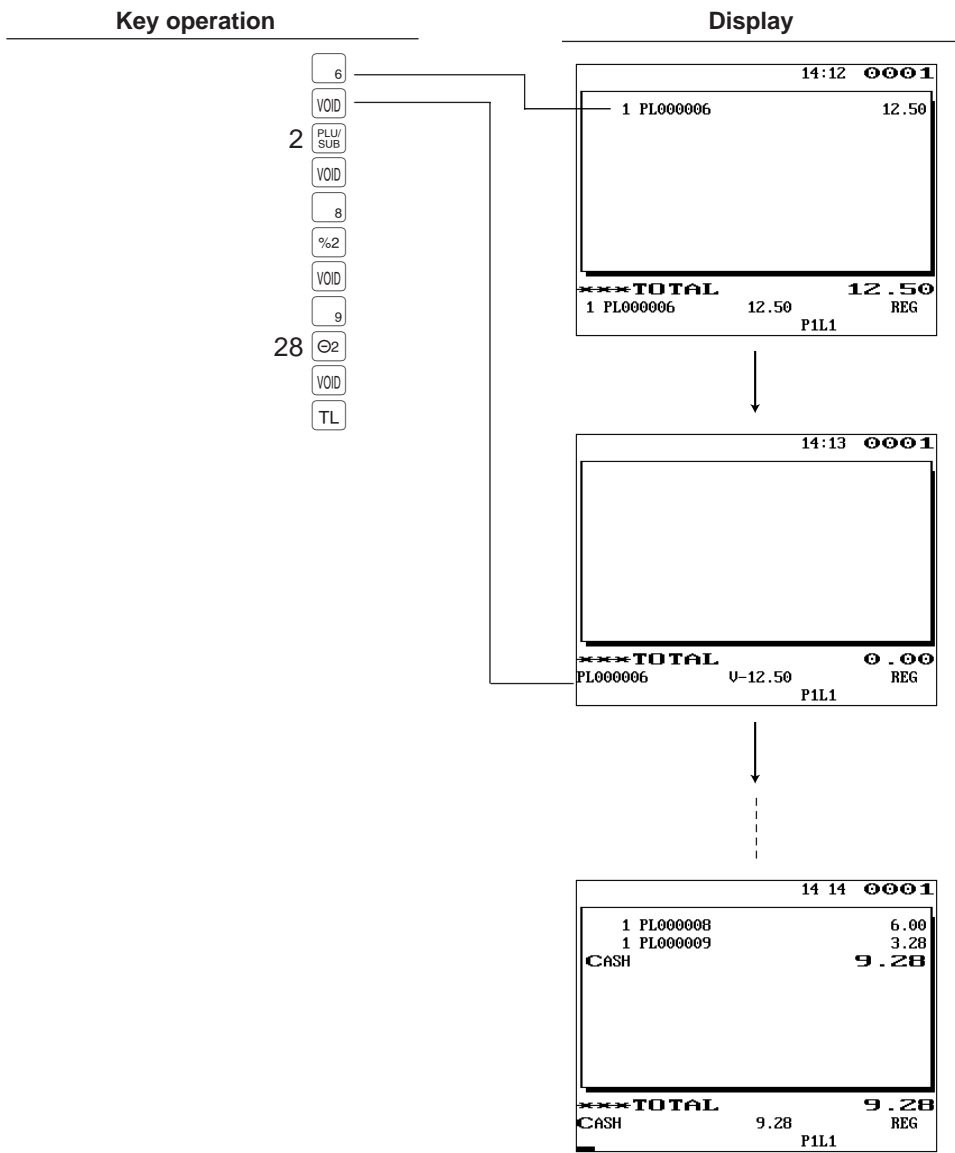

REG MODE

MGR MODE

Correction of the Last Entry (Direct Void)

If you make an incorrect entry relating to a department, PLU/subdepartment, percentage (%1 through %9), discount (⊖1 through ⊖9), item refund, or tip, you can void this entry by pressing the VOID key immediately.

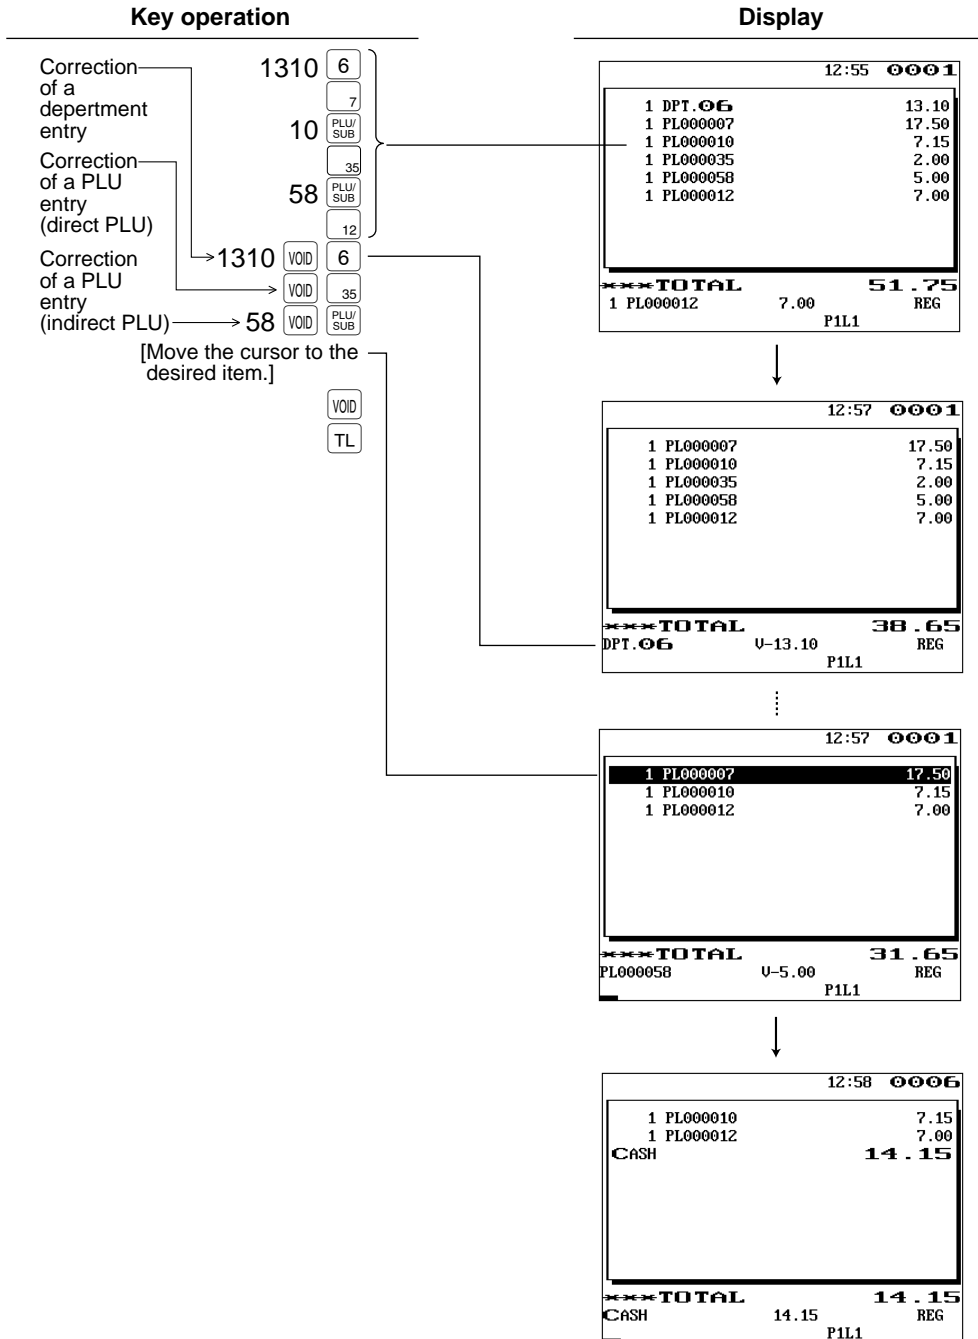

Example

Correction of the Next-to-Last or Earlier Entries (Indirect Void)

With the **VOID** key you can void any incorrect plus department, plus PLU/subdepartment, or item refund entry made during a transaction if you find it before finalizing the transaction (e.g. before pressing the **TL** key). This function is applicable to plus department, PLU/subdepartment, and item refund entries only.

Example

Subtotal Void

You can void an entire transaction. Once subtotal void is executed, the transaction is aborted and the POS terminal issues a receipt.

Example

Key operation

Correction of Incorrect Entries Not Handled by the Direct, Indirect or Subtotal Void Function

Any errors found after the entry of a transaction has been completed or during an amount tendered entry cannot be voided. These errors must be handled by the manager.

The following steps should be taken.

1. If you are making an amount tendered entry, finalize the transaction.
2. Hand the incorrect receipt to your manager for its cancellation.

Copy Receipt Printing

If your customer wants a receipt after you have finalized a transaction with the receipt ON-OFF function in the "OFF" status (no receipting), press the **RCPT** key for receipting. Your POS terminal can also print a copy receipt when the receipt ON-OFF function is in the "ON" status.

NOTE

To toggle the receipt ON-OFF status, use one of the following procedures:

- Select "01 RCP S. W." from the window which is opened by pressing the **MISC FUNC** key.
- Press the **RCP SW** key to open the "RCP SW." window.

Example

Printing a receipt after making the entries shown below with the receipt ON-OFF function "OFF" status

Guest Check Copy

You can use this function when you want to take a copy of guest check. Press the  key and make a desired entry.

Procedure

NOTE

- The guest check copy has nothing to do with the memory.
- The operation is the same as normal entry. But the validation printing is disabled and the drawer does not open.

Example

Key operation

Print

15/11/97	123456
#1090 11:29	JACK0001
G.C COPY

Validation Printing Function

The POS terminal can perform validation printing when it is connected with the slip printer. For the details of slip printer, contact your authorized SHARP dealer.

Validation printing

1. Set a validation slip to the slip printer.
2. Press the  key. The validation printing will start.

NOTE

Programmed compulsory validation printing can be overridden by performing the following operation. If you need this function, contact your authorized SHARP dealer.

1. Enter the manager code and press the  key, then enter the secret code if applicable.

2. →  → 

9

Manager Mode

MGR MODE

The manager mode is used when managerial decisions must be made concerning POS terminal entries, for example, for overriding limitations and for other various non-programming managerial tasks.

NOTE

Normal POS terminal operations may also be performed in this mode.

Entering the Manager Mode

To enter the manager mode, select the REG mode from the mode selection menu, then use the following procedure:

Procedure

The manager code is stored in the manager file in advance. If the code entered is not found in this file, an error occurs. If the code is correct, it is printed on the journal and the POS terminal enters the manager mode.

Override Entries

Programmed limits (such as maximum amounts) for functions can be overridden by placing the POS terminal in the manager mode.

Example

This example presumes that the POS terminal has been programmed not to allow coupon entries over 2.00.

Key operation	
REG-mode entries	250 [2] [02]Error [CL]
To enter the manager mode	1 [MGR #] [ENTER] 1245 [ENTER] 250 [02]
Return to the REG mode.	[TL]

Tip Paid Entries

This operation is used when tips that guests have paid by using media other than cash (check or credit) are paid to respective clerks in cash.

You can make tip paid entries in the MGR mode only. The tips are paid to corresponding clerks according to their portions.

Procedure

Example

Key operation

(The clerk key is inserted.)

Correction after Finalizing a Transaction

MGR MODE

When you need to void incorrect entries that clerks cannot correct (incorrect entries that are found after finalizing a transaction or cannot be corrected by direct, indirect or subtotal void), follow this procedure in the MGR mode.

1. Enter the manager code and press the  key, then enter the secret code if applicable.
2. Press the  key to put your POS terminal in the VOID mode. (Note the indication on the display.)
3. Repeat the entries that are recorded on an incorrect receipt. (All data in the incorrect receipt is removed from POS terminal memory; the voided amounts are added to the void mode totalizer.)

Incorrect receipt		Cancellation receipt	
15/11/97	123456	15/11/97	123456
#1079 11:07	JACK0001	#1080 11:08	JACK0001

Reading (X) and Resetting (Z) of Sales Totals

X1 / Z1	MODE
---------	------

X2 / Z2	MODE
---------	------

OPXZ	MODE
------	------

- Use the reading function (X) when you need to take the reading of sales information entered after the last resetting. You can take this reading any number of times. It does not affect the POS terminal's memory.
- Use the resetting function (Z) when you need to clear the POS terminal's memory. Resetting prints all sales information and clears the entire memory except for the GT1 through GT3, reset count, and consecutive number.
- X1 and Z1 reports show daily sales information. You can take these reports in the X1/Z1 mode.
- X2 and Z2 reports show periodic (monthly) consolidation information. You can take these reports in the X2/Z2 mode.
- If your POS terminal is set "X1/Z1 report in the X2/Z2 mode" is "ENABLE," you can select the X1/Z1 report from the X2/Z2 mode. For details, contact your authorized SHARP dealer.

■ How to take a X1/Z1 or X2/Z2 report

[To take a X1 or X2 report:]

By selecting an item from the menu

1. Select "1 READING" in the X1/Z1 or X2/Z2 mode menu window to display the items list.
2. Select an item listed in the table shown later.
3. If needed, enter corresponding values described in the "Data to be entered" column on the table shown later.
4. Select a device ("DISPLAY" or "REPORT PRINTER") to receive the output.

By entering a job code

1. Enter a job code listed in the table shown later and press the key in the X1/Z1 or X2/Z2 mode menu window.
 XXX →
2. If needed, enter corresponding values described in the "Data to be entered" column on the table shown later.
3. Select a device ("DISPLAY" or "REPORT PRINTER") to receive the output.

[To take a Z1 or Z2 report:]

By selecting an item from the menu

1. Select "2 RESETTING" in the X1/Z1 or X2/Z2 mode menu window to display the items list.
2. Select an item listed in the table shown later.
3. If needed, enter corresponding values described in the "Data to be entered" column on the table shown later.
4. Select a device ("DISPLAY" or "REPORT PRINTER") to receive the output.
5. After the report has been taken, the message "ARE YOU SURE ?" will appear. Select one of the following actions:
 - Select "YES" to reset the sales information.
 - Select "NO" to save the sales information.

By entering a job code

1. Enter a job code listed in the table shown later and press the and keys in the X1/Z1 or X2/Z2 mode menu window.

XXX → →

2. If needed, enter corresponding values described in the "Data to be entered" column on the table shown later.
3. Select a device ("DISPLAY" or "REPORT PRINTER") to receive the output.
4. After the report has been taken, the message "ARE YOU SURE ?" will appear.
Select one of the following actions:
 - Select "YES" to reset the sales information.
 - Select "NO" to save the sales information.

X2/Z2 stacked report

You can print multiple X2/Z2 reports in sequence under a single transaction. In this case you need to program in advance which X2/Z2 reports should be printed. Refer to "Stacked report" under Section "Report Programming" in Chapter 13 "Programming."

Compulsory Cash/Check Declaration

If your POS terminal has been programmed for compulsory cash/check declaration, you must declare cash/check in drawer in advance according to the type of the declaration when you take clerk Z reports.

Use the procedure shown in "Key operation" below for this declaration.

Types of compulsory cash/check declaration

- Compulsive when individual clerk resetting is taken
- Compulsive when full clerk resetting is taken

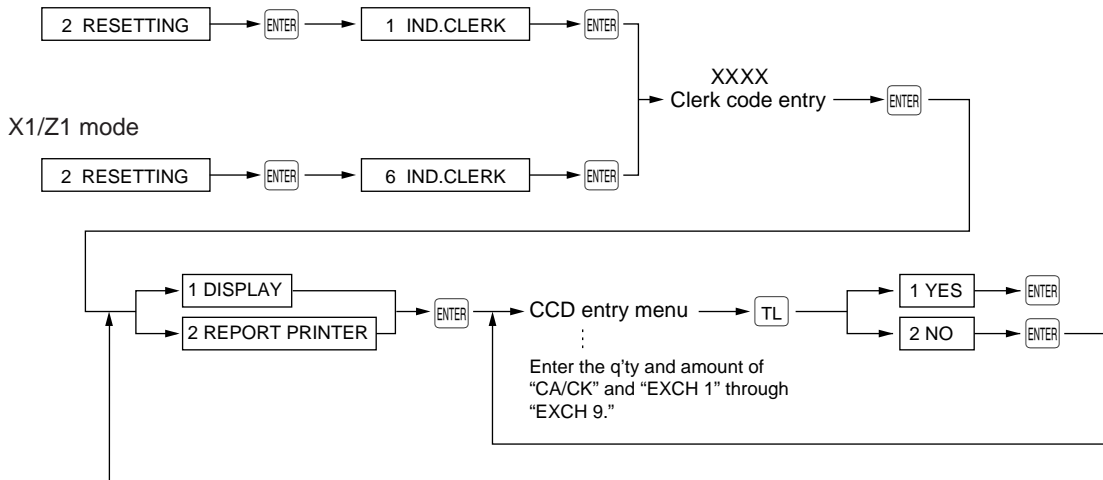

NOTE

Compulsory cash/check declaration is available in the above two types. You can choose either of these. Contact your authorized SHARP dealer for details.

 : The shaded area contains the character keys which are used for programming characters.

 Used for programming characters. For more information about programming characters, see the section “How to Enter Alphanumeric Characters.”

 Used to move the cursor.

 : Used to program each setting.

 : Used to finalize programming.

 : Used to cancel programming and to get back to the previous screen.

 : Used for changing the operating mode.

 : Used to go back to the previous record, e.g., from the department 2 programming window back to the department 1 programming window.

 : Used to go to the next record, for example, in order to program unit prices for sequential departments.

 : Used to scroll the window to go to the next page.

 : Used to scroll the window to go back to the previous page.

 : Used to clear the last setting you have programmed or clear the error state.

 : Used to toggle between two or more options.

 : Used to list those options which you can toggle by the  key.

 : Used to call up a desired code.

Numeric keys: Used for entering figures.

For more information about using these keys, see “Basic Instructions” section in Chapter 13 “Programming.”

How to Program Alphanumeric Characters

This section discusses how to program alphanumeric characters such as “DESCRIPTION,” “NAME” and “TEXT.”

■ Using character keys on the keyboard

Entering alphanumeric characters

To enter a character, simply press a corresponding character key on the programming keyboard sheet.

To enter a digit, simply press a corresponding numeric key.

Entering double-size characters

 : This key toggles the double-size character mode and the normal-size character mode. The default is the normal-size character mode. When the double-size character mode is selected, the letter “W” appears at the bottom of the display.

Entering upper-case letters

 : You can enter an upper-case letter by using this key. Press this key just before you enter the upper-case letter. You should press this key each time you enter an upper-case letter.

Editing text

You can edit the text you have entered by deleting and/or inserting characters.

To select a text editing mode

 : Toggles between the insert mode (“_”) and the overwrite (“■”) mode.

To move the cursor

 or  : Moves the cursor.

To delete a character or figure

 : Deletes a character or figure in the cursor position.

 : Backs up the cursor for deleting the character or figure at the left of the cursor. When your POS terminal is in the insert mode, this key deletes the character or the value at the cursor position.

■ Entering character codes

Numerals, letters and symbols are programmable by entering the **00** key and character codes. Use the following procedure with the cursor placed at the position where you want to enter characters:

00 → XXX XXX : character code (3 digits)

Character code:

032 - 047	032	033	034	035	036	037	038	039	040	041	042	043	044	045	046	047
		!	"	#	\$	%	&	'	()	*	+	,	-	.	/

Programming

PGM1 MODE

PGM2 MODE

AUTO KEY MODE

This chapter explains how to program various items.

Before you start programming, select the PGM1 or PGM2 mode from the mode selection window depending on the item you are going to program.

Basic Instructions

This section illustrates the basic programming by using an example of programming for departments.

Procedure

PGM2 MODE 10:25 0001

Programming example

The following example shows how to program 2.00 for the unit price, "ABCDE" for the description, and "taxable 2 yes" for department 1.

1. In the PGM2 MODE window, select "2 SETTING" by using the or key and press the key.
 - The SETTING window will appear.

NOTE

- You can also select "2 SETTING" by using numeric key "2," then press the key.
- If you return to the previous screen, press the key.

2. Select "1 ARTICLE."

- The ARTICLE window will appear.

NOTE

The arrow mark in the upper-right corner of the window shows that the window contains more options than are now on the screen. To scroll the window, press the key.

To return to the previous page, press the key.

3. Select "1 DEPT."

- The DEPT window will appear, listing programmable departments.

M2

- Select "01" to program for department 1.
 - The "01" window will appear.

- On the first page of the "01" window, program the unit price and description as follows:

NOTE

There are three entry patterns for the programming: the numeric entry, character entry, and selective entry.

- Move the cursor to "PRICE," enter "200" by using numeric keys, then press the **ENTER** key. → **Numeric entry**
- Move the cursor to "DESCRIPTION," enter "ABCDE" by using character keys, then press the **ENTER** key. → **Character entry**

If you want to clear setting, press the **CL** key before you press the **ENTER** key.

- Press the **(PAGE DOWN)** key to go to the next page of the "01" window, then program the machine to set "taxable 2" as follows:
 - Move the cursor to "TAXABLE 2," press the **□** key to select "YES," then press the **ENTER** key. → **Selective entry**

NOTE

*The **□** key toggles between two options as follows: NO→YES→NO→....*

*Pressing the **ST** key displays all pertinent options.*

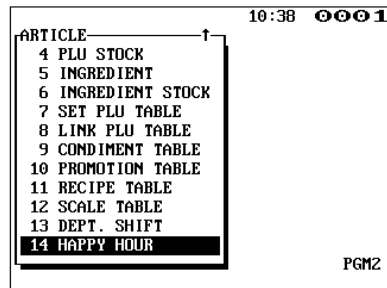

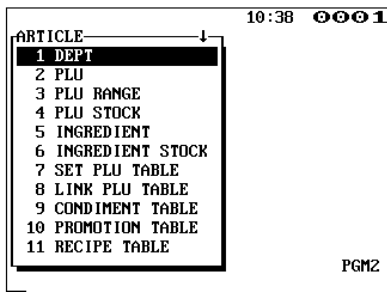

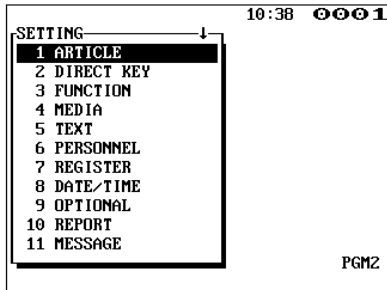

- Select one of the following actions:
 - To cancel the programming, press the **CANCEL** key. Select "1 YES" in the "ARE YOU SURE ?" window.
 - To finalize the programming, press the **TL** key, then press the **CANCEL** key. You will return to the "DEPT" window.
 - To program for the following department, press the **(NEXT RECORD)** key. The "02" window will appear. To return to the "01" window, press the **(PREV RECORD)** key.

The following sections describe how to program each item which is contained in a programming group.

Article Programming

Use the following procedure to select any option included in the article programming group:

Procedure

- 1 In the SETTING window, select "1 ARTICLE."
 - The ARTICLE window will appear.

2. Select any option from the following options list:

1	DEPT:	Departments
2	PLU:	PLUs
3	PLU RANGE:	A range of PLUs
4	PLU STOCK:	PLU stock quantity
5	INGREDIENT:	Ingredients of PLUs
6	INGREDIENT STOCK:	Ingredient stock quantity
7	SET PLU TABLE:	Set PLU table
8	LINK PLU TABLE:	Link PLU table
9	CONDIMENT TABLE:	Condiment table
10	PROMOTION TABLE:	Promotion table
11	RECIPE TABLE:	Recipe table
12	SCALE TABLE:	Scale table
13	DEPT. SHIFT:	Department shift
14	HAPPY HOUR:	Happy hour

The following illustration shows those options included in the article programming group.

1 ARTICLE	1 DEPT	➔ See "Department" on page 128.
	2 PLU	➔ See "PLU" on page 130.
	3 PLU RANGE	➔ See "PLU range" on page 133.
	4 PLU STOCK	➔ See "PLU stock" on page 134.
	5 INGREDIENT	➔ See "Ingredient" on page 135.
	6 INGREDIENT STOCK	➔ See "Ingredient stock" on page 136.
	7 SET PLU TABLE	➔ See "Set PLU table" on page 137.
	8 LINK PLU TABLE	➔ See "Link PLU table" on page 138.
	9 CONDIMENT TABLE	➔ See "Condiment table" on page 139.
	10 PROMOTION TABLE	➔ See "Promotion table" on page 140.
	11 RECIPE TABLE	➔ See "Recipe table" on page 142.
	12 SCALE TABLE	➔ See "Scale table" on page 143.
	13 DEPT. SHIFT	➔ See "Department shift" on page 144.
	14 HAPPY HOUR	➔ See "Happy hour" on page 144.

■ Department

Your POS terminal is equipped with 10 standard departments.
Use the following procedure to program for departments.

Procedure

Select a pertinent dept. code from the departments list.

10:40 0001

01	PRICE	0.00
	GROUP No.	01
	DESCRIPTION	DPT. 01
	ITEM UP	NON-COMPULSORY
	TARE TABLE No.	0
	SCALE	INHIBIT
	SIF/SICS/NORMAL	NORMAL
	RECEIPT TYPE	SINGLE
	AMT. ENTRY TYPE	OPEN
	TAXABLE 1	NO
	TAXABLE 2	NO

MZ

The screen continues.

10:41 0001

01	TAXABLE 1	NO
	TAXABLE 2	NO
	TAXABLE 3	NO
	TAXABLE 4	NO
	TAXABLE 5	NO
	TAXABLE 6	NO
	HALD	18
	COMMIS. Gr. No.	0
	OUTPUT KP No.1	0
	OUTPUT KP No.2	0
	RECEIPT PRINT	YES

MZ

Program each item as follows:

NOTE

For more information about the entry patterns, see the "Basic Instructions" section.

• PRICE (Use the numeric entry)

Unit price (max. 6 digits)

• GROUP No. (Use the numeric entry)

- 01-09: Plus department
- 10: Minus department
- 11: Plus hash department
- 12: Minus hash department
- 15-17: Non-turnover 1-3

- If the "Hash" and "non-turnover" functions are disabled, you are not allowed to select any hash or non-turnover department.

• DESCRIPTION (Use the character entry)

Description for a department (max. 12 characters). Up to 16 characters can be entered.

• ITEM VP (Use the selective entry)

- COMPULSORY: Makes item validation printing compulsory.
- NON-COMPULSORY: Makes item validation printing non-compulsory.

• TARE TABLE No. (Use the numeric entry)

Scale table number associated with scale entry (1 through 9).

• SCALE (Use the selective entry)

- COMPULSORY: Makes a scale entry compulsory.
- ENABLE: Enables a scale entry.
- INHIBIT: Inhibits a scale entry.

• SIF/SICS/NORMAL (Use the selective entry)

- Department type selection
- SIF: SIF department
- SICS: SICS department
- NORMAL: Department other than SIF or SICS department

■ Department (continued)

• RECEIPT TYPE (Use the selective entry)

Receipt type selection (When the receipt type is “single/double” or “single/double + addition.”)

DOUBLE: Double receipt type

SINGLE: Single receipt type

• AMT. ENTRY TYPE (Use the selective entry)

Type of unit price entry for departments

OPEN & PRESET: Open & preset

PRESET: Preset only

OPEN: Open only

INHIBIT: Inhibited

• TAXABLE 1 through 6 (Use the selective entry)

Tax status

YES: Taxable

NO : Non-taxable

NOTE

- *The tax system of your POS terminal has been factory-set to automatic VAT1 - 6. If you desire to select any of automatic tax 1 - 6, manual VAT1 - 6, manual VAT1, manual tax 1 - 6, and the combination of the automatic VAT 1 - 3 and the automatic tax 4 - 6, contact your authorized SHARP dealer.*
- *When the combination of the automatic VAT1 - 3 and automatic tax 4 - 6 system is selected, one of the taxable 1 - 3 can be selected in combination with taxable 4 - 6.*

• HALO (Use the numeric entry)

- You can set an upper limit amount (HALO) for each department. The limit is effective for the REG-mode operations and can be overridden in the MGR mode.

- AB is the same as $A \times 10^B$

A: Significant digit for HALO (1 through 9)

B: Number of zeros to follow the significant digit for HALO (0 through 8)

• COMMIS. Gr. No. (Use the numeric entry)

Commission group number (1 through 3)

If the number “0” is entered, no commission group number will be assigned to a department.

You can assign each department to a commission group.

• OUTPUT KP No. 1 and No. 2 (Use the numeric entry)

ID number of the network remote printer 1 or 2 (1 through 9)

If the number “0” is entered, no remote printer will operate.

• RECEIPT PRINT (Use the selective entry)

YES: Prints the department sales information on the receipt.

NO: Prints nothing on the receipt.

PLU

Procedure

Select a pertinent PLU code from the PLUs list.

```

Program each item as follows:

• **ASSOCIATION DEPT. (Use the numeric entry)**

Department code to be associated with the entered PLU (01 through 99)
 When a PLU is associated with a department, the following functions of the PLU depend on the programming for the department.

- Grouping (group 1 through 17)
- Item validation print compulsory/non-compulsory
- Single item cash sale/Single item finalize
- Single receipt/double receipt
- HALO (only for subdepartments)

• **SIGN (Use the selective entry)**

- + : Plus PLU/subdepartment
- : Minus PLU/subdepartment

The function of every PLU/subdepartment varies according to the combination of its sign and the sign of its associated department as follows:

Department: + } Serves as a normal plus
 PLU/subdept.: + } PLU/subdepartment.

Department: - } Serves as a normal minus
 PLU/subdept.: - } PLU/subdepartment.

Department: + } Accepts store coupon entries, but
 PLU/subdept.: - } not split-pricing entries.

Department: - } Not valid; not accepted
 PLU/subdept.: + }

• **PRICE 1 through 3 (Use the numeric entry)**

Unit price of each price level (max. 6 digits).
 By default, only a price for PRICE 1 can be entered. If you want to enter a price for PRICE 2 and 3, contact your authorized SHARP dealer.

• **DESCRIPTION (Use the character entry)**

Description for a PLU (max. 12 characters). Up to 16 characters can be entered.

• **AMT. ENTRY TYPE (Use the selective entry)**

- Mode parameter
- OPEN & PRESET: PLU/subdepartment mode
- PRESET: PLU mode
- OPEN: Subdepartment mode
- INHIBIT: Inhibit mode

• **BASE QTY (Use the numeric entry)**

Base quantity for each PLU/subdepartment that should be applied only to split-pricing entries (max. 2 digits: 0.0 to 9.9)

• **MINIMUM STOCK (Use the numeric entry)**

Minimum stock quantity for a PLU (max. 7 digits)

■ PLU (continued)

- **PRICE SHIFT (Use the selective entry)**
 - COMPULSORY: Makes PLU price level shift compulsory.
 - INHIBIT: Inhibits PLU price level shift.
 - ALLOWED: Allows PLU price level shift.

- **MENU TYPE (Use the selective entry)**
 - PLU menu type selection
 - SET: Set PLU
 - LINK: Link PLU
 - NORMAL: Normal PLU

- **SET/LINK TBL# (Use the numeric entry)**
 - Table number for set PLUs/link PLUs (1 through 99)

- **PROMOTION TBL# (Use the numeric entry)**
 - Table number for promotion (1 through 99)

- **CONDIMENT TBL# (Use the numeric entry)**
 - Table number for condiment entry (1 through 99)

- **CONDIMENT TYPE (Use the selective entry)**
 - YES: Condiment type
 - NO: Non-condiment type

- **CONDIMENT ENTRY (Use the selective entry)**
 - COMPULSORY: Makes a condiment entry compulsory.
 - NON-COMPULSORY: Makes a condiment entry non-compulsory.

- **RECIPE TBL#1 through #3 (Use the numeric entry)**
 - Table number for recipe (1 through 999)

- **TARE TABLE No. (Use the numeric entry)**
 - Scale table number associated with scale entry (1 through 9)

- **SCALE (Use the selective entry)**
 - COMPULSORY: Makes a scale entry compulsory.
 - ENABLE: Enables a scale entry.
 - INHIBIT: Inhibits a scale entry.

- **TAXABLE 1 through 6 (Use the selective entry)**
 - YES: Makes the PLU taxable.
 - NO: Makes the PLU non-taxable.

NOTE

- *The tax system of your POS terminal has been factory-set to automatic VAT1 - 6. If you desire to select any of automatic tax 1 - 6, manual VAT1 - 6, manual VAT1, manual tax 1 - 6, and the combination of the automatic VAT1 - 3 and the automatic tax 4 - 6, contact your authorized SHARP dealer.*
- *When the combination of the automatic VAT1 - 3 and automatic tax 4 - 6 system is selected, one of the taxable 1 - 3 can be selected in combination with taxable 4 - 6.*
- *A PLU not programmed for any of these tax status is registered depending on the tax status of the department which the PLU belongs to.*

- **HOURLY Gr.#1 through #3 (Use the numeric entry)**
 - PLU hourly group number to classify PLUs for PLU hourly group reports (1 through 9)

■ PLU (continued)

- **GROUP (Use the numeric entry)**

PLU group number (00 through 99)

- **COMMIS. Gr. No. (Use the numeric entry)**

You can assign a PLU to a commission group (1 through 3).

If the number "0" is entered, no commission group number will be assigned to a PLU.

- **OUTPUT KP No.1 and No.2 (Use the numeric entry)**

ID number of the network remote printer 1 or 2 (1 through 9)

If the number "0" is entered, no remote printer will operate.

- **RECEIPT PRINT (Use the selective entry)**

YES: Prints the PLU sales information on the receipt.

NO: Prints nothing on the receipt.

- **PINT PRICE1 through 3 (Use the numeric entry)**

Pint price of each price level (max. 6 digits)

- **PINT BASE QTY (Use the numeric entry)**

Base quantity for each PLU/subdepartment that should be applied only to half/double pint entries (max. 2 digits: 0.0 to 9.9)

■ PLU range

You can program PLUs by range as follows:

Procedure

```
10:51 0001
PLU RANGE
START      000000
END        000000
OPERATION  NEW&MAINTENANCE
PGM2
```

```
10:51 0001
000001-000020
ASSOCIATION DEPT. 31
SIGN
PRICE 1
PRICE 2
PRICE 3
DESCRIPTION
AMT. ENTRY TYPE
BASE QTY
MINIMUM STOCK
PRICE SHIFT
MENU TYPE
M2
```

The screen continues in the same format as those screens shown in section “■ PLU” on page 130.

Enter a value or select an option for each item as follows:

- **START (Use the numeric entry)**

Starting PLU code (max. 6 digits)

- **END (Use the numeric entry)**

Ending PLU code (max. 6 digits)

- **OPERATION (Use the selective entry)**

MAINTENANCE: Enables you to change the setting you have programmed.

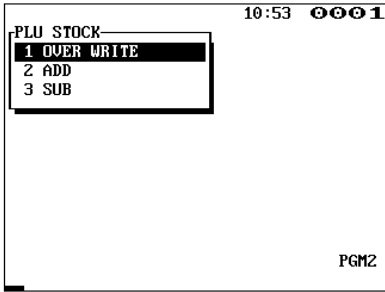

NEW&MAINTENANCE: Enables you to change the current setting when the specified codes have already been created or to create new codes when the specified codes have not been created yet.

DEL: Enables you to delete a specified range of PLUs.

■ PLU stock

You can assign a stock quantity to each PLU code.
Shown below is an example of selecting “1 OVER WRITE.”

Procedure

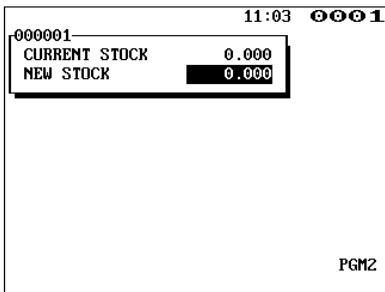

10:53 0001

PLU STOCK

1 OVER WRITE
2 ADD
3 SUB

PGM2

Select a pertinent PLU code from the PLUs list.

11:03 0001

000001

CURRENT STOCK	0.000
NEW STOCK	0.000

PGM2

After selecting “1 OVER WRITE,” select a pertinent PLU code.
Then the next screen will appear to show the following items:

• CURRENT STOCK

The current stock is displayed.

• NEW STOCK (Use the numeric entry)

Enter a new stock quantity (max. 7 digits: 1 to 9999.999(9999999))

NOTE

- If you need to add or subtract a stock quantity to or from the current stock quantity, select “2 ADD” or “3 SUB” and enter a value to be added or subtracted.
- The entry of a new stock value will update to the PLU stock counter.

■ Ingredient

You can program an ingredient number, description and cost for the ingredients of each PLU. The ingredient numbers can be assigned to each recipe table. The cost needs to be programmed to analyze the food cost of each item.

Procedure

Selected ingredient no. →

Program each item as follows:

- **INGREDIENT (Use the numeric entry)**

Ingredient number (1 through 999)

NOTE

- When you create a new number, enter the number, then press the key.
- If the key is pressed on the ingredient number selection menu, the ingredient in the cursor position will be deleted.

- **DESCRIPTOR (Use the character entry)**

Description for each ingredient. Up to 12 characters can be entered.

- **COST (Use the numeric entry)**

Cost for each ingredient (max. 6 digits)

NOTE

Food cost is calculated by the following equations:

$$\text{Food cost (PLU cost)} = \sum (\text{Ingredient cost} \times \text{Usage})$$

$$\text{Food cost\%} = (\text{Sales q'ty} \times \text{Food cost}) / (\text{Sales amount} - \text{*VAT amount} - \text{**Service charge})$$

* The VAT amount is calculated by using a VAT rate which is programmed for each PLU.

$$\text{VAT amount} = \text{Sales amount} \times r / (1+r)$$

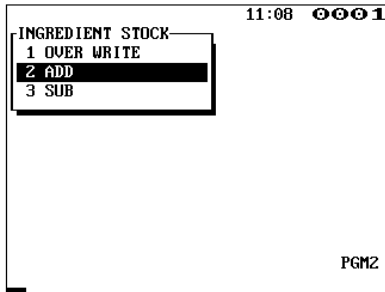

**The service charge is calculated by using a service charge rate which is preset in the PGM2 mode. The service charge rate is shared by all PLUs.

$$\text{Service charge} = \text{Sales amount} \times \text{Service charge rate}$$

■ Ingredient stock

You can assign a stock quantity to each ingredient.
Shown below is an example of selecting "2 ADD."

Procedure

11:08 0001

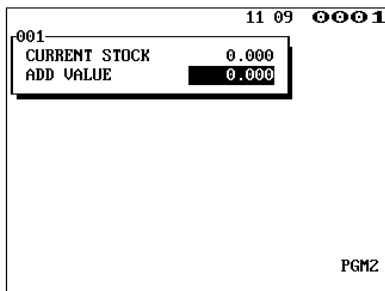

INGREDIENT STOCK
1 OVER WRITE
2 ADD
3 SUB

PGM2

Selected
ingredient
no.

ENTER

11 09 0001

-001	
CURRENT STOCK	0.000
ADD VALUE	0.000

PGM2

Program each item as follows:

• CURRENT STOCK

The current stock is displayed.

• ADD VALUE (Use the numeric entry)

Enter a value to be added (max. 7 digits: 1 to 9999.999(9999999)).

NOTE

- If you need to overwrite or subtract a stock quantity to or from the current stock quantity, select "1 OVER WRITE" or "3 SUB" and enter a value to be overwritten or subtracted.

■ Set PLU table

When two or more menu items, consisting of PLUs related to a special offered, are to be programmed together, set PLUs should be specified. Up to 25 PLUs can be linked to each set PLU.

Procedure

Selected
set PLU
table no.

The screen continues.

Program each item as follows:

- **SET PLU TABLE (Use the numeric entry)**
Set PLU table number (1 through 99)
- **SETPLU XX**
Enter set PLU codes (max. 25 PLUs).

NOTE

- *PLU codes should be defined before programming a set PLU table.*
- *If the **[DEL]** key is pressed on the table number selection menu, the set PLU in the cursor position will be deleted.*

■ Link PLU table

It is possible to link PLUs together so that all PLUs linked together are rung up upon a single key depression. However, the number of links is a maximum of five. Even if more than five PLUs are linked, the sixth or higher link is not actualized.

Procedure

Selected
link PLU
table no.

Program each item as follows:

- **LINK PLU TABLE (Use the numeric entry)**

Link PLU table number (1 through 99)

- **LINK PLU #X**

Enter linked PLU codes (max. 5 PLUs).

NOTE

- *PLU codes should be defined before programming a link PLU table.*
- *If the key is pressed on the table number selection menu, the selected table will be deleted.*

■ Condiment table

The “condiment entry” is intended to guide the operator in making menu entries which require special cooking instructions. For example, a clerk can make such entries as “garnishing potato,” “with salad,” and “grilling steak rare.” When a clerk enters a menu-item PLU to which PLUs for the condiment entry have been assigned, these orders (such as “garnishing potato”) will be printed on the receipt and conveyed to the kitchen.

Before you program for the condiment entry, prepare a condiment table. The following shows an example of a condiment table:

Condiment table

Table number	PLU codes for condiment entry (programmed description)					
01	22 (HOWCOOK?)	23 (RARE)	25 (MED.RARE)	27 (WELLDONE)	02
02	41 (WITH?)	44 (SALAD)	45 (FRUITS)		
.....
04	31 (POTATO?)	33 (P.CHIPS)	37 (MASHED.P)	38 (BAKED.P)	99
99	62 (DRINK?)	63 (TEA)	65 (MILK)	67 (A.JUICE)	

First PLU
Following PLUs (Up to 19)
Next condiment table number

Condiment tables (Up to 99)

The condiment table should contain the following:

Condiment table: The condiment table is a group of condiment PLUs, which is assigned to each menu-item PLU. A table consists of a “First PLU” and “Following PLUs.” It can contain one “First PLU” and up to 19 “Following PLUs.” Also, you can assign the next condiment table number to a condiment table to link them.

The “First PLU” is used for displaying a prompting message. The “Following PLU” is used for the special order setting. For example, when a clerk enters a menu-item PLU, a display message programmed for the “First PLU,” such as “HOWCOOK?,” will appear. Then specify one of the “Following PLUs” programmed for text such as “RARE.”

Table number: The table number is intended to identify each condiment table.

Procedure

Program each item as follows:

- **CONDIMENT TABLE (Use the numeric entry)**
Condiment table number (1 through 99)
- **NEXT LINK TBL# (Use the numeric entry)**
Enter the next condiment table number (max. 2 digits).
- **CONDIMENT PLUXX**
Enter condiment PLU codes (max. 20 PLUs).

NOTE

- The description of the first PLU (CONDIMENT PLU01) is used as the display prompt.
- PLU codes should be defined before programming a condiment table.
- If the **(DEL)** key is pressed on the table number selection menu, the table in the cursor position will be deleted.

Selected

PROMOTION PLU#1 000000
PROMOTION PLU#2 000000
PROMOTION PLU#3 000000
PROMOTION PLU#4 000000
PROMOTION PLU#5 000000
TEXT
PGM2
  
```

Program each item as follows:

- **PROMOTION TABLE (Use the numeric entry)**
Promotion table number (1 through 99)
- **DISCOUNT AMOUNT (Use the numeric entry)**
Discount amount for each promotion table (max. 6 digits)
- **TRIP LEVEL (Use the numeric entry)**
Trip level for discount (satisfying count of entered item)
- **PROMOTION PLU #1 through #5 (Use the numeric entry)**
Enter promotion PLU codes.
- **TEXT (Use the character entry)**
Description for each promotion table (max. 12 characters)

NOTE

- *PLU codes should be defined before programming a promotion table.*
- *If the  key is pressed on the table number selection menu, the table in the cursor position will be deleted.*

INGREDIENT #04 000
QTY 0.000
INGREDIENT #05 000
QTY 0.000
INGREDIENT #06 000
PGM2

Program each item as follows:

- **RECIPE TABLE (Use the numeric entry)**
Recipe table number (1 through 999)
- **INGREDIENT #XX (Use the numeric entry)**
Enter ingredient numbers (max. 10 ingredients).
- **QTY (Use the numeric entry)**
Enter the usage of each ingredient.
(max. 7 digits: 0 to 9999.999 (9999999)).

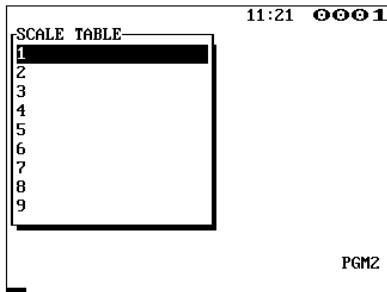

NOTE

- *Ingredient numbers should be defined before programming a recipe table.*
- *If the (DEL) key is pressed on the table number selection menu, the table in the cursor position will be deleted.*

■ Scale table

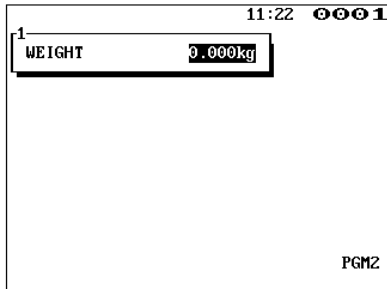

You can program up to nine scale tables and allows different tares to be assigned to them.

Procedure

A screenshot of a POS terminal screen showing the 'SCALE TABLE' menu. The screen has a title bar with 'SCALE TABLE' on the left, '11:21' in the center, and '0001' on the right. Below the title bar is a list of numbers from 1 to 9, with '1' highlighted. The bottom right corner of the screen displays 'PGM2'.

Selected
scale table
number

A screenshot of a POS terminal screen showing the 'WEIGHT' entry screen. The screen has a title bar with '1' on the left, '11:22' in the center, and '0001' on the right. Below the title bar is a text field containing 'WEIGHT' and a numeric input field containing '0.000kg'. The bottom right corner of the screen displays 'PGM2'.

Program each item as follows:

- **SCALE TABLE (Use the numeric entry)**

Scale table number (1 through 9)

- **WEIGHT (Use the numeric entry)**

Enter a tare weight for the scale table number (max. 4 digits:
1 to 9.999 kg (1 to 99.99 lbs.)).

NOTE

Your POS terminal may also be set to accommodate 1-integer +3-decimal weights. For more details, please contact your authorized SHARP dealer.

■ Department shift

Procedure

DEPT. SHIFT		12:47	0001
DEPT. SHIFT1	00		
DEPT. SHIFT2	00		
DEPT. SHIFT3	00		
DEPT. SHIFT4	00		
PGM2			

Program the item as follows:

- **DEPT. SHIFT 1 through 4 (Use the numeric entry)**

Enter an associated department code for each department shift key (max. 2 digits).

NOTE

If an associated department code which was changed by the DEPT SHIFT1 through DEPT SHIFT4 keys is "00," it will not change. In this case, an error will occur.

■ Happy hour

You can program a time range for each price level. When a clerk enters a PLU code, the price level for which you have programmed a time range will be automatically entered. For example, if you program the time range 9:00 AM to 11:00 AM for price level 2, only the price programmed for price level 2 is entered from 9:00 AM to 11:00 AM.

Procedure

HAPPY HOUR		12:51	0001
SFT1 START TIME	0000		
END TIME	0000		
SFT2 START TIME	0000		
END TIME	0000		
SFT3 START TIME	0000		
END TIME	0000		
PGM2			

Program the item as follows:

- **SFT1 through SFT3 START TIME and END TIME (Use the numeric entry)**

Enter the starting and ending times for each price level (time range: 0000 to 2359).

NOTE

When the starting and ending times are set at "0000," the "Happy hour" function is not available.

Direct Key Programming

Use the following procedure to select direct-key programming:

■ Direct key

You can assign departments and PLUs directly to the keyboard. In the case of PLUs, you may assign up to 3 levels to be accessed directly on the keyboard. For key no. positions, refer to the illustration shown below.

Procedure

11:23 0001

SETTING

- 1 ARTICLE
- 2 DIRECT KEY
- 3 FUNCTION
- 4 MEDIA
- 5 TEXT
- 6 PERSONNEL
- 7 REGISTER
- 8 DATE/TIME
- 9 OPTIONAL
- 10 REPORT
- 11 MESSAGE

PGM2

Select a pertinent key no. from the key numbers list.

11:24 0001

061

TYPE

PLU

PGM2

11:25 0001

061

LEVEL1 000001

LEVEL2 000000

LEVEL3 000000

PGM2

In the case of selecting "061 DIRECT PLU"

• TYPE (Use the selective entry)

- PLU: Assigns the key as a direct PLU key.
- DEPT: Assigns the key as a direct department key.

NOTE

- You can also select a direct PLU key by pressing the corresponding key when the PLU has been assigned directly on the keyboard instead of selecting the key from the menu.
- When selecting a department, the screen on which a department code is to be entered (the message "DEPT. CODE") will appear.

• LEVEL1 through 3 (Use the numeric entry)

Enter a PLU code for each level. For example, if you want to use this key as PLU code 1 (level 1) and PLU code 101 (level 2), enter 1 for "LEVEL1" and 101 for "LEVEL2."

Key numbers

12	24	36	48	60	72	84	96	108	120	132	144	156
11	23	35	47	59	71	83	95	107	119	131	143	155

8	20	32	44	56	68	80	92	104	116	128	140	152
7	19	31	43	55	67	79	91	103	115	127	139	151
6	18	30	42	54	66	78	90	102	114	126	138	150
5	17	29	41	53	65	77	89	101	113	125	137	149
4	16	28	40	52	64	76	88	100	112	124	136	148
3	15	27	39	51	63	75	87	99	111	123	135	147
2	14	26	38	50	62	74	86	98	110	122	134	146
1	13	25	37	49	61	73	85	97	109	121	133	145

Departments and PLUs programmable area

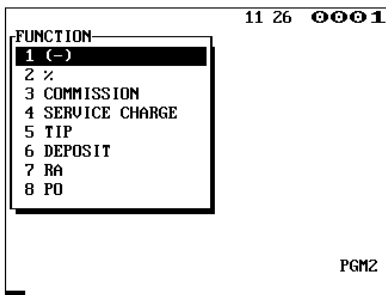

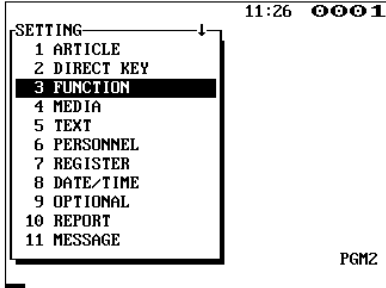

NOTE

- You can assign departments and PLUs only the "Departments and PLUs programmable area" shown above.
- You cannot assign a department or a PLU to the position to which a function key has been assigned.

Functional Programming

Use the following procedure to select any option included in the functional programming group:

Procedure

1. In the SETTING window, select "3 FUNCTION."
• The FUNCTION window will appear.

2. Select any option from the following options list:

1 (-):	Discount key
2 %:	Percent key
3 COMMISSION:	Commission
4 SERVICE CHARGE:	Service charge
5 TIP:	Tip
6 DEPOSIT:	Deposit
7 RA:	Received on account
8 PO:	Paid out

The following illustration shows those options included in the functional programming group.

■ Discount key (⊖1 through ⊖9)

Procedure

Select a pertinent discount key from the discount keys list.

```
11 30 0001
( - ) 1
AMOUNT          -0.00
TEXT            ( - ) 1
SIGN            -
HALO            17
ENTRY TYPE     SBTL
PGM2
```

Program each item as follows:

- **AMOUNT (Use the numeric entry)**

Discount amount (max. 6 digits)

- **TEXT (Use the character entry)**

Description for the discount key. Up to 12 characters can be entered.

- **SIGN (Use the selective entry)**

Programming of the + or - sign assigns the premium or discount function to each discount key.

-: Minus amount (discount)

+: Plus amount (premium)

- **HALO (High Amount Lockout) (Use the numeric entry)**

A: Significant digit for HALO (1 through 9)

B: Number of zeros to follow the significant digit for HALO (0 through 7)

AB is the same as $A \times 10^B$.

- **ENTRY TYPE (Use the selective entry)**

RA: Received on account (-)

ITEM: Item (-)

SBTL: Subtotal (-)

NOTE

You can also select a discount key by pressing the corresponding key when it has been placed directly on the keyboard instead of selecting the key from the menu.

■ Percent key (%1 through %9)

Procedure

Select a pertinent percent key from the percent keys list.

```
11 33 0001
%1
RATE          -0.00%
TEXT          %1
SIGN          -
%HALO        100.00%
ENTRY TYPE    SBTL
PGM2
```

Program each item as follows:

- **RATE (Use the numeric entry)**
Percent rate (0.00 to 100.00)
- **TEXT (Use the character entry)**
Description for the percent key. Up to 12 characters can be entered.
- **SIGN (Use the selective entry)**
Programming of the + or - sign assigns the premium or discount function to each percent key.
-: Minus (discount)
+: Plus (premium)
- **%HALO (High Amount Lockout) (Use the numeric entry)**
HALO (High Amount Lockout) for the percent key (0.00 to 100.00)
- **ENTRY TYPE (Use the selective entry)**
RA: Received on account %
ITEM: Item %
SBTL: Subtotal %

NOTE

You can also select a percent key by pressing the corresponding key when it has been placed directly on the keyboard instead of selecting the key from the menu.

■ Commission

Procedure

Select a pertinent commission no. from the commission list.

```
11 37 0001
COM.SAL1
RATE          0.000%
TEXT          COM.SAL1
PGM2
```

Program each item as follows:

- **RATE (Use the numeric entry)**
Percent rate (0.000 to 99.999)
- **TEXT (Use the character entry)**
Description for the commission. Up to 12 characters can be entered.

■ Service charge

Procedure

```
SERVICE CHARGE 11:38 0001
RATE 0.00%
TEXT SER. CHRG
PGM2
```

Program each item as follows:

- **RATE (Use the numeric entry)**
Percent rate (0.00 to 100.00)
- **TEXT (Use the character entry)**
Description for the service charge. Up to 12 characters can be entered.

■ Tip

Procedure

Select a pertinent tip key from the tip keys list.

```
CASH TIP 11:51 0001
HALO 18
TEXT CASH TIP
PGM2
```

Program each item as follows:

- **HALO (High Amount Lockout) (Use the numeric entry)**
A: Significant digit for HALO (1 through 9)
B: Number of zeros to follow the significant digit for HALO (0 through 8)
AB is the same as $A \times 10^B$.
- **TEXT (Use the character entry)**
Description for the tip. Up to 12 characters can be entered.

NOTE

You can also select a tip key by pressing the corresponding key when it has been placed directly on the keyboard instead of selecting the key from the menu.

■ Deposit

Procedure

Select a pertinent deposit key from the deposit keys list.

11:59

DEPOSIT

HALO

TEXT

DEPOSIT

PGM2

Program each item as follows:

- **HALO (High Amount Lockout) (Use the numeric entry)**

A: Significant digit for HALO (1 through 9)

B: Number of zeros to follow the significant digit for HALO (0 through 8)

AB is the same as $A \times 10^B$.

- **TEXT (Use the character entry)**

Description for the deposit. Up to 12 characters can be entered.

NOTE

You can also select a deposit key by pressing the corresponding key directly instead of selecting the key from the menu.

■ RA

You can program an upper limit amount and description for each received-on-account key.

Procedure

Select a pertinent received-on-account key from the RA keys list.

12:00

***RA

HALO

TEXT

***RA

PGM2

Program each item as follows:

- **HALO (High Amount Lockout) (Use the numeric entry)**

A: Significant digit for HALO (1 through 9)

B: Number of zeros to follow the significant digit for HALO (0 through 8)

AB is the same as $A \times 10^B$.

- **TEXT (Use the character entry)**

Description for the received-on-account key. Up to 12 characters can be entered.

NOTE

You can also select an RA key by pressing the corresponding key when it has been placed directly on the keyboard instead of selecting the key from the menu.

■ PO

You can program an upper limit amount and description for each paid-out key.

Procedure

Select a pertinent paid-out key from the PO keys list.

Program each item as follows:

- **HALO (High Amount Lockout) (Use the numeric entry)**

A: Significant digit for HALO (1 through 9)

B: Number of zeros to follow the significant digit for HALO (0 through 8)

AB is the same as $A \times 10^B$.

- **TEXT (Use the character entry)**

Description for the paid-out key. Up to 12 characters can be entered.

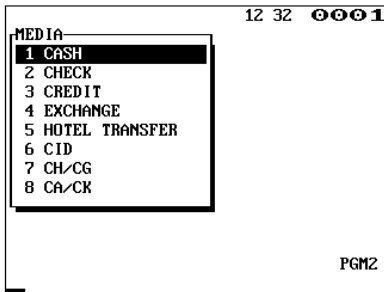

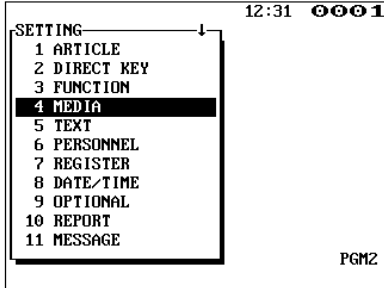

NOTE

You can also select a PO key by pressing the corresponding key when it has been placed directly on the keyboard instead of selecting the key from the menu.

Media Key Programming

Use the following procedure to select any option included in the media group:

Procedure

1. In the SETTING window, select "4 MEDIA."
 - The MEDIA window will appear.

2. Select any option from the following options list:

1 CASH:	Cash key
2 CHECK:	Check key
3 CREDIT:	Credit key
4 EXCHANGE:	Currency exchange key
5 HOTEL TRANSFER:	Hotel transfer key
6 CID:	Cash in drawer
7 CH/CG:	Check change
8 CA/CK:	Check cashing

The following illustration shows those options included in the media key programming group.

- ➡ See "■Cash key" on page 153.
- ➡ See "■Check key" on page 154.
- ➡ See "■Credit key" on page 155.
- ➡ See "■Currency exchange key" on page 156.
- ➡ See "■Hotel transfer key" on page 157.
- ➡ See "■Cash in drawer" on page 158.
- ➡ See "■Check change" on page 158.
- ➡ See "■Check cashing" on page 159.

■ Cash key

Procedure

Select a pertinent cash key from the cash keys list.

CASH	
TEXT	CASH
HALO	18
BILL PRINT	NON-COMPULSORY
FOOTER PRINT	NO
NON-ADD # ENTRY	NON-COMPULSORY
UP	NON-COMPULSORY
DRAWER OPENING	NO
AMOUNT ENTRY	NON-COMPULSORY

Program each item as follows:

- **TEXT (Use the character entry)**

Description for the cash key. Up to 12 characters can be entered.

- **HALO (High Amount Lockout) (Use the numeric entry)**

AB is the same as $A \times 10^B$.

A: Significant digit (1 through 9)

B: Number of zeros to follow the significant digit (0 through 8)

You can set AB at 18 for no limitation.

- **BILL PRINT (Use the selective entry)**

COMPULSORY: Makes bill printing compulsory.

NON-COMPULSORY: Makes bill printing non-compulsory.

- **FOOTER PRINT (Use the selective entry)**

This item decides whether or not your POS terminal should print a message at the foot of a receipt when a specified cash key is used.

YES: Enables footer printing on the receipt.

NO: Disables footer printing on the receipt.

- **NON-ADD # ENTRY (Use the selective entry)**

You can enforce the non-add code entry when a cash entry is accepted.

COMPULSORY: Compulsory non-add code entry

NON-COMPULSORY: Non-compulsory non-add code entry

- **VP (Use the selective entry)**

COMPULSORY: Compulsory validation printing

NON-COMPULSORY: Non-compulsory validation printing

- **DRAWER OPENING (Use the selective entry)**

You can program each media key to open the drawer.

YES: Opens the drawer.

NO: Disables the drawer opening.

- **AMOUNT ENTRY (Use the selective entry)**

You may select compulsory or non-compulsory amount tender.

COMPULSORY: Compulsory amount tendered entry

NON-COMPULSORY: Non-compulsory amount tendered entry

NOTE

You can also select a cash key by pressing the corresponding key when it has been placed directly on the keyboard instead of selecting the key from the menu.

■ Check key (CH1 through CH4)

Procedure

Select a pertinent check key from the check keys list.

CHECK	CHECK
TEXT	
HALO	18
EFT FUNCTION	NON-COMPULSORY
BILL PRINT	NON-COMPULSORY
FOOTER PRINT	NO
NON-ADD # ENTRY	NON-COMPULSORY
CHANGE DUE	ENABLE
UP	NON-COMPULSORY
DRAWER OPENING	NO
AMOUNT ENTRY	NON-COMPULSORY
DESCRIPTOR	

Program each item as follows:

- **TEXT (Use the character entry)**

Description for the check key. Up to 12 characters can be entered.

- **HALO (High Amount Lockout) (Use the numeric entry)**

AB is the same as $A \times 10^B$.

A: Significant digit (1 through 9)

B: Number of zeros to follow the significant digit (0 through 8)

You can set AB at 18 for no limitation.

- **EFT FUNCTION (Use the selective entry)**

COMPULSORY: Makes EFT function compulsory.

NON-COMPULSORY: Makes EFT function non-compulsory.

- **BILL PRINT (Use the selective entry)**

COMPULSORY: Compulsory bill printing

NON-COMPULSORY: Non-compulsory bill printing

- **FOOTER PRINT (Use the selective entry)**

YES: Enables footer printing on the receipt.

NO: Disables footer printing on the receipt.

- **NON-ADD # ENTRY (Use the selective entry)**

COMPULSORY: Compulsory non-add code entry

NON-COMPULSORY: Non-compulsory non-add code entry

- **CHANGE DUE (Use the selective entry)**

Either change enable or disable can be selected for each check key.

DISABLE: Disables change calculation.

ENABLE: Enables change calculation.

- **VP (Use the selective entry)**

COMPULSORY: Compulsory validation printing

NON-COMPULSORY: Non-compulsory validation printing

- **DRAWER OPENING (Use the selective entry)**

YES: Opens the drawer.

NO: Disables the drawer opening.

- **AMOUNT ENTRY (Use the selective entry)**

COMPULSORY: Compulsory amount tendered entry

NON-COMPULSORY: Non-compulsory amount tendered entry

- **DESCRIPTOR (Use the character entry)**

Currency descriptor. Up to 4 characters can be entered.

NOTE

You can also select a check key by pressing the corresponding key when it has been placed directly on the keyboard instead of

■ Credit key (CR1 through CR8)

Procedure

Select a pertinent credit key from the credit keys list.

```
12:36 0001
CREDIT1
TEXT
HALO
EFT FUNCTION      NON-COMPULSORY
BILL PRINT        NON-COMPULSORY
FOOTER PRINT      NO
NON-ADD # ENTRY   NON-COMPULSORY
CHANGE DUE        ENABLE
UP                NON-COMPULSORY
DRAWER OPENING    NO
AMOUNT ENTRY      INHIBIT
PGM2
a
```

Program each item as follows:

- **TEXT (Use the character entry)**

Description for the credit key. Up to 12 characters can be entered.

- **HALO (High Amount Lockout) (Use the numeric entry)**

AB is the same as $A \times 10^B$.

A: Significant digit (1 through 9)

B: Number of zeros to follow the significant digit (0 through 8)

You can set AB at 18 for no limitation.

- **EFT FUNCTION (Use the selective entry)**

COMPULSORY: Makes EFT function compulsory.

NON-COMPULSORY: Makes EFT function non-compulsory.

- **BILL PRINT (Use the selective entry)**

COMPULSORY: Compulsory bill printing

NON-COMPULSORY: Non-compulsory bill printing

- **FOOTER PRINT (Use the selective entry)**

This item decides whether or not your POS terminal should print a message at the foot of a receipt when a specified credit key is used.

YES: Enables footer printing on the receipt.

NO: Disables footer printing on the receipt.

- **NON-ADD # ENTRY (Use the selective entry)**

COMPULSORY: Compulsory non-add code entry

NON-COMPULSORY: Non-compulsory non-add code entry

- **CHANGE DUE (Use the selective entry)**

DISABLE: Disables change calculation.

ENABLE: Enables change calculation.

- **VP (Use the selective entry)**

COMPULSORY: Compulsory validation printing

NON-COMPULSORY: Non-compulsory validation printing

- **DRAWER OPENING (Use the selective entry)**

YES: Opens the drawer.

NO: Disables the drawer opening.

- **AMOUNT ENTRY (Use the selective entry)**

COMPULSORY: Makes amount tendered entry compulsory.

INHIBIT: Inhibits amount tendered entry.

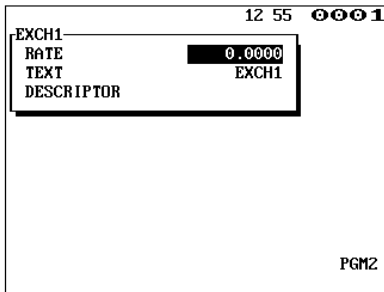

NOTE

You can also select a credit key by pressing the corresponding key when it has been placed directly on the keyboard instead of selecting the key from the menu.

■ Currency exchange key (EX1 through EX9)

Procedure

Select a pertinent currency exchange key from the currency exchange keys list.

```
12 55 0001
EXCH1
RATE 0.0000
TEXT EXCH1
DESCRIPTOR

PGM2
```

Program each item as follows:

- **RATE (Use the numeric entry)**
Currency exchange rate (0.0000 to 9999.9999)
- **TEXT (Use the character entry)**
Description for the currency exchange key. Up to 12 characters can be entered.
- **DESCRIPTOR (Use the character entry)**
Currency descriptor. Up to 4 characters can be entered.

NOTE

You can also select a currency exchange key by pressing the corresponding key when it has been placed directly on the keyboard instead of selecting the key from the menu.

■ Hotel transfer key

Procedure

HOTEL TRANSFER		12 56	0001
TEXT	HOTEL TRANS.		
HALO	18		
BILL PRINT	NON-COMPULSORY		
FOOTER PRINT	NO		
NON-ADD # ENTRY	NON-COMPULSORY		
CHANGE DUE	ENABLE		
UP	NON-COMPULSORY		
DRAWER OPENING	NO		

PGM2
a

Program each item as follows:

- **TEXT (Use the character entry)**

Description for the hotel transfer key. Up to 12 characters can be entered.

- **HALO (High Amount Lockout) (Use the numeric entry)**

AB is the same as $A \times 10^B$.

A: Significant digit for HALO (1 through 9)

B: Number of zeros to follow the significant digit for HALO (0 through 8)

- **BILL PRINT (Use the selective entry)**

COMPULSORY: Compulsory bill printing

NON-COMPULSORY: Non-compulsory bill printing

- **FOOTER PRINT (Use the selective entry)**

YES: Enables footer printing on the receipt.

NO: Disables footer printing on the receipt.

- **NON-ADD # ENTRY (Use the selective entry)**

COMPULSORY: Compulsory non-add code entry

NON-COMPULSORY: Non-compulsory non-add code entry

- **CHANGE DUE (Use the selective entry)**

DISABLE: Disables change due.

ENABLE: Enables change due.

- **VP (Use the selective entry)**

COMPULSORY: Compulsory validation printing

NON-COMPULSORY: Non-compulsory validation printing

- **DRAWER OPENING (Use the selective entry)**

YES: Opens the drawer.

NO: Disables the drawer opening.

■ Cash in drawer

You can program the description and the upper limit amounts for cash in drawer (sentinel).

Procedure

CID		12 57	0001
TEXT	****CID		
HALO	9999999.99		
PGM2			
a			

Program each item as follows:

- **TEXT (Use the character entry)**
Description for the cash in drawer. Up to 12 characters can be entered.
- **HALO (High Amount Lockout) (Use the numeric entry)**
Limit amount: 0 to 9999999.99

■ Check change

You can program the description and the upper limit amounts for check change.

Procedure

CH/CG		12 58	0001
TEXT	CHK/CG		
HALO	999999.99		
PGM2			
a			

Program each item as follows:

- **TEXT (Use the character entry)**
Description for check change. Up to 12 characters can be entered.
- **HALO (High Amount Lockout) (Use the numeric entry)**
Limit amount: 0 to 999999.99

■ Check cashing

You can program the description and the upper limit amounts for check cashing.

Procedure

Select a pertinent check cashing no. from the check cashing numbers list.

CA/CHK	TEXT	HALO
999999.99	CA/CHK	999999.99
	TEXT	
	HALO	

12:59 0001

PGM2

a

Program each item as follows:

- **TEXT (Use the character entry)**

Description for check cashing. Up to 12 characters can be entered.

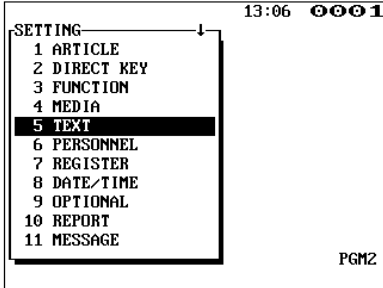

- **HALO (High Amount Lockout) (Use the numeric entry)**

Limit amount: 0 to 999999.99

Text Programming

Use the following procedure to select any option included in the text group:

Procedure

1. In the SETTING window, select "5 TEXT."
 - The TEXT window will appear.

2. Select any option from the following options list:

- | | |
|------------------|-----------------------|
| 1 FUNCTION TEXT: | Function text |
| 2 DEPT. GROUP: | Department group text |
| 3 PLU GROUP: | PLU group text |
| 4 PLU HOURLY GR: | PLU hourly group text |

The following illustration shows those options included in the text programming group.

- ➡ See "■Function text" on page 161.
- ➡ See "■Department group text" on page 164.
- ➡ See "■PLU group text" on page 164.
- ➡ See "■PLU hourly group text" on page 165.

■ Function text

You can program a maximum of twelve characters for each function by using the following table:

Procedure

FUNCTION TEXT	13 08	0001
001 DISCOUNT		
002 SET PLU-		
003 DIFFER		
004 TAX1 ST		
005 TAX2 ST		
006 TAX3 ST		
007 TAX4 ST		
008 TAX5 ST		
009 TAX6 ST		
010 VAT 1		
011 VAT 2		

PGM2

■ Department group text

You can program a maximum of twelve characters for each department group.

Procedure

Select a pertinent department group number from the department groups list.

The screenshot shows a terminal window with a title bar containing '14 34' and four status icons. The main area displays 'GROUP1' in a text field, with a cursor at the end. Below the text field is a black rectangular box containing the text 'GROUP1'. At the bottom right of the window, the text 'PGM2' and a small 'a' are visible.

Program the item as follows:

- **TEXT (Use the character entry)**

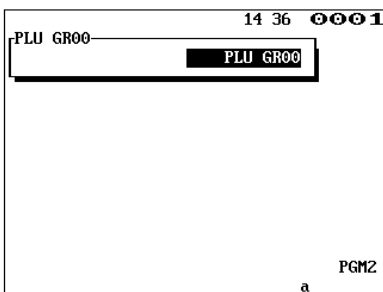

Description for the department group. Up to 12 characters can be entered.

■ PLU group text

You can program a maximum of twelve characters for each PLU group.

Procedure

Select a pertinent PLU group number from the PLU groups list.

The screenshot shows a terminal window with a title bar containing '14 36' and four status icons. The main area displays 'PLU GR00' in a text field, with a cursor at the end. Below the text field is a black rectangular box containing the text 'PLU GR00'. At the bottom right of the window, the text 'PGM2' and a small 'a' are visible.

Program the item as follows:

- **TEXT (Use the character entry)**

Description for the PLU group. Up to 12 characters can be entered.

■ PLU hourly group text

You can program a maximum of twelve characters for each PLU hourly group.

Procedure

Select a pertinent PLU hourly group no. from the hourly groups list.

Program the item as follows:

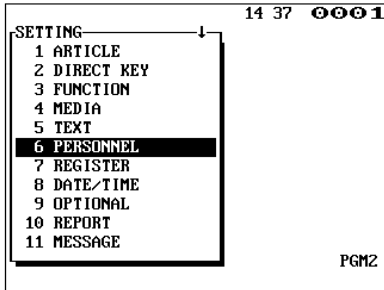

- **TEXT (Use the character entry)**

Description for the PLU hourly group. Up to 12 characters can be entered.

Personnel Programming

Use the following procedure to select any option included in the personnel group:

Procedure

1. In the SETTING window, select "6 PERSONNEL."
 - The PERSONNEL window will appear.

2. Select any option from the following options list:

1 CLERK:	Clerk
2 MANAGER:	Manager
3 EMPLOYEE:	Employee
4 JOB LOCATE TBL:	Job location table

The following illustration shows those options included in the personnel programming group.

■ Clerk

Procedure

```

14:38 0001
CLERK
0001 CLERK001
0002 CLERK002
0003 CLERK003
0004 CLERK004
0005 CLERK005
0006 CLERK006
PGM2
  
```

```

14:38 0001
0001-
SECRET CODE          0000
NAME                 CLERK001
KEY No.              001
SUPERVISOR CLERK    NO
VIP SALE             ENABLE
GLU SYSTEM           NON-COMPULSORY
G.C. COPY            ENABLE
VAT SHIFT            NOT
PRICE LEVEL          PRICE 1
DRAWER No.           1
START CODE(GLU)     00000001
MZ
  
```

The screen continues.

Program each item as follows:

- **SECRET CODE (Use the numeric entry)**
Secret code (max. 4 digits: 0001 to 9999/0000)
- **NAME (Use the character entry)**
Name for the clerk. Up to 8 characters can be entered.
- **KEY No. (Use the numeric entry)**
Key number (1 through 255)
- **SUPERVISOR CLERK (Use the selective entry)**
YES: Enables supervisor clerk.
NO: Disables supervisor clerk.
- **VIP SALE (Use the selective entry)**
DISABLE: Disables VIP sale.
ENABLE: Enables VIP sale.
- **GLU SYSTEM (Use the selective entry)**
GLU (PBLU): Makes GLU or PBLU system compulsory.
DRIVE THRU: Makes drive-through compulsory.
NON-COMPULSORY: Makes GLU system non-compulsory.
- **G.C. COPY (Use the selective entry)**
DISABLE: Disables guest check copy.
ENABLE: Enables guest check copy.
- **VAT SHIFT (Use the selective entry)**
STATE: Enables VAT shift entry.
NOT: Disables VAT shift entry.
- **PRICE LEVEL (Use the selective entry)**
PRICE 3: Selects price level 3.
PRICE 2: Selects price level 2.
PRICE 1: Selects price level 1.
- **DRAWER No. (Use the numeric entry)**
Drawer number (1 or 2)
The entry of "0" (zero) disables the drawer opening.
- **START CODE(GLU) (Use the numeric entry)**
Starting GLU/PBLU code (1 to 99999999)
- **END CODE(GLU) (Use the numeric entry)**
Ending GLU/PBLU code (1 to 99999999)

■ Clerk (continued)

- **DEPT SHIFT 1 through 4 (Use the selective entry)**

YES: Enables department shift entry.

NO: Disables department shift entry.

- **PGM2 MODE (Use the selective entry)**

DISABLE: Disables operation in the PGM2 mode.

ENABLE: Enables operation in the PGM2 mode.

- **PGM1 MODE (Use the selective entry)**

DISABLE: Disables operation in the PGM1 mode.

ENABLE: Enables operation in the PGM1 mode.

- **X1/Z1 MODE (Use the selective entry)**

DISABLE: Disables operation in the X1/Z1 mode.

ENABLE: Enables operation in the X1/Z1 mode.

- **X2/Z2 MODE (Use the selective entry)**

DISABLE: Disables operation in the X2/Z2 mode.

ENABLE: Enables operation in the X2/Z2 mode.

- **AUTO KEY PROG. (Use the selective entry)**

DISABLE: Disables auto key programming operation.

ENABLE: Enables auto key programming operation.

■ Manager

You can program a secret code for each manager.

Procedure

A screenshot of a terminal window showing a menu titled "MANAGER". The menu contains a single option "NOTHING". The top right corner of the screen displays "14 40" and a status bar with four circles and the number "1". The bottom right corner of the screen displays "PGM2".

Pertinent
manager code →

A screenshot of a terminal window showing a screen titled "01" with the text "SECRET CODE" and a numeric input field containing "0000". The top right corner of the screen displays "14 41" and a status bar with four circles and the number "1". The bottom right corner of the screen displays "PGM2".

Program the item as follows:

- **SECRET CODE (Use the numeric entry)**
Secret code (max. 4 digits: 0000 to 9999)

■ Employee

You can program various items for each employee.

Procedure

14:42 0001
EMPLOYEE
--- NOTHING ---
PGM2

LOCATION#4 00
PGM2

Program each item as follows:

- **SECRET CODE (Use the numeric entry)**
Secret code (max. 4 digits: 0000 to 9999)
- **NAME (Use the character entry)**
Name for the employee. Up to 8 characters can be entered.
- ***1 CLERK CODE (Use the numeric entry)**
Clerk code (max. 4 digits: 0001 to 9999)
- **MANAGER CODE (Use the numeric entry)**
Manager code (max. 2 digits: 01 to 99)
The manager who is responsible or capable for adjustments to the employee's hours.
- **STD. HOURS (Use the numeric entry)**
Standard number of hours for which the employee should work a day (max. 3 digits: 0 to 999)
- ***2 LOCATION#1 through #4 (Use the numeric entry)**
Job location table number (max. 2 digit: 01 to 99)

NOTE

- *1 *The clerk whom an employee code has been assigned cannot time in unless the corresponding employee times in.*
- *2 *If no job location table number is programmed for an employee time-in operation, the location no. 1 will be assigned. Therefore, make sure to program a job location table number for "LOCATION#1."*

■ Job location table

You can program three functions for each job location table number which is assigned to employees.

Procedure

14 42 0001

JOB LOCATE TBL

14:43 0001

01
TEXT
SALARY AMOUNT 0.00
OVER-TIME RATE 0.00

PGM2
a

Program each item as follows:

- **JOB LOCATE TBL (Use the numeric entry)**

Job location table number (1 to 99)

- **TEXT (Use the character entry)**

Description for the job location table. Up to 12 characters can be entered.

- **SALARY AMOUNT (Use the numeric entry)**

Salary amount paid for the employee (max. 4 digits: 0 to 99.99)

- *** OVER-TIME RATE (Use the numeric entry)**

Rate for overtime work (max. 3 digits: 0.01 to 9.99)

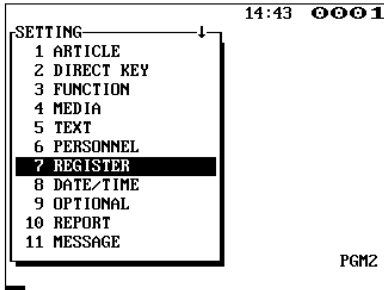

NOTE

* $Overtime\ pay = SALARY\ AMOUNT \times OVER-TIME\ RATE$

Register Programming

Use the following procedure to select any option included in the register group:

Procedure

1. In the SETTING window, select "7 REGISTER."
 - The REGISTER window will appear.

2. Select any option from the following options list:

- | | |
|-------------------|--------------------|
| 1 MACHINE#: | Machine number |
| 2 CC#: | Consecutive number |
| 3 INTERVAL TIMER: | Interval timer |

The following illustration shows those options included in the register programming group.

- ➡ See "■Machine number" on page 173.
- ➡ See "■Consecutive number" on page 173.
- ➡ See "■Interval timer" on page 173.

■ Machine number

When your store has two or more POS terminals, it is practical to assign them unique machine numbers for their identification.

Procedure

14:45 00001
MACHINE#
MACHINE# 000000
PGM2

Program the item as follows:

- **MACHINE# (Use the numeric entry)**
Machine number (max. 6 digits: 0 to 999999)

■ Consecutive number

The consecutive number is increased by one each time a receipt is issued.

Procedure

14:46 00001
CC#
CONSECUTIVE# 0015
PGM2

Program the item as follows:

- **CONSECUTIVE# (Use the numeric entry)**
Enter a number (max. 4 digits: 0 to 9999) that is one less than the desired starting number.

■ Interval timer

You can program the timer for drawer opening and a screen save mode for the POS terminal.

Procedure

14:47 00001
INTERVAL TIMER
DRAWER ALARM 000
SCREEN SAVE 00
PGM2

Program each item as follows:

- **DRAWER ALARM (Use the numeric entry)**
Alarm length of time with drawer opening (0 to 255 seconds)
 - Your POS terminal starts to monitor how long the drawer is kept open the moment the drawer is opened at the end of a transaction in the REG/VOID mode. It stops the time monitoring when a valid key (except the **VP**, **SLIP**, and **RCPT** keys) is pressed for the next transaction. It restarts the time monitoring after that transaction is ended. You can stop the buzzer alarm by closing the drawer. No key entries can be made while the buzzer is sounding. If the number "0" is entered, this function will be unavailable.
- **SCREEN SAVE (Use the numeric entry)**
Screen save mode timer (max. 2 digits: 0 to 99 minutes)
If the number "0" is entered, this function will be unavailable.

Date/Time Setting

Use the following procedure to select the menu option "8 DATE/TIME":

■ Date/time

You can set the date and time for the POS terminal.

Procedure

14 47 0001

SETTING

- 1 ARTICLE
- 2 DIRECT KEY
- 3 FUNCTION
- 4 MEDIA
- 5 TEXT
- 6 PERSONNEL
- 7 REGISTER
- 8 DATE/TIME**
- 9 OPTIONAL
- 10 REPORT
- 11 MESSAGE

PGM2

DATE	151197
TIME	1448

PGM2

Set each item as follows:

• DATE (Use the numeric entry)

Enter the day (2 digits), month (2 digits), and year (2 digits) in this sequence.

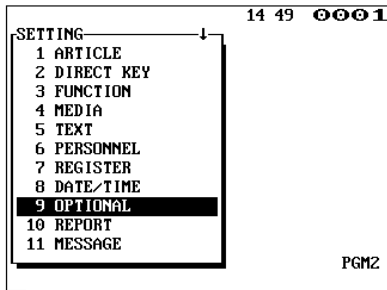

• TIME (Use the numeric entry)

Set the time (max. 4 digits) on the 24-hour system. For example, when the time is set to 2:30 AM, enter 0230; and when it is set to 2:30 PM, enter 1430. The time will be printed and displayed. Once you set the time, the internal clock unit will continue to run as long as the built-in battery pack is charged and also update the date (day, month, year) properly.

Optional Feature Selection

Use the following procedure to select any option included in the optional group:

Procedure

1. In the SETTING window, select "9 OPTIONAL."
 - The OPTIONAL window will appear.

2. Select any option from the following options list:

- | | |
|--------------------|----------------------|
| 1 FUNC. PROHIBIT: | Function prohibition |
| 2 FUNC. SELECTING: | Function selection |
| 3 PRINTING SELECT: | Printing selection |

The following illustration shows those options included in the optional feature programming group.

- | | | |
|------------|-------------------|--|
| 9 OPTIONAL | 1 FUNC. PROHIBIT | ➡ See "■Function prohibition" on page 176. |
| | 2 FUNC. SELECTING | ➡ See "■Function selection" on page 177. |
| | 3 PRINTING SELECT | ➡ See "■Printing selection" on page 179. |

■ Function prohibition

Your POS terminal allows you to select whether to enable or disable various functions.

Procedure

FUNC. PROHIBIT	
OP X/Z REPORT	ENABLE
PO ENTRY IN REG	ENABLE
RF/RETURN IN REG	ENABLE
1st LAST ITEM VD	ENABLE
DIRECT VD IN REG	ENABLE
INDIR. VD IN REG	ENABLE
SBTL VD IN REG	DISABLE
ITEM VP	ENABLE
INTERMEDIATE GLU	ENABLE
VIP SALES	ENABLE
GLU FINALIZE	ENABLE

Program each item as follows:

• OP X/Z REPORT (Use the selective entry)

DISABLE: Disables clerk report printing in the OP X/Z mode.

ENABLE: Enables clerk report printing in the OP X/Z mode.

• PO ENTRY IN REG (Use the selective entry)

DISABLE: Disables a paid-out entry in the REG mode.

ENABLE: Enables a paid-out entry in the REG mode.

• RF/RETURN IN REG (Use the selective entry)

DISABLE: Disables a refund & return entry in the REG mode.

ENABLE: Enables a refund & return entry in the REG mode.

• 1st LAST ITEM VD (Use the selective entry)

DISABLE: Disables first-item direct void.

ENABLE: Enables first-item direct void.

• DIRECT VD IN REG (Use the selective entry)

DISABLE: Disables direct void in the REG mode.

ENABLE: Enables direct void in the REG mode.

• INDIR. VD IN REG (Use the selective entry)

DISABLE: Disables indirect void in the REG mode.

ENABLE: Enables indirect void in the REG mode.

• SBTL VD IN REG (Use the selective entry)

DISABLE: Disables subtotal void in the REG mode.

ENABLE: Enables subtotal void in the REG mode.

• ITEM VP (Use the selective entry)

DISABLE: Disables item validation printing.

ENABLE: Enables item validation printing.

• INTERMEDIATE GLU (Use the selective entry)

DISABLE: Disables intermediate GLU reading in the REG mode.

ENABLE: Enables intermediate GLU reading in the REG mode.

• VIP SALES (Use the selective entry)

DISABLE: Disables VIP sales in the REG mode.

ENABLE: Enables VIP sales in the REG mode.

• GLU FINALIZE (Use the selective entry)

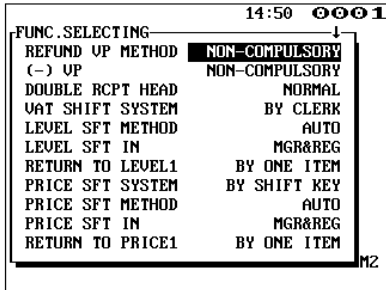

DISABLE: Disables GLU finalization after ordering.

ENABLE: Enables GLU finalization after ordering.

■ Function selection

Your POS terminal enables you to select various functional selections.

Procedure

The screen continues.

Program each item as follows:

• REFUND VP METHOD (Use the selective entry)

COMPULSORY: Compulsory refund validation printing

NON-COMPULSORY: Non-compulsory refund validation printing

• (-) VP (Use the selective entry)

COMPULSORY: Compulsory minus validation printing

NON-COMPULSORY: Non-compulsory minus validation printing

• DOUBLE RCPT HEAD (Use the selective entry)

1 LINE: Prints a one-line header on a double receipt.

NORMAL: Prints a normal header on a double receipt.

• VAT SHIFT SYSTEM (Use the selective entry)

BY SHIFT KEY: Allows VAT shift to be accomplished by the shift key.

BY CLERK: Allows VAT shift to be accomplished by a clerk.

• LEVEL SFT METHOD (Use the selective entry)

MANUAL: Lock shift mode

AUTO: Automatic return mode

• LEVEL SFT IN (Use the selective entry)

MGR: Allows PLU level shift only in the MGR mode.

MGR®: Allows PLU level shift in the MGR and REG modes.

• RETURN TO LEVEL1 (Use the selective entry)

When the PLU level shift system is set to "AUTO," the PLU level can be returned to level 1 by one of the following methods:

BY ONE RECEIPT: Returns the PLU level to level 1 by one receipt.

BY ONE ITEM: Returns the PLU level to level 1 by one item.

• PRICE SFT SYSTEM (Use the selective entry)

BY CLERK: Allows PLU price level shift to be accomplished by a clerk.

BY SHIFT KEY: Allows PLU price level shift to be accomplished by the shift key.

• PRICE SFT METHOD (Use the selective entry)

MANUAL: Lock shift mode

AUTO: Automatic return mode

• PRICE SFT IN (Use the selective entry)

MGR: Permits PLU price level shift only in the MGR mode.

MGR®: Permits PLU price level shift in the MGR and REG modes.

■ Function selection (continued)

- **RETURN TO PRICE1 (Use the selective entry)**

When the PLU price level shift method is set to "AUTO," the price level can be returned to price 1 by one of the following methods:

BY ONE RECEIPT: Returns the price level to price 1 by one receipt.

BY ONE ITEM: Returns the price level to price 1 by one item.

- **PERSON NUMBER (Use the selective entry)**

COMPULSORY: Makes a person number entry (GLU operations) compulsory

INHIBIT: Inhibits a person number entry (GLU operations).

- **UPDATING OF QTY (Use the selective entry)**

YES: Updates the sales quantity of VIP sale.

NO: Does not update the sales quantity of VIP sale.

- **NON-TURNOVER (Use the selective entry)**

YES: Enables non-turnover including VAT.

NO: Disables non-turnover including VAT.

- **CREDIT IN RA/PO (Use the selective entry)**

YES: Updates a credit totalizer when finalizing a received-on-account or a paid-out entry by a credit key.

NO: Does not update a credit totalizer when finalizing a received-on-account or a paid-out entry by a credit key.

- **SHIFT KEY ACTION (Use the selective entry)**

CAPS LOCK: Locks the upper-case letter mode once the shift key is pressed.

SHIFT: Shifts the upper-case letter mode to the lower-case letter mode after a letter is entered.

■ Printing selection

You can program various printing functions.

Procedure

PRINTING SELECT		14:51	0001
# OF PURCHASES	NOT PRINT		
TIME	PRINT		
JOURNAL SELECT	FULL PRINT		
JOURNAL LETTER	SMALL		
VAT/TAX AMOUNT	PRINT		
TAXABLE AMOUNT	PRINT		
NET AMOUNT	PRINT		
VAT/TAX ON BILL	PRINT		
TAXABLE ON BILL	PRINT		
NET ON BILL	PRINT		
TIME ON BILL	PRINT		

The screen continues.

Program each item as follows:

- **# OF PURCHASES (Use the selective entry)**

NOT PRINT: Does not print the number of purchases.

PRINT: Prints the number of purchases.

- **TIME (Use the selective entry)**

NOT PRINT: Does not print the time on the receipt and journal.

PRINT: Prints the time on the receipt and journal.

- **JOURNAL SELECT (Use the selective entry)**

JOURNAL SELECT: Prints the information on all entries other than normal department entries (entries into "+" departments and their associated "+" PLUs) on the journal.

FULL PRINT: Prints the detailed information on the journal.

- **JOURNAL LETTER (Use the selective entry)**

NORMAL : Prints the normal-size letters on the journal.

SMALL : Prints the compressed-size letters on the journal.

- **VAT/TAX AMOUNT (Use the selective entry)**

NOT PRINT: Does not print VAT or tax amounts on the receipt and journal.

PRINT: Prints VAT or tax amounts on the receipt and journal.

- **TAXABLE AMOUNT (Use the selective entry)**

NOT PRINT: Does not print taxable amounts on the receipt and journal.

PRINT: Prints taxable amounts on the receipt and journal.

- **NET AMOUNT (Use the selective entry)**

NOT PRINT: Does not print net amounts on the receipt and journal.

PRINT: Prints net amounts on the receipt and journal.

- **VAT/TAX ON BILL (Use the selective entry)**

NOT PRINT: Does not print VAT or tax amounts on the bill.

PRINT: Prints VAT or tax amounts on the bill.

- **TAXABLE ON BILL (Use the selective entry)**

NOT PRINT: Does not print taxable amounts on the bill.

PRINT: Prints taxable amounts on the bill.

■ Printing selection (continued)

- **NET ON BILL (Use the selective entry)**

NOT PRINT: Does not print net amounts on the bill.

PRINT: Prints net amounts on the bill.

- **TIME ON BILL (Use the selective entry)**

NOT PRINT: Does not print the time on the bill.

PRINT: Prints the time on the bill.

- **BILL ON SLIP (Use the selective entry)**

NOT PRINT: Does not print the bill on the slip.

PRINT: Prints the bill on the slip.

- **BILL ON RECEIPT (Use the selective entry)**

NOT PRINT: Does not print the bill on the receipt.

PRINT: Prints the bill on the receipt.

- **INTERMED ON SLIP (Use the selective entry)**

NOT PRINT: Does not print the details of intermediate GLU reading on the slip.

PRINT: Prints the details of intermediate GLU reading on the slip.

- **INTERMED ON RCPT (Use the selective entry)**

NOT PRINT: Does not print the details of intermediate GLU reading on the receipt.

PRINT: Prints the details of intermediate GLU reading on the receipt.

- **SEPARATOR LINE (Use the selective entry)**

SEPARATOR LINE: Prints separator lines in the report.

1 LINE: Creates one-line space instead of printing separator lines in the report.

- **LINK PLU TEXT (Use the selective entry)**

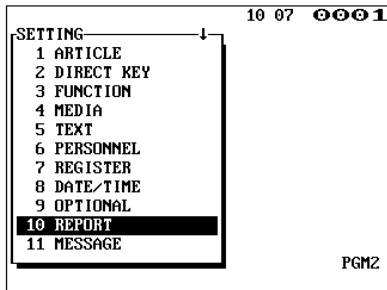

PARENT PLU TEXT: Prints parent PLU text of linked PLUs with totalizer.

EACH PLU TEXT: Prints each PLU text of linked PLUs.

Report Programming

Use the following procedure to select any option included in the report group:

Procedure

1. In the SETTING window, select "10 REPORT."
 - The REPORT window will appear.

2. Select any option from the following options list:

- | | |
|-------------------|-----------------------|
| 1 0 SKIP: | Zero skip |
| 2 GNR RPT FORMAT: | General report format |
| 3 HOURLY RPT: | Hourly report |
| 4 STACKED RPT: | Stacked report |

The following illustration shows those options included in the report programming group.

■ Zero skip

You can program whether or not to skip "0" in each report.

Procedure

The screenshot shows a terminal window with a menu for selecting skip options for various reports. The menu is displayed in a box with a black border. The time 10:08 and some status icons are visible at the top right of the terminal. The menu items are:

0 SKIP	
CLERK	SKIP
TRANSACTION	SKIP
DEPARTMENT	SKIP
PLU	SKIP
HOURLY	SKIP
DAILY NET	SKIP

The label PGM2 is visible at the bottom right of the terminal window.

Program each item as follows:

• CLERK (Use the selective entry)

- SKIP: Skips those data that are "0" in the clerk report.
- NOT SKIP: Does not skip those data that are "0" in the clerk report.

• TRANSACTION (Use the selective entry)

- SKIP: Skips those data that are "0" in the transaction report.
- NOT SKIP: Does not skip those data that are "0" in the transaction report.

• DEPARTMENT (Use the selective entry)

- SKIP: Skips those data that are "0" in the department report.
- NOT SKIP: Does not skip those data that are "0" in the department report.

• PLU (Use the selective entry)

- SKIP: Skips those data that are "0" in the PLU report.
- NOT SKIP: Does not skip those data that are "0" in the PLU report.

• HOURLY (Use the selective entry)

- SKIP: Skips those data that are "0" in the hourly report.
- NOT SKIP: Does not skip those data that are "0" in the hourly report.

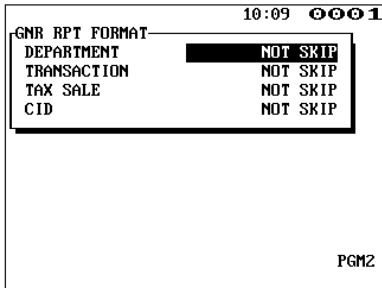

• DAILY NET (Use the selective entry)

- SKIP: Skips those data that are "0" in the daily net report.
- NOT SKIP: Does not skip those data that are "0" in the daily net report.

■ General report format

You can program whether or not to skip the following items in the general report.

Procedure

```
10:09 0001
GNR RPT FORMAT
DEPARTMENT      NOT SKIP
TRANSACTION     NOT SKIP
TAX SALE       NOT SKIP
CID            NOT SKIP
PGM2
```

Program each item as follows:

- **DEPARTMENT (Use the selective entry)**

SKIP: Skips department data in the general report.
NOT SKIP: Does not skip department data in the general report.

- **TRANSACTION (Use the selective entry)**

SKIP: Skips transaction data in the general report.
NOT SKIP: Does not skip transaction data in the general report.

- **TAX SALE (Use the selective entry)**

SKIP: Skips tax data in the general report.
NOT SKIP: Does not skip tax data in the general report.

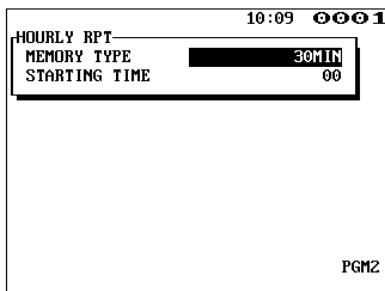

- **CID (Use the selective entry)**

SKIP: Skips cash-in-drawer data in the general report.
NOT SKIP: Does not skip cash-in-drawer data in the general report.

■ Hourly report

You can program the memory type and the starting time for the hourly report.

Procedure

```
10:09 0001
HOURLY RPT
MEMORY TYPE    30MIN
STARTING TIME  00
PGM2
```

Program each item as follows:

- **MEMORY TYPE (Use the selective entry)**

15MIN: Selects the 15-minute type.
30MIN: Selects the 30-minute type.

- **STARTING TIME (Use the numeric entry)**

Starting time entry (max. 2 digits: 0 to 23)

■ Stacked report

Your POS terminal is equipped with the stacked report printing function that enables multiple X/Z reports to be printed in sequence with a single request.

Procedure

Select a stacked report no. from the stacked reports list.

```

REPORT 1
01
02
03
04
05
06
07
08
09
10
11
PGM2
    
```

The screen continues.

```

01
01 GENERAL
02 BALANCE
03 DEPT./GROUP
04 DEPT. IND. GROUP
05 DEPT.GROUP TOTAL
06 PLU
07 PLU BY DEPT
08 PLU IND. GROUP
09 PLU GROUP TOTAL
10 PLU STOCK
11 PLU COST
PGM2
    
```

The screen continues.

When you are allowed to set the parameter of a report, the following pop-up window will appear.

```

DEPT./GROUP
START CODE 01
END CODE 99
05 DEPT.GROUP TOTAL
06 PLU
07 PLU BY DEPT
08 PLU IND. GROUP
09 PLU GROUP TOTAL
10 PLU STOCK
11 PLU COST
PGM2
    
```

You can select a maximum of twenty reports from the stacked reports list. Some reports can be set their parameters such as "START CODE" and "END CODE."

- **01 GENERAL**
General report
- **02 BALANCE**
Balance report
- **03 DEPT./GROUP (Use the numeric entry)**
Full department report
Parameter: Starting department code/ending department code (1 through 99)
- **04 DEPT.IND.GROUP (Use the numeric entry)**
Individual group report on departments
Parameter: Department group no. (1 through 17)
- **05 DEPT.GROUP TOTAL**
Full group total report on departments
- **06 PLU (Use the numeric entry)**
PLU report by designated range
Parameter: Starting PLU code/ending PLU code (1 through 999999)
- **07 PLU BY DEPT (Use the numeric entry)**
PLU report by associated department
Parameter: Department code (1 through 99)
- **08 PLU IND. GROUP (Use the numeric entry)**
PLU report by individual group
Parameter: PLU group no. (00 through 99)
- **09 PLU GROUP TOTAL**
Full group total report on PLUs
- **10 PLU STOCK (Use the numeric entry)**
PLU stock report
Parameter: Starting PLU code/ending PLU code (1 through 999999)
- **11 PLU COST (Use the numeric entry)**
PLU cost report
Parameter: Starting PLU code/ending PLU code (1 through 999999)
- **12 PLU TOP 20 (Use the selective entry)**
PLU top 20 report
Parameter: AMOUNT/QUANTITY

■ Stacked report (continued)

- **13 PLU ZERO SALES (Use the selective/numeric entry)**
PLU zero sales report
Parameter: 1 ALL/2 BY DEPT.
When "2 BY DEPT." is selected, enter a department code (1 through 99).
- **14 PLU MIN. STOCK (Use the numeric entry)**
PLU minimum stock report
Parameter: Starting PLU code/ending PLU code (1 through 999999)
- **15 PLU HOURLY GROUP (Use the numeric entry)**
PLU hourly group report
Parameter: Starting time/ending time (0 through 2345)
- **16 TRANSACTION**
Transaction report
- **17 TL-ID**
Total in drawer report
- **18 COMMISSION SALES**
Commission sales report
- **19 TAX**
Tax report
- **20 CHIEF**
Chief report
- **21 ALL CLERK**
Full clerk report
- **22 IND. CLERK**
Individual clerk report
- **23 DD ERROR**
Drink dispenser error reading report
- **24 DD RESET**
Drink dispenser resetting report
- **25 EMPLOYEE (Use the numeric entry)**
Employee report
Parameter: Starting employee code/ending employee code (1 through 999999999)
- **26 EMP. ADJUSTMENT (Use the numeric entry)**
Employee adjustment report
Parameter: Starting employee code/ending employee code (1 through 999999999)
- **27 EMP. ACTIVE STS. (Use the numeric entry)**
Employee active status report
Parameter: Starting employee code/ending employee code (1 through 999999999)

■ Stacked report (continued)

- **28 HOURLY (Use the numeric entry)**

Hourly report

Parameter: Starting time/ending time (0 through 2345)

NOTE

To take the hourly Z report, you have to specify the full-range hourly report.

- **29 LABOR COST%**

Labor cost percent report

- **30 DAILY NET**

Daily net report

- **31 INGREDIENT STOCK (Use the numeric entry)**

Ingredient stock report

Parameter: Starting ingredient no./ending ingredient no. (1 through 999)

- **32 GLU (Use the numeric entry)**

GLU/PBLU report

Parameter: Starting GLU code/ending GLU code (1 through 99999999)

- **33 GLU BY CLERK**

GLU/PBLU report by clerk

- **34 DRIVE THRU (Use the numeric entry)**

Drive-through report

Parameter: Starting drive-through code/ending drive-through code (1 through 99999999)

- **35 D-THRU BY CLERK**

Drive-through report by clerk

Message Programming

Use the following procedure to select any option included in the message group:

Procedure

11 10 0001

SETTING

- 1 ARTICLE
- 2 DIRECT KEY
- 3 FUNCTION
- 4 MEDIA
- 5 TEXT
- 6 PERSONNEL
- 7 REGISTER
- 8 DATE/TIME
- 9 OPTIONAL
- 10 REPORT
- 11 MESSAGE**

PGM2

11 13 0001

MESSAGE

- 1 RECEIPT LOGO**
- 2 FREE TEXT
- 3 UP TEXT
- 4 SLIP TEXT
- 5 PAYEE NAME

PGM2

1. In the SETTING window, select "11 MESSAGE."
 - The MESSAGE window will appear.

2. Select any option from the following options list:

- 1 RECEIPT LOGO: Receipt logo
- 2 FREE TEXT: Free text
- 3 VP TEXT: Validation printing text
- 4 SLIP TEXT: Slip text
- 5 PAYEE NAME: Payee name (for English check)

The following illustration shows those options included in the text programming group.

- ➡ See "Receipt logo" on page 188.
- ➡ See "Free text" on page 188.
- ➡ See "Validation printing text" on page 189.
- ➡ See "Slip text" on page 189.
- ➡ See "Payee name" on page 190.

■ Receipt logo

Your POS terminal can print programmed messages for customers on every receipt.

Procedure

Program the item as follows:

• RECEIPT LOGO (Use the character entry)

Logo text for the receipt (max. 40 characters x 6 lines)
Entering sequential characters "=" will print the corresponding clerk name in the footer logo message. Enter four to eight characters "=".

NOTE

The programmable number of lines for a message varies according to the following message types:

- 3-line header message type
- Graphical logo only type
- Graphical logo and 3-line footer message type
- 6-line header message type
- 3-line header and 3-line footer messages type
- 3-line header message, graphical logo, and 3-line footer message type
- Graphical logo and 3-line header and 3-line footer messages type

Please contact your authorized SHARP dealer.

■ Free text

Your POS terminal can print programmed texts for departments and PLUs on every receipt.

Procedure

Select a pertinent text number from the free texts list.

Program the item as follows:

• FREE TEXT (Use the character entry)

Free texts for departments and PLUs (max. 99 texts/30 characters per text)

■ Validation printing text

Your POS terminal can print programmed messages for customers on the validation slip.

Procedure

Program the item as follows:

- **VP TEXT (Use the character entry)**

Texts for the validation slip (3 lines/max. 30 characters per line)

■ Slip text

Your POS terminal can print programmed messages for customers on the slip.

Procedure

Program the item as follows:

- **SLIP TEXT (Use the character entry)**

Texts for the slip (3 lines/max. 30 characters per line)

■ Payee name

Your POS terminal can print programmed payee names for English checks.

Procedure

11:26 [signal strength]

PAYEE NAME

-

PGM2
a

Program the item as follows:

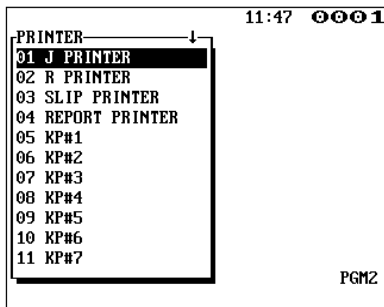

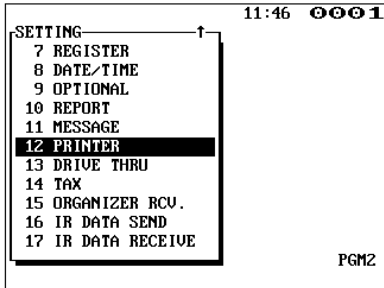

- **PAYEE NAME (Use the character entry)**

Name for the payee for English check (2 lines/max. 30 characters per line)

Printer Programming

Use the following procedure to select a printer programming:

Procedure

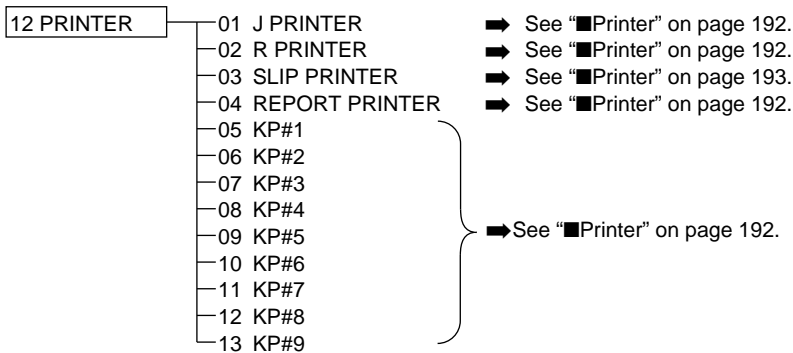

The screen continues.

1. In the SETTING window, select "12 PRINTER."
 - The PRINTER window will appear.

2. Select any option from the following options list:

01 J PRINTER:	Journal printer
02 R PRINTER:	Receipt printer
03 SLIP PRINTER:	Slip printer
04 REPORT PRINTER:	Report printer
05 KP#1:	Remote printer #1
06 KP#2:	Remote printer #2
07 KP#3:	Remote printer #3
08 KP#4:	Remote printer #4
09 KP#5:	Remote printer #5
10 KP#6:	Remote printer #6
11 KP#7:	Remote printer #7
12 KP#8:	Remote printer #8
13 KP#9:	Remote printer #9

The following illustration shows those options included in the printer programming group.

■ Printer (journal printer, receipt printer, report printer and remote printer)

You can program various printing functions for each printer.

Procedure

Select a pertinent printer name from the printers list.

```
R PRINTER 12:04
PRINTER NAME  EPSON TM-T85
AUTO CUTTER    YES
PAPER SHEET    ONE SHEET
RCPT LENGTH    00
PGM2
```

Program each item as follows:

• PRINTER NAME (Use the selective entry)

Select the printer to be used.
SHARP ER-01PU (Printer)
SHARP ER-03/04RP (Printer)
EPSON TM-T80 (Printer)
EPSON TM-T85 (Printer)
EPSON TM-T300 (Printer)

• AUTO CUTTER (Use the selective entry)

Auto cutter function
YES: Enables auto cutter function.
NO: Disables auto cutter function.

NOTE

When "ER-03RP" is connected, select "NO."

• PAPER SHEET (Use the selective entry)

Select a paper type.
TWO OR MORE: Uses two or more sheets.
ONE SHEET: Uses one sheet.

NOTE

This option is available when the "TM-300" is selected.

• RCPT LENGTH (Use the numeric entry)

Minimum length of the bill to be printed paper on the receipt paper

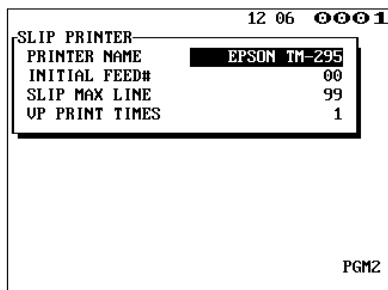

NOTE

This option is displayed only in the "R PRINTER" window.

■ Printer (slip printer)

Procedure

Select "04 SLIP PRINTER" from the printers list.

The screenshot shows a terminal window with the following content:

```
12 06 0001
SLIP PRINTER
PRINTER NAME      EPSON TM-295
INITIAL FEED#     00
SLIP MAX LINE     99
VP PRINT TIMES    1
PGM2
```

Program each item as follows:

- **PRINTER NAME (Use the selective entry)**
Select the printer to be used.
EPSON TM-295 (Slip printer)
SHARP ER-FBP40 (Slip printer)
- **INITIAL FEED# (Use the numeric entry)**
Initial line feed for a slip (0 to 64 lines)
- **SLIP MAX LINE (Use the numeric entry)**
Maximum number of lines printable on a slip (0 to 99)
- **VP PRINT TIMES (Use the numeric entry)**
Number of times of validation printing (0 to 9)

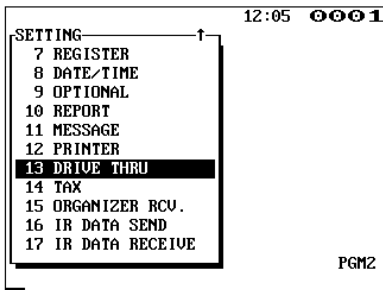

Drive-through Code Programming

Use the following procedure to select the menu option "13 DRIVE THRU":

■ Drive-through code

You can program the range of available drive-through codes.

Procedure

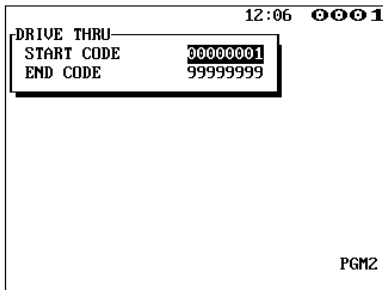

12:05 0001

SETTING

- 7 REGISTER
- 8 DATE/TIME
- 9 OPTIONAL
- 10 REPORT
- 11 MESSAGE
- 12 PRINTER
- 13 DRIVE THRU**
- 14 TAX
- 15 ORGANIZER RCU.
- 16 IR DATA SEND
- 17 IR DATA RECEIVE

PGM2

12:06 0001

DRIVE THRU

START CODE	0000001
END CODE	9999999

PGM2

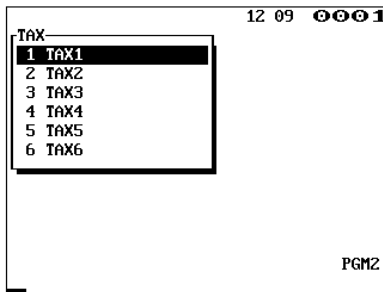

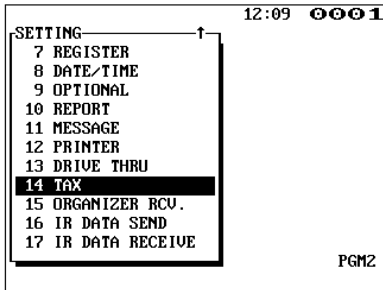

Program each item as follows:

- **START CODE (Use the numeric entry)**
Starting drive-through code (max. 8 digits: 1 to 99999999)
- **END CODE (Use the numeric entry)**
Ending drive-through code (max. 8 digits: 1 to 99999999)

Tax Programming

Use the following procedure to select any option included in the tax group:

Procedure

1. In the SETTING window, select "14 TAX."
 - The TAX window will appear.

2. Select any option from the following options list:

- | | |
|---------|-------|
| 1 TAX1: | Tax 1 |
| 2 TAX2: | Tax 2 |
| 3 TAX3: | Tax 3 |
| 4 TAX4: | Tax 4 |
| 5 TAX5: | Tax 5 |
| 6 TAX6: | Tax 6 |

NOTE

If the **(DEL)** key is pressed on the tax number selection menu, the tax rate in the cursor position will be deleted.

The following illustration shows those options included in the tax programming group.

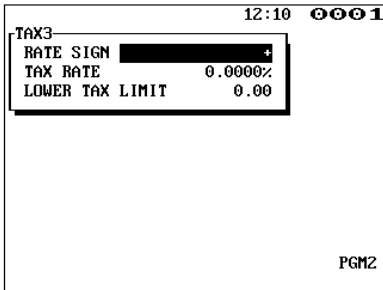

- ➔ See "■Rate (%) tax" on page 196.
- ➔ See "■Rate (%) tax" on page 196.
- ➔ See "■Rate (%) tax" on page 196.
- ➔ See "■Rate (%) tax" on page 196.
- ➔ See "■Rate (%) tax" on page 196.
- ➔ See "■Rate (%) tax" on page 196.

■ Rate (%) tax

You can program a tax rate for each tax rate number.

Procedure

Select a pertinent tax no. from the taxes list.

The screenshot shows a terminal window with the following content:

```
12:10 0001
TAX3
RATE SIGN [REDACTED]
TAX RATE      0.0000%
LOWER TAX LIMIT  0.00
PGM2
```

Program each item as follows:

- **RATE SIGN (Use the selective entry)**

- : Minus rate
- +: Plus rate

- **TAX RATE (Use the numeric entry)**

Tax rate (max. 7 digits: 0.0000 to 999.9999%)

- **LOWER TAX LIMIT (Use the numeric entry)**

Lowest taxable amount (max. 5 digits: 0.01 to 999.99)

- This option is not available in the VAT system.

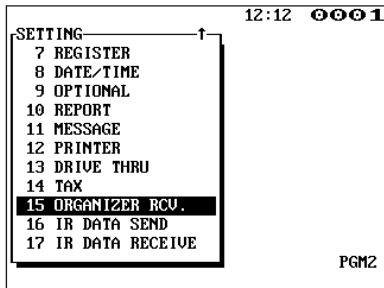

Organizer Programming

Use the following procedure to select the menu option "15 ORGANIZER RCV.":

■ Organizer receive

Your POS terminal can receive data from an "Organizer."

Procedure

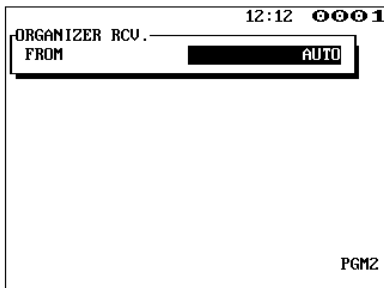

12:12 0001

SETTING

- 7 REGISTER
- 8 DATE/TIME
- 9 OPTIONAL
- 10 REPORT
- 11 MESSAGE
- 12 PRINTER
- 13 DRIVE THRU
- 14 TAX
- 15 ORGANIZER RCV.**
- 16 IR DATA SEND
- 17 IR DATA RECEIVE

PGM2

12:12 0001

ORGANIZER RCV.

FROM

PGM2

Program the item as follows:

• FROM (Use the selective entry)

Receives data from the "Organizer."

AUTO : Selects "IrDA" or "ASK" automatically as an appropriate communication system.

IrDA : Selects "IrDA" for the communication system.

ASK : Selects the "ASK" for the communication system.

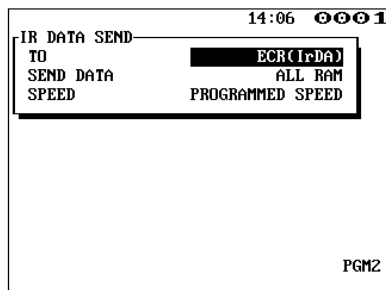

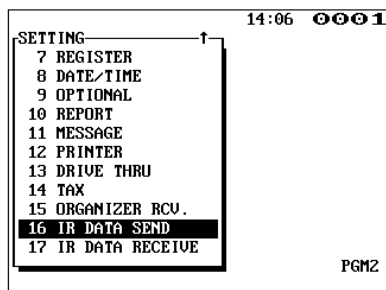

IR Data Send Programming

Use the following procedure to select the menu option “16 IR DATA SEND”:

■ IR data send

Your POS terminal can send data to another device by infrared rays.

Procedure

Program each item as follows:

• TO (Use the selective entry)

Select one of the following options to send data to another device:

ECR(IrDA): Selects “IrDA” for the communication system to communicate with another POS terminal.

ECR(ASK): Selects “ASK” for the communication system to communicate with another POS terminal.

ER-02FD(ASK): Selects “ASK” for the communication system to communicate with the ER-02FD.

• SEND DATA (Use the selective entry)

Select one of the following options (data sources):

ALL RAM
STANDARD RAM
03MB/04MB(1)
03MB/04MB(2)
04MB(3)
04MB(4)
SSP
RESERVED 1
RESERVED 2

• SPEED (Use the selective entry)

Select one of the following options (data transmission speeds):

PROGRAMMED SPEED: Sends data at a programmed speed.

115200bps: Sends data at 115200 bps (for “IrDA” only).

57600bps: Sends data at 57600 bps.

38400bps: Sends data at 38400 bps.

19200bps: Sends data at 19200 bps.

9600bps: Sends data at 9600 bps.

4800bps: Sends data at 4800 bps.

2400bps: Sends data at 2400 bps.

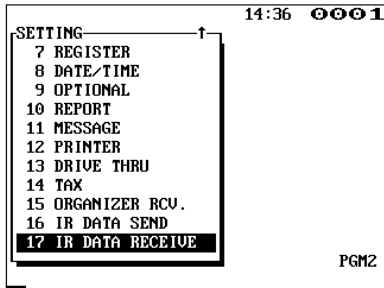

IR Data Receive Programming

Use the following procedure to select the menu option "17 IR DATA RECEIVE":

■ IR data receive

Your POS terminal can receive data from another device by infrared rays.

Procedure

Program each item as follows:

• FROM (Use the selective entry)

Select one of the following options to receive data from another device

ECR(IrDA): Selects "IrDA" for the communication system to communicate with another POS terminal.

ECR(ASK): Selects "ASK" for the communication system to communicate with another POS terminal.

ER-02FD(ASK): Selects "ASK" for the communication system to communicate with the ER-02FD.

• SPEED (Use the selective entry)

Select one of the following options(data transmission speeds):

PROGRAMMED SPEED: Receives data at a programmed speed.

115200bps: Receives data at 115200 bps (for "IrDA" only).

57600bps: Receives data at 57600 bps.

38400bps: Receives data at 38400 bps.

19200bps: Receives data at 19200 bps.

9600bps: Receives data at 9600 bps.

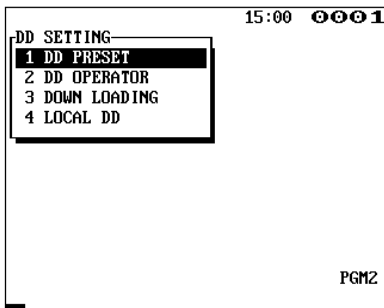

4800bps: Receives data at 4800 bps.

2400bps: Receives data at 2400 bps.

Drink Dispenser Programming

Use the following procedure to select any option included in the drink dispenser programming group:

Procedure

1. In the PGM2 MODE window, select “4 DD SETTING.”
 - The DD SETTING window will appear.

2. Select any option from the following options list:

- | | |
|-----------------|--------------------------|
| 1 DD PRESET: | Drink dispenser preset |
| 2 DD OPERATOR: | Drink dispenser operator |
| 3 DOWN LOADING: | Downloading |
| 4 LOCAL DD: | Local drink dispenser |

NOTE

“4 LOCAL DD” is available only when your POS terminal is used in an inline system.

The following illustration shows those options included in the drink dispenser programming group.

■ Drink dispenser preset

Procedure

DD PRESET	15:01	00001
VALUE NUMBER		000
SEPARATE CODE		000000
CONNECTION		ON-LINE
PRINT FORMAT		PRINT

PGM2

Program each item as follows:

• VALUE NUMBER (Use the numeric entry)

- You can set the link of sort number of drink dispenser and PLU code.
AAA: Value in the hundred thousand's and ten thousand's and thousand's place of a PLU code (0 through 999)
- The conversion of a sort number to a PLU code is made as follows:
Sort number = xxx (max. 3 digits)
PLU code = AAAxxx (max. 6 digits)

NOTE

You cannot change the setting by this option while the received data on drink dispenser sales is stored in the buffer. In this case, a lock error will occur and the message "ENTRY ERROR" will be displayed.

• SEPARATE CODE (Use the numeric entry)

Enter a GLU/PBLU or drive-through separate code (1 through 999999).

For example, if you program "10" for the separate code, GLU/drive-through codes "1" through "10" are used for drive-through codes, and "11" through "999999" are used for GLU codes.

• CONNECTION (Use the selective entry)

OFF-LINE: Makes drink dispenser off-line.

ON-LINE: Makes drink dispenser on-line.

If "OFF-LINE" is selected, data reception from the drink dispenser is disabled. If "ON-LINE" is selected, the manual entry of PLU assigned to the drink dispenser sales article results in error correction of drink dispenser misoperation.

• PRINT FORMAT (Use the selective entry)

NOT PRINT: Does not print a drink dispenser misoperation item when reading a drink dispenser misoperation file (in the clerk report).

PRINT: Prints a drink dispenser misoperation item when reading a drink dispenser misoperation file (in the clerk report).

■ Drink dispenser operator

Procedure

15:11 0001

DD OPERATOR
--- NOTHING ---

PGM2

Pertinent clerk
code

15:11 0001

0001
GLU START CODE 000000
END CODE 000000

PGM2

Program each item as follows:

- **CLERK CODE (Use the numeric entry)**

Enter a clerk code to be assigned to a drink dispenser operator.

- **GLU START CODE (Use the numeric entry)**

Starting GLU code to be assigned to a drink dispenser operator (1 through 999999)

- **GLU END CODE (Use the numeric entry)**

Ending GLU code to be assigned to a drink dispenser operator (1 through 999999)

NOTE

If the **ENTER** key is pressed without setting the range after entering a clerk code, the drink dispenser sales by the entered clerk will be unavailable.

■ Downloading

This option is used to download drink dispenser clerk assignment information to drink dispenser.

To transfer this information, the drink dispenser must be initialized and set to on-line mode in advance.

Initialization can be performed from the drink dispenser or from your POS terminal. To initialize from POS terminal, use X1/Z1 mode job.

Procedure

15 13 0001

DD SETTING
1 DD PRESET
2 DD OPERATOR
3 DOWN LOADING
4 LOCAL DD

PGM2

Automatic Sequencing Key Programming

If you program frequently performed key operations for the AUTO keys, you can enter those key operations simply by pressing the corresponding AUTO keys in key operations.

Procedure

To program an automatic sequencing key as follows:

Select "7 AUTO KEY MODE" from the mode selection window.

1. Press a pertinent automatic sequencing key which you want to program.

AUTO 1

2. Enter the desired sequence to use the automatic sequencing key in the programmed sequence.

700 → 1 → TL

3. Press the automatic sequencing key again.

AUTO 1

4. Press the **MODE]** key to finalize the programming.

Reading of Stored Programs

You can read programs stored in the PGM1 or PGM2 mode.

■ Program reading sequence

To read those programs stored in the PGM1 or PGM2 mode, use one of the following procedures:

Selecting an item from the menu

1. Select "1 READING" in the PGM1 or PGM2 mode menu window to display the items list.
2. Select an item listed in the table shown later.
3. If needed, enter starting and ending codes to specify the range of the selected item.
4. Select a device ("DISPLAY" or "REPORT PRINTER") to receive the output.

NOTE

To read "drink dispenser," select "3 DD READING" in the PGM2 mode menu window.

Entering a job code

1. Enter a job code listed in the table shown later in the PGM1 or PGM2 mode menu window.

XXXX →

2. If needed, enter starting and ending codes to specify the range of the selected item.
3. Select a device ("DISPLAY" or "REPORT PRINTER") to receive the output.

Job code:	Item:	Description:	Available mode:

14 Drink Dispenser

Your POS terminal can be connected with a drink dispenser.
The summary of drink dispenser operations is shown below.

When an entry error is found, perform the following steps:

1. Check the error by the drink dispenser misoperation file reading or drink dispenser error reading.
 - Drink dispenser misoperation file reading → REG or MGR mode
 - Clerk report → OP X/Z or X1/Z1 mode
 - Drink dispenser error reading → X1/Z1 mode
2. Correct the error with the drink dispenser correction in the REG or MGR mode.

The error which relates to GLU codes can be corrected. However, the error which relates to PLU codes or clerk codes cannot be corrected with the drink dispenser correction.
3. Clear the data from the drink dispenser.

The data can be cleared with the drink dispenser reset in the Z1 mode.

■ Drink dispenser misoperation and misoperation file

The error caused by misoperation during drink dispenser sales registration or missetting is recorded in the drink dispenser misoperation file.

■ Causes of drink dispenser misoperation

	Causes	Processing	Error message (J/R print out)
For PLU	No PLU code	2	NO RECORD
	PLU code inhibited	2	ENTRY ERROR
	Preset price entry is inhibited.	2	ENTRY ERROR
	It's set PLUs, link PLUs, condiment PLUs or condiment type	2	ENTRY ERROR
For GLU	GLU exceeding 9 digits *	1	ENTRY ERROR
	GLU code not allowed to clerk *	1	ENTRY ERROR
	GLU code assigned to other clerk *	1	NO AUTHORITY
For clerk	Clerk code is not defined.	2	NO RECORD
Others	GLU buffer full *	1	ENTRY ERROR
	Transaction amount overflow * (Exceeding 9 digits)	1	ENTRY ERROR
	One item amount overflow * (Multiplication registration in the GLU/PBLU system)	1	ENTRY ERROR

* Causes of misoperation relating only to the GLU/PBLU system.

NOTE

Processing 1 or 2 discriminates the processing type explained on the following pages.

■ Disposal of misoperation

The following two types of misoperation disposal are possible:

Type 1: Misoperation in the case when there is established clerk code which has been defined by the POS terminal based on the clerk code inputted from the drink dispenser and the PLU assigned by using the sort number of drink dispenser sales.

Such a misoperation is recorded in the drink dispenser misoperation file. At this time the following data is updated:

- Totalizer for the associated department
 - Totalizer for each PLU
 - Stock counter (if controlled)
- (Data of pertinent clerk)
- Order total
 - Commission sales amount
 - Non-commission sales amount

Type 2: Fatal error in the case when the clerk code and PLU code of information (clerk code, GLU code, sort number) sent from the drink dispenser cannot be identified and the totalizers for clerk or PLUs cannot be updated.

Such an error is recorded in the drink dispenser misoperation file without updating of totalizers. Accordingly, these errors are not registered in the POS terminal. They are recorded only in the drink dispenser misoperation file. These errors cannot be corrected with the correction operation.

These errors are roughly classified into the following two groups :

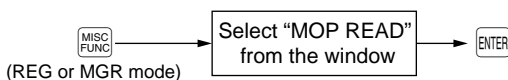

- Errors which make it impossible to identify the PLU code.
- Errors which make it impossible to identify the clerk code.

The former error is printed out with correction disabled mark when reading the drink dispenser misoperation or reading the drink dispenser misoperation of clerk report. If the clerk code cannot be identified, the error cannot be read by drink dispenser misoperation read operation but read/reset is possible in the X/Z mode. However, if the clerk code corresponding to the clerk code is defined in the POS terminal system after occurrence of error whose clerk code cannot be identified, it cannot be corrected with the correction operation. Accordingly, it is printed out as drink dispenser error read list, being distinguished from the ordinary misoperation read.

■ Misoperation file reading

Each clerk can print or display out only his/her misoperation data in the misoperation file in the REG or MGR mode.

Procedure

NOTE

The data of the drink dispenser misoperation file can be printed or displayed out as well in the OP X/Z and X1/Z1 modes.

■ Correction of drink dispenser articles in a drink dispenser misoperation file

When a clerk recognizes that a drink dispenser misoperation file has a record, the clerk can correct the drink dispenser operation by selecting of the drink dispenser article on the screen.

Procedure

NOTE

- The contents of the first GLU code in the misoperation file are displayed in the left window.
- The pick-uped items from the left window are displayed in the right window. These items are stored in the destination GLU code when the **TL** key is pressed.
- The item which is moved is selected by the cursor (**↑** and **↓**) keys.
- When the **→** key is pressed, the cursor is moved to the right window. When the **←** key is pressed, the cursor is moved to the left window.
- When the **ST** key is pressed, the contents of the next GLU code in the misoperation file are displayed.
- When the **TL** key is pressed, the items in the right window are stored in the destination GLU code. And the contents are printed on receipt/journal printer. Then the entry of the next destination GLU code is displayed. If the **CANCEL** key is pressed at this time, the correction operation is finished.

Function

Subtotal and taxable subtotals of corresponding GLU/PBLU are updated, but in the other totalizers are not updated. (Because they are already updated when misoperation has occurred.)

15 Operator Maintenance

Replacing the Backup Battery Pack

The memory backup battery pack has an expected life of approximately three years under normal conditions (temperature extremes can shorten the life of the battery). Replace the memory backup battery pack every three years.

The battery pack is not available on the market, so please contact your dealer and ask him or her for replacement when you need a new one. Be sure to use a battery pack specified by SHARP. Use of other battery packs could damage your POS terminal.

Caution : When you replace the battery pack, keep the POS terminal turned on. If you replace the battery pack with the power switch off, all the data in memory will be lost.

1. Remove the battery compartment cover located at the bottom of the machine by sliding in the direction of the arrow.

2. Take out the battery pack.

3. Disconnect the connector.

- 4.** Connect the connector of a new battery pack.

- 5.** Install the pack, placing the wires in the slit as shown in the figure at right.

- 6.** Replace the battery compartment cover.

In Case of Power Failure

When power is lost, the POS terminal retains its memory contents and all information on sales entries.

- When power failure is encountered in POS terminal idle state or during an entry, the POS terminal returns to the normal state of operation after power recovery.

Before Calling for Service

The malfunctions shown in the left-hand column below, labeled “Fault,” do not necessarily indicate functional faults of the machine. It is therefore advisable to refer to the “Checking” shown in the right-hand column before calling for service.

Fault	Checking
<ul style="list-style-type: none">• The display does not illuminate.	<ul style="list-style-type: none">• Is power supplied to the electric outlet?• Is the power cord plug out or loosely connected to the electrical outlet?• Is the power switch in the “ON” position?• Are the brightness control and the contrast control adjusted correctly?
<ul style="list-style-type: none">• The display is illuminated, but the whole machine refuses entries.	<ul style="list-style-type: none">• Is the clerk key inserted?
<ul style="list-style-type: none">• No receipt is issued.	<ul style="list-style-type: none">• See the printer manual.
<ul style="list-style-type: none">• No journal paper is taken up.	
<ul style="list-style-type: none">• Printing is unusual.	

16 Options

List of Options

For your ER-A750 POS terminal, the following options are available:

For details, contact your authorized SHARP dealer. Do not try to install any options yourself.

1. RAM memory board model ER-03MB or ER-04MB
2. Two-port RS-232 interface model ER-A7RS
3. External printer model ER-01PU
4. Remote printer model ER-03RP or ER-04RP
5. Remote drawer model ER-03DW, ER-04DW or ER-05W
6. Remote coin case model ER-48CC3, ER-48CC2 or ER-58CC3
7. Remote coin case cover model ER-02CV1-5, 01CV1-5 or ER-03CV
8. Magnetic card reader model ER-A8MR (ER-A7RS is needed for this option.)

17

Specifications
